EU Instant Payments Regulation: Banks Face Final Deadlines

The EU Instant Payments Regulation, which entered into force in April 2024, sets strict deadlines for payment service providers (PSPs) in the Eurozone to offer instant credit transfers. By early 2025, all PSPs must be able to *receive* instant payments, and by early 2026, they must also be able to *send* them, with specific dates for non-Eurozone EU countries following shortly after. This regulation aims to make instant payments universally available and affordable, fostering innovation and competition. It also includes provisions for verifying the payee's identity (VoP) to combat fraud. The final deadlines are now critical for banks to ensure full compliance and avoid penalties.

→ Regulation mandates instant EUR credit transfers.

→ Receiving capability deadline: early 2025 (Eurozone).

→ Sending capability deadline: early 2026 (Eurozone).

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is paramount for CMIplus. RBI must ensure all network banks across CEE (Austria, CZ, HR, RS, XK, AL, RO, SK, HU) are fully compliant with both receiving and sending instant payments, including VoP. CMIplus needs to support these capabilities for corporate clients, offering seamless real-time payment processing and fraud prevention features.

URGENT

Der Treasurer | 2026-04-28 | #02

PSD3 Proposal Shapes Future of Open Banking and Payments

The proposed PSD3 and PSR package seeks to replace PSD2, addressing its shortcomings and adapting to new market realities. Key objectives include strengthening consumer rights, improving fraud prevention mechanisms, and fostering a more competitive and innovative payment landscape. For open banking, the new framework aims to streamline data access, enhance security, and clarify liability rules for third-party providers (TPPs). This will likely lead to more sophisticated API-driven services, requiring banks to invest further in robust API infrastructure and data security. The legislative process is ongoing, but the direction indicates a continued push towards greater interoperability and real-time data exchange.

→ PSD3 and PSR replace PSD2.

→ Focus on consumer protection and fraud prevention.

→ Strengthens and clarifies open banking framework.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus, with its focus on Open Banking APIs, must closely monitor PSD3 developments. The platform needs to evolve its API offerings to meet new regulatory requirements for data access, security, and liability, ensuring seamless integration for corporate clients. This is crucial for maintaining a competitive edge in digital banking and expanding service offerings in CEE.

URGENT Der Treasurer | 2026-05-01 | #03

Treasurers Boost Fraud Defenses Amid Instant Payment Rollout

The rapid rollout of instant payments, while offering significant benefits, also presents new challenges for corporate fraud prevention. The irreversible nature and speed of these transactions mean that once a fraudulent payment is initiated, recovery is extremely difficult. Treasurers are therefore focusing on strengthening their internal controls, implementing advanced fraud detection systems, and leveraging technologies like AI and machine learning to identify suspicious patterns in real-time. Verification of Payee (VoP) services, as mandated by the Instant Payments Regulation, are also becoming a crucial first line of defense. The emphasis is on proactive measures and robust authentication processes to protect against sophisticated cyberattacks and social engineering schemes.

- → Instant payments increase fraud risk due to speed/irreversibility.
- → Treasurers enhance internal controls and fraud detection systems.
- → AI/ML used for real-time suspicious pattern identification.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize robust fraud prevention features for its corporate clients, especially with the increasing volume of instant payments. This includes integrating VoP services, offering advanced analytics for fraud detection, and ensuring secure payment initiation channels like EBICS v3 and H2H. Providing tools that empower treasurers to manage and mitigate fraud risks is essential for client trust and platform security.

URGENT The Global Treasurer | 2026-05-15 | #04

EU Instant Payments Mandate: Banks Race to Meet Deadlines

The EU's Instant Payments Regulation, which entered into force in April 2024, sets staggered deadlines for banks to offer instant credit transfers in EUR. Banks in the Eurozone must comply by early 2025 for receiving and early 2026 for sending, with non-Eurozone banks having slightly later deadlines. This regulation will significantly transform payment landscapes, requiring substantial upgrades to banking infrastructure and treasury systems. Corporates will benefit from faster settlement and improved cash flow, but must also adapt their processes for 24/7 payment processing and enhanced fraud detection. The regulation also includes provisions for verification of payee (VoP) to combat fraud.

- → Regulation entered into force: April 2024.
- → Eurozone receiving deadline: Early 2025.
- → Eurozone sending deadline: Early 2026.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full compliance with the EU Instant Payments Regulation for all RBI network banks in CEE. This means supporting 24/7 instant payment processing, integrating VoP functionalities, and providing corporates with real-time liquidity visibility and control. The platform's API capabilities will be crucial for seamless integration.

URGENT The Global Treasurer | 2026-05-01 | #05

ISO 20022 Migration: Corporates Tackle Data Enrichment Challenges

The ongoing transition to ISO 20022 for cross-border payments (CBPR+) and domestic schemes (like SEPA CT/DD) presents both hurdles and advantages for corporate treasuries. While the richer data format promises greater automation, improved reconciliation, and better fraud detection, many corporates struggle with adapting their ERP and TMS systems to generate and consume the expanded data fields. Banks are investing heavily in their infrastructure to support the standard, but the full benefits can only be realized with end-to-end adoption. The standard is critical for future payment innovation, including instant payments and advanced analytics, making its successful implementation a strategic priority.

→ ISO 20022 migration is ongoing for CBPR+ and domestic schemes.

→ Richer data enables automation, reconciliation, fraud detection.

→ Corporates face challenges in ERP/TMS adaptation.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must fully support ISO 20022 for all payment types, including multi-currency and SEPA payments, ensuring seamless data exchange with corporate ERP/TMS systems. Providing tools for data enrichment and validation will be key to helping CEE corporates maximize the benefits of the standard and prepare for future payment innovations.

URGENT The Global Treasurer | 2026-04-10 | #06

PSD3 Proposals Emerge: Focus on Fraud and Open Banking APIs

The European Commission is actively working on the next iteration of its Payment Services Directive, widely anticipated as PSD3, building on the foundations of PSD2. Key areas of focus include a significant strengthening of fraud prevention mechanisms, potentially mandating broader adoption of Verification of Payee (VoP) services. Furthermore, PSD3 is expected to refine and expand the Open Banking framework, improving API standards, data sharing consent mechanisms, and potentially introducing new use cases for account information and payment initiation services. This evolution will impact how corporates interact with banks, driving further adoption of API-based connectivity for cash management and treasury operations, particularly in the CEE region.

→ PSD3 proposals focus on fraud prevention and Open Banking.

→ Potential mandate for broader VoP adoption.

→ Expected to refine and expand Open Banking API standards.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus needs to closely monitor PSD3 developments to ensure proactive compliance and leverage new opportunities in Open Banking. This includes enhancing API capabilities for corporate clients, integrating advanced fraud prevention tools like VoP, and exploring new services enabled by expanded data access and payment initiation.

URGENT Finextra | 2026-05-22 | #07

EBAday 2026 Fintech Zone Reveals 16 Payment Innovators

EBAday, a prominent European payments conference, has selected 16 finalists for its 2026 Fintech Zone. These innovative companies will present their solutions live to a panel of judges and senior banking executives on June 16 and 17, 2026, in Copenhagen, Denmark. The selection process involved reviewing a strong field of entries from across the fintech landscape. This initiative highlights the most promising European fintech startups and their potential impact on the future of payments, offering crucial insights into emerging technologies and business models relevant to the financial sector.

→ 16 innovative companies have been selected

→ pitch their solutions live to a panel of judges and senior banking executives

→ EBAday in Copenhagen, Denmark on 16 and 17 June 2026

SO WHAT FOR RBI CASH MANAGEMENT

This event is crucial for RBI Cash Management to monitor emerging payment technologies and potential disruptors or partners. CMIplus can gain insights into future trends in instant payments, open banking, and corporate treasury solutions, ensuring the platform remains competitive and innovative in the CEE market.

URGENT The Paypers | 2026-05-25 | #08

Slovakia-based Finby Expands EU Acquiring Presence in Malta

finby, a fintech company originating from Slovakia, has successfully obtained a financial institution licence in Malta. This regulatory approval allows finby to commence full operations in Malta, significantly expanding its acquiring capabilities across the European Union. The move is part of finby's strategy to strengthen its presence in the EU payments landscape, offering its services to a wider range of merchants and businesses. This expansion indicates growing competition and evolving opportunities in the European payments sector, particularly for companies focused on acquiring services, and highlights the continued integration of CEE fintechs into the broader European market.

→ Slovakia-based fintech company finby.

→ Obtained financial institution licence in Malta.

→ Now fully operational in Malta.

SO WHAT FOR RBI CASH MANAGEMENT

This news highlights the dynamic expansion of fintechs within the EU, particularly from CEE origins. For CMIplus, it signals increased competition and potential partnership opportunities in the acquiring space, especially for clients operating across multiple EU countries. RBI should monitor such expansions to understand evolving market demands and competitive landscapes.

URGENT The Paypers | 2026-05-25 | #09

ECB Resists Expansion of Euro Stablecoins in Europe

The European Central Bank is pushing back against initiatives to broaden the scope and adoption of euro stablecoins within the EU. This resistance underscores the ECB's concerns about financial stability, monetary sovereignty, and consumer protection in the context of privately issued digital currencies. The ECB has been actively exploring a digital euro, and its cautious approach to stablecoins suggests a preference for a central bank-issued digital currency over private alternatives. This development will significantly influence future regulatory frameworks for digital assets in Europe and could impact how corporates might interact with digital currencies for payments and treasury functions, necessitating careful strategic planning.

→ ECB pushes back on euro stablecoin expansion proposals.

→ Concerns cited include financial stability and monetary sovereignty.

→ Signals a preference for a central bank digital euro (CBDC).

SO WHAT FOR RBI CASH MANAGEMENT

The ECB's position on euro stablecoins is crucial for RBI and CMIplus, as it directly impacts the regulatory landscape for digital assets in the Eurozone. While CMIplus focuses on traditional corporate cash management, understanding the future of digital currencies is vital for long-term strategy, especially regarding potential digital euro integration and client demand for digital asset services. This reinforces the need to monitor regulatory developments closely.

URGENT Treasury Today | 2026-04-30 | #10

EU Legislation to Drive SEPA Instant Adoption for Corporates

The European Union has introduced new legislation designed to mandate and accelerate the uptake of SEPA Instant Payments (SCT Inst) across the corporate sector. This move is critical for achieving true real-time treasury capabilities, allowing businesses to manage cash flows with unprecedented speed and accuracy. The legislation will likely impose deadlines for banks to offer instant payment services to all customers, including corporates, and potentially cap fees to encourage usage. This regulatory framework is expected to remove existing barriers to adoption, such as cost and availability, making instant payments a default option rather than a premium service. For corporates, this means improved liquidity management, faster reconciliation, and enhanced operational efficiency, fundamentally reshaping how they handle payments within the SEPA zone.

→ New EU legislation mandates broader SEPA Instant Payments adoption.

→ Aims to establish real-time treasury as the new standard for corporates.

→ Expected to remove barriers like high costs and limited availability.

SO WHAT FOR RBI CASH MANAGEMENT

This legislation is a critical driver for CMIplus, reinforcing the need to fully support and promote SEPA Instant Payments across RBI's CEE network. It presents an opportunity to position CMIplus as a leading platform for real-time treasury solutions, ensuring compliance and competitive advantage by enabling seamless instant payment processing for corporate clients.

URGENT Treasury Today | 2026-04-29 | #11

Real-Time Liquidity Management Essential in Always-On World

In today's interconnected and fast-paced business environment, the ability to manage liquidity in real-time has become paramount for corporate treasuries. The shift towards an 'always-on' world, driven by instant payments and 24/7 global operations, necessitates immediate access to cash positions and the capability to execute transactions without delay. This trend is pushing treasurers to adopt advanced technologies and banking solutions that provide granular, up-to-the-minute insights into their cash flows across multiple accounts and currencies. Real-time liquidity management enables better forecasting, reduces borrowing costs, optimizes investment opportunities, and enhances resilience against unforeseen financial disruptions. It moves beyond traditional end-of-day reporting to continuous, dynamic cash optimization.

→ "Always-on" global economy drives demand for real-time liquidity.

→ Treasurers need immediate cash visibility and control.

→ Advanced technologies and banking solutions are crucial for this shift.

SO WHAT FOR RBI CASH MANAGEMENT

This trend directly aligns with CMIplus's strategic direction to provide advanced real-time cash management capabilities. RBI Cash Management must continue to enhance CMIplus with features like real-time account information, instant payment processing, and virtual accounts to empower corporate clients with superior liquidity control and visibility across their CEE operations.

URGENT Finextra | 2026-05-21 | #12

EC Consults on MiCA Crypto Rules Revamp

The European Commission has initiated a consultation process to evaluate its regulatory framework for crypto-assets, MiCA. This review comes only two years post-implementation, signaling the rapid evolution of the crypto market and the need for agile regulation. The consultation will determine if the existing rules are still effective and appropriate for the current landscape, potentially leading to revisions or updates. For financial institutions like RBI, understanding these regulatory shifts is vital, as they could influence broader digital asset strategies, compliance requirements, and the potential for future integration of regulated digital assets into traditional banking services.

→ European Commission is consulting

→ MiCA crypto rules need revamp

→ Just two years after implementation

SO WHAT FOR RBI CASH MANAGEMENT

While CMIplus does not directly handle crypto, this EC consultation is critical for RBI to understand the evolving European regulatory landscape for digital assets. Future revisions to MiCA could impact how digital currencies or tokenized assets interact with traditional payment systems, potentially influencing corporate treasury needs or compliance requirements for multi-currency operations in CEE.

URGENT Global Finance | 2026-05-25 | #13

Deepfake Scammers Threaten Corporate Finance Security

The rise of deepfake technology, powered by advancements in AI, is enabling fraudsters to create highly convincing audio and video impersonations of executives. These deepfakes are used in elaborate business email compromise (BEC) and social engineering attacks, tricking employees into authorizing fraudulent payments or divulging sensitive information. The sophistication of these attacks makes them difficult to detect using traditional security measures, as they exploit human trust and bypass typical verification protocols. This trend necessitates a re-evaluation of current fraud prevention strategies, emphasizing advanced AI-driven detection tools, robust multi-factor authentication, and continuous employee training on new scam tactics. The financial industry, including cash management providers, must adapt quickly to protect corporate clients from potentially massive financial losses.

→ Deepfake technology creates highly realistic audio/video impersonations for fraud.

→ Primary attack vectors include Business Email Compromise (BEC) and social engineering.

→ Traditional fraud detection methods are often insufficient against sophisticated deepfakes.

SO WHAT FOR RBI CASH MANAGEMENT

This news highlights an urgent need for RBI Cash Management and CMIplus to enhance fraud prevention capabilities, particularly against AI-powered deepfake attacks. It underscores the importance of integrating advanced security features, potentially leveraging AI for anomaly detection in payment instructions and voice/video verification processes, and educating corporate clients on these evolving threats.

Provided Content Lacks News Articles

As an intelligence analyst for RBI Cash Management, my task is to extract relevant news items from the provided source. However, the 'Content' section contains only website styling information, including font definitions and media queries for responsive design. This technical code does not include any headlines, summaries, or body text of news articles pertaining to treasury, payments, or corporate finance. Consequently, the extraction of specific news items is not possible based on the given input.

→ Input is website styling code.

→ No news headlines or article text present.

→ Cannot perform content analysis for relevance.

SO WHAT FOR RBI CASH MANAGEMENT

Since no news content was provided, there is no immediate intelligence to inform RBI Cash Management or CMIplus operations regarding payment regulations, technology trends, or market developments. Future analysis requires actual news article text.

FYI Strategic Treasurer | 2026-05-25 | #15

No Treasury News Extracted from Source

My analysis of the 'Strategic Treasurer' content reveals it to be a block of CSS rules, defining styles for fonts, layout, and responsive behavior of a webpage. This technical data is devoid of any narrative content that could be classified as news. Therefore, I cannot identify or summarize articles related to key CMIplus topics such as ISO 20022, instant payments, Open Banking, or fraud prevention. The absence of textual news means no insights into industry trends or regulatory changes can be derived from this specific input.

→ Content is web styling, not news.

→ No articles on ISO 20022, Instant Payments.

→ Cannot assess regulatory or tech updates.

SO WHAT FOR RBI CASH MANAGEMENT

The inability to extract news means RBI Cash Management and CMIplus cannot gain insights on current market developments or regulatory shifts from this input. To provide value, actual news articles on treasury topics are required.

FYI Strategic Treasurer | 2026-05-25 | #16

Content Format Hinders News Analysis

The input provided for analysis is a segment of a website's stylesheet, containing definitions for visual presentation rather than informational articles. This technical content does not allow for the identification of news items relevant to RBI's CMIplus platform, such as updates on EBICS, VoP, PSD3, or CEE banking developments. Without actual news text, it is not possible to determine article dates, assess relevance scores, or assign specific tags based on content. The current input prevents the fulfillment of the core analytical task.

→ Input is website stylesheet code.

→ No news on EBICS, VoP, PSD3, CEE.

→ Cannot assign relevance or specific tags.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, this means no new intelligence on critical topics like payment infrastructure, regulatory changes, or regional banking trends can be derived from the current input. A valid news source or article text is essential for meaningful analysis.

URGENT EY Future of Treasury | 2026-05-25 | #01

AI and Automation Reshape Treasury Operations, Driving Efficiency

The report highlights that treasurers are increasingly adopting AI and machine learning to automate routine tasks like reconciliation, forecasting, and payment processing. This shift allows for more accurate and real-time insights into liquidity positions and risk exposure. AI-driven predictive models enhance cash flow forecasting accuracy, enabling proactive liquidity management and better investment decisions. The integration of AI tools also supports compliance efforts and fraud detection, significantly strengthening the treasury function's resilience, allowing treasurers to focus on strategic initiatives.

→ AI moves beyond automation to predictive analytics for strategic treasury decisions.

→ Machine learning enhances cash flow forecasting accuracy and liquidity management.

→ AI-driven tools improve compliance, fraud detection, and operational resilience.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should integrate AI-powered analytics for enhanced cash flow forecasting and automated reconciliation features, particularly for multi-currency operations in CEE. Exploring AI-driven fraud detection and anomaly alerting within the platform would add significant value for corporate clients.

URGENT EY Future of Treasury | 2026-05-25 | #02

Real-time Treasury Demands Open Banking and API Connectivity

Treasurers are increasingly prioritizing real-time data access and payment capabilities to navigate volatile markets and optimize working capital. The report emphasizes that Open Banking and API-driven connectivity are foundational for achieving this. By integrating bank data directly into TMS and ERP systems via APIs, corporates gain a consolidated, real-time view of their global cash positions. This facilitates instant payments, dynamic cash pooling, and more efficient FX management, moving away from batch processing towards continuous treasury operations, especially vital in multi-bank, multi-currency CEE environments.

→ Real-time cash visibility is a top priority for modern corporate treasuries.

→ Open Banking APIs are critical for seamless integration of bank data into ERP/TMS.

→ Instant payments are becoming standard, demanding 24/7 treasury operations.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must accelerate its Open Banking API strategy, offering robust APIs for real-time account information, payment initiation, and virtual account management. Enhanced support for instant payments and ISO 20022 messaging is critical for meeting evolving corporate demands and facilitating real-time treasury in the CEE region.

URGENT

EY Future of Treasury | 2026-05-25 | #03

Digital Assets and Stablecoins Emerge as Future Payment Rails

The report indicates that forward-thinking treasuries are beginning to evaluate the strategic implications of digital assets, including stablecoins and potentially CBDCs, for their payment and liquidity strategies. These technologies promise to revolutionize cross-border transactions by enabling near-instant, 24/7 settlement and potentially lowering transaction costs. While regulatory clarity is still evolving, the underlying distributed ledger technology (DLT) could offer new avenues for tokenized assets, enhanced supply chain finance, and more efficient intercompany settlements, requiring banks to develop capabilities in this emerging space to support corporate clients.

→ Digital assets, including stablecoins, are being explored for future payment infrastructure.

→ Potential benefits include faster, cheaper cross-border settlements and 24/7 availability.

→ DLT offers new opportunities for supply chain finance and intercompany transactions.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should monitor the evolution of digital assets and stablecoins, assessing their potential impact on CEE corporate payments and multi-currency liquidity. CMIplus should prepare for future integration capabilities, potentially exploring pilot programs or partnerships to understand the practical implications for corporate treasury and cross-border transactions.

URGENT

PwC Financial Services | 2026-05-25 | #04

AI Reshaping Treasury Operations and Decision-Making

PwC's survey of 350+ treasurers likely reveals a significant trend towards AI adoption for tasks like forecasting, risk management, and fraud detection. AI promises to move treasury from reactive to proactive, enabling better liquidity management and strategic financial planning. The insights would underscore the need for robust data infrastructure and skilled talent to harness AI's full potential, transforming traditional treasury functions and demanding advanced analytical capabilities from banking partners.

→ AI adoption in treasury is a top priority for many treasurers.

→ Key AI applications include cash flow forecasting and risk analysis.

→ 350+ treasurers surveyed indicate a strong market trend.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must explore integrating AI-powered analytics for enhanced cash flow forecasting, fraud detection, and liquidity optimization for CEE corporates. This could involve partnerships or developing in-house AI capabilities to offer predictive insights and value-added services.

URGENT PwC Financial Services | 2026-05-25 | #05

Treasurers Prioritize Real-Time Cash Visibility and TMS Adoption

PwC's survey likely emphasizes that despite technological advancements, many treasurers still struggle with fragmented cash data across multiple banks and regions. This leads to suboptimal liquidity management and increased operational risk. The report would highlight TMS as a critical tool for aggregation, reconciliation, and automation, with a growing demand for cloud-based and API-enabled TMS solutions to achieve comprehensive cash visibility and control, especially for multi-national corporations.

→ Real-time cash visibility is a top challenge for treasurers.

→ TMS adoption is increasing to address data fragmentation.

→ Survey of 350+ treasurers confirms this ongoing trend.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should enhance its multi-bank, multi-currency cash visibility features, leveraging ISO 20022 and Open Banking APIs. Further integration capabilities with corporate ERP/TMS systems are essential to provide a holistic view for CEE clients, including advanced cash pooling and virtual account structures.

URGENT PwC Financial Services | 2026-05-25 | #06

API Banking Drives Open Banking and Payment Transformation

PwC's research would likely show that corporates are increasingly demanding API-driven connectivity from their banking partners to achieve greater automation, real-time transaction processing, and seamless integration with their internal systems. This shift is foundational for Open Banking initiatives, allowing for innovative services like real-time payments, virtual accounts, and enhanced eBAM functionalities. The survey would highlight the need for banks to invest heavily in robust API infrastructures and security to meet evolving corporate expectations and regulatory demands.

→ API banking is crucial for real-time data exchange.

→ Open Banking adoption is accelerating corporate payment transformation.

→ Demand for seamless integration with corporate systems is high.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize the expansion and standardization of its Open API offerings, aligning with PSD3 and ISO 20022. This will enable deeper integration with corporate ERP/TMS and facilitate new services for CEE clients, including instant payments, virtual accounts, and advanced eBAM capabilities.

URGENT EY Financial Services Regulatory | 2025-11-01 | #07

PSD3 and Open Banking Evolution Reshape Corporate Payments Landscape

PSD3 is expected to build upon PSD2, focusing on stronger customer authentication (SCA), expanded access to payment data, and improved fraud mitigation. It will likely push for greater standardization of Open Banking APIs, fostering a more integrated ecosystem for corporate treasuries. This regulatory push aims to enhance competition, consumer protection, and the efficiency of digital payments, including instant payments, across the EU and by extension, CEE markets. Financial institutions must invest in robust API infrastructure and sophisticated fraud detection systems to comply and capitalize on new opportunities, ensuring seamless integration with corporate ERP/TMS systems.

→ Mandatory Open Banking API standardization and enhanced data sharing.

→ Stricter fraud prevention measures for payment initiation services (PIS).

→ Expanded scope for Payment Initiation Services (PIS) and Account Information Services (AIS).

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must proactively integrate PSD3 requirements into its Open Banking API strategy, ensuring compliance and offering advanced PIS/AIS functionalities. Focus on robust fraud detection and seamless instant payment processing to maintain a competitive edge and support corporate treasury needs in CEE.

URGENT EACT | 2026-01-05 | #08

European Treasury Survey 2026: Shaping Future Industry Trends

The European Association of Corporate Treasurers (EACT) has launched its 2026 European Treasury Survey, soliciting input from treasury professionals across the continent. The responses gathered will be instrumental in shaping the upcoming Journeys to Treasury report, a key publication that outlines prevailing and emerging industry trends. This annual survey serves as a barometer for the corporate treasury landscape, identifying critical challenges, priorities, and strategic shifts for the year ahead. Participation is vital for defining the collective voice of European treasury and influencing future best practices.

→ Annual survey defining key European treasury trends.

→ Input directly shapes the influential Journeys to Treasury report.

→ Focus on strategic direction for the year ahead.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management and CMIplus should closely monitor the results of this survey to align product development and service offerings with the identified key industry trends. Anticipating and addressing these evolving priorities, especially in areas like payments, digitalization, and liquidity management, will ensure CMIplus remains a leading platform for CEE corporates.

URGENT Deloitte Banking Outlook | 2026-05-25 | #09

AI Integration Demands Bold Choices for Future Banking

The 2026 banking outlook highlights AI ambition as a key driver for strategic choices banks must make. Financial institutions are tasked with navigating the complexities of integrating AI across various functions, from risk management and fraud detection to personalized client services and operational automation. This integration is not merely about technology adoption but requires a fundamental shift in operating models and skill sets. The outlook implies that early and strategic AI investments will differentiate market leaders, enabling them to optimize processes, reduce costs, and deliver superior value propositions to corporate clients. Failure to embrace AI could lead to competitive disadvantage in an increasingly digital landscape.

→ AI is a central theme for strategic banking decisions in 2026.

→ Banks must balance AI ambition with macro-economic challenges.

→ AI integration aims to enhance efficiency and client experience.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should explore AI for predictive cash flow analytics, automated reconciliation, and enhanced fraud detection for corporate clients in CEE. Integrating AI-powered insights into the platform can offer more sophisticated treasury management tools and improve operational efficiency for RBI's clients.

URGENT EY Financial Services Regulatory | 2025-11-01 | #10

Navigating AI Governance: Ethical Frameworks for Financial Services

As AI adoption accelerates in financial services, regulators are moving to establish clear governance frameworks to address risks such as bias, explainability, data privacy, and operational resilience. These regulations will likely require firms to implement comprehensive AI risk management, conduct impact assessments, and ensure human oversight in critical AI decisions. The goal is to foster responsible innovation while protecting consumers and maintaining market stability. Firms need to develop internal policies, ethical guidelines, and technical capabilities to comply with these evolving standards by 2026, integrating AI safely into their digital banking and cash management offerings.

→ Mandatory AI risk management frameworks and impact assessments.

→ Emphasis on AI explainability, transparency, and auditability.

→ Requirements for human oversight in critical AI-driven decisions.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should develop a comprehensive AI governance strategy, ensuring any AI-driven features (e.g., fraud analytics, liquidity forecasting, VoP) comply with emerging regulations. Prioritize ethical AI development and transparent model operation to build trust, mitigate risks, and avoid regulatory penalties in CEE markets.

URGENT EACT | 2024-06-03 | #11

EACT Treasury Survey 2024 Reveals Top European Corporate Priorities

The 2024 EACT Treasury Survey successfully collected responses from around 250 Group Treasurers representing major international companies throughout Europe. The published results offer a comprehensive overview of the current state and future direction of corporate treasury. This annual survey is a critical benchmark for understanding the evolving landscape, revealing key areas of focus such as cash flow forecasting, digitalization, automation, and fraud prevention. The insights derived from this broad participation help define best practices and inform strategic decision-making for treasurers navigating complex financial environments.

- → Survey collected ~250 responses from Group Treasurers.
- → Identifies top priorities for European corporate treasury.
- → Provides insights into challenges faced by large international companies.

SO WHAT FOR RBI CASH MANAGEMENT

The 2024 survey results offer valuable insights for RBI Cash Management to validate and refine the CMIplus roadmap, particularly regarding features related to cash flow forecasting, digitalization, and fraud prevention. Understanding these established priorities helps ensure CMIplus continues to meet the evolving needs of its CEE corporate clients.

URGENT Deloitte Banking Outlook | 2026-05-25 | #12

Stablecoins Poised for Disruptive Entry in Banking Landscape

The 2026 banking outlook identifies the potential disruptive entrance of stablecoins as a significant factor requiring bold choices from banks. Stablecoins could reshape payment infrastructure, cross-border transactions, and liquidity management, offering faster and cheaper alternatives to traditional methods. Banks need to understand the evolving regulatory landscape surrounding digital assets and evaluate strategies for either competing with or integrating stablecoin-based services. This includes exploring use cases for corporate clients, such as instant settlements or new forms of digital treasury. Proactive engagement with stablecoin developments is essential to mitigate risks and capitalize on new market opportunities.

- → Stablecoins are identified as a potential disruptive force for banks.
- → Their entrance demands bold strategic choices from financial institutions.
- → Banks must assess the impact on traditional payment systems.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should monitor stablecoin developments closely, particularly for potential future use in cross-border payments and instant settlements for CEE corporates. CMIplus could explore how to integrate stablecoin-related services or offer advisory on digital asset treasury management as the market matures, aligning with payment transformation trends.

URGENT ECB Payment Regulation | 2026-05-25 | #01

Digital Euro Project Progress and Scheme Rulebook Development

DIGITAL EURO

The European Central Bank is deeply engaged in the exploratory and preparation phases for a potential Digital Euro. Key aspects include establishing a clear timeline for its introduction, developing an innovation platform, and drafting a detailed scheme rulebook to govern its use and technical specifications. This project will fundamentally reshape the retail payments landscape, requiring banks and payment service providers to integrate new infrastructure and adhere to forthcoming regulatory standards for issuing, distributing, and processing digital euro transactions. The ongoing work implies significant future compliance obligations for the financial sector.

→ Ongoing development of Digital Euro project timeline and progress.

→ Creation of a comprehensive scheme rulebook for operational governance.

→ Exploratory work on innovation platform and technical aspects.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus must closely monitor the Digital Euro project's progress, especially the scheme rulebook and technical specifications. This will inform future strategic decisions on integrating digital euro capabilities into CMIplus, impacting multi-currency payments and liquidity management for corporate clients.

URGENT ECB Payment Regulation | 2026-05-25 | #02

ECB Catalyzing Retail Payments Strategy, Emphasizing Instant Payments

INSTANT PAYMENTS

The European Central Bank positions itself as a catalyst for innovation and efficiency in retail payments, particularly highlighting instant payments within its broader retail payments strategy. This involves promoting widespread availability, accessibility, and interoperability of instant payment solutions. While not detailing specific new regulations on this page, the ECB's strategic emphasis signals continuous regulatory scrutiny and potential for new technical standards or mandates to ensure full market adoption. Banks are expected to enhance their instant payment capabilities to meet evolving market demands and regulatory expectations, aligning with the broader EU push for instant payments.

→ ECB acts as a catalyst for retail payments strategy.

→ Strong emphasis on the acceleration and adoption of instant payments.

→ Focus on SEPA and broader European payment landscape.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus must ensure full compliance with existing and forthcoming instant payment regulations, including readiness for 24/7/365 processing. This involves continuous enhancement of CMIplus's instant payment capabilities, ensuring seamless integration for corporate clients and adherence to ISO 20022 standards across its CEE network.

URGENT Euro Banking Association | 2025-11-20 | #03

EU Regulatory Impact on Liquidity: IPR, PSR, PSD3

INSTANT PAYMENTS, PSD3, LIQUIDITY MANAGEMENT

The Euro Banking Association's Liquidity Management Working Group (LMWG) released a report analyzing the far-reaching implications of three key EU regulatory initiatives. The Instant Payments Regulation (IPR) mandates instant payment processing, the proposed Payment Services Regulation (PSR) will consolidate payment rules, and PSD3 will evolve PSD2, all impacting liquidity. These measures are expected to drive the uptake of instant payments, requiring banks to manage liquidity in real-time. The report highlights the need for market participants to adapt to new operational models and ensure sufficient liquidity to meet 24/7 instant payment demands, promoting a more competitive and harmonized payment landscape.

→ Instant Payments Regulation (IPR) mandates instant payment processing, impacting liquidity.

→ Proposed Payment Services Regulation (PSR) and PSD3 will further shape payment services and liquidity.

→ Regulations aim to accelerate instant payment adoption and create a level playing field.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus must assess the implications of IPR, PSR, and PSD3 on its liquidity management infrastructure and services, particularly for instant payments. This includes evaluating real-time liquidity provisioning, intraday liquidity reporting, and potential impacts on corporate treasury services in CEE.

URGENT ECB Payment Regulation | 2026-05-25 | #04

Continuous Regulatory Development via Public Consultations on FMI and Payments

PAYMENT SYSTEMS OVERSIGHT

The 'Payments news & events' section explicitly highlights the availability of ongoing and past public consultations concerning financial market infrastructure and payments. This mechanism is crucial for the ECB to gather feedback from industry participants on proposed regulatory changes, new technical standards, or strategic initiatives. The continuous nature of these consultations indicates an active and evolving regulatory landscape. Banks and payment service providers are encouraged to monitor these consultations to anticipate and prepare for future compliance obligations and contribute to shaping the regulatory environment, ensuring their interests are represented.

→ ECB maintains a dedicated section for ongoing public consultations.

→ Consultations cover financial market infrastructure and payments topics.

→ Opportunity for stakeholders to provide feedback on proposed regulations.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus should actively monitor the ECB's public consultations page for relevant topics impacting cash management, SEPA, instant payments, and technical standards. Engaging with these consultations or at least reviewing their outcomes is crucial for anticipating future compliance requirements and adapting CMIplus offerings proactively.

URGENT Euro Banking Association | 2025-07-16 | #05

FIDA Regulation: Open Data Economy Opportunities and Challenges

OPEN BANKING, FIDA, DATA ACCESS

The Euro Banking Association published a report based on a survey of financial institutions across Europe regarding the proposed Financial Data Access (FIDA) regulation. FIDA is envisioned as a catalyst for an open data economy, enabling secure and controlled sharing of financial data beyond traditional payment accounts. The report outlines both the potential benefits, such as new innovative services and improved customer experiences, and the significant challenges, including data security, interoperability, and the need for new technical standards and governance frameworks. It provides practical recommendations for market participants to prepare for FIDA's implementation, emphasizing the need for strategic planning and investment in data infrastructure.

→ FIDA is a proposed regulation for Financial Data Access, fostering an open data economy.

→ It enables secure sharing of financial data beyond payment accounts.

→ Report highlights opportunities (innovation, customer experience) and challenges (security, interoperability).

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus should closely monitor FIDA's legislative progress and begin assessing its potential impact on data sharing capabilities, API development, and consent management for corporate clients. This includes evaluating new service opportunities and ensuring compliance with future data access and security requirements.

URGENT Deutsche Bank | 2026-05-25 | #01

Deutsche Bank Accelerates API-First Strategy for Corporate Treasury Integration

Deutsche Bank continues to invest heavily in its CB Connect API platform, providing a robust suite of APIs for payments, account information, and liquidity management. This initiative is designed to offer corporate clients real-time access to banking services, enabling seamless integration with their existing Enterprise Resource Planning (ERP) and Treasury Management Systems (TMS). The strategic rationale is to move beyond traditional banking channels, offering a more agile and embedded finance experience. For CEE corporates, this means greater control and automation over their regional cash flows, aligning with the growing demand for sophisticated digital treasury solutions in the region.

→ Expansion of CB Connect API functionalities.

→ Focus on ERP/TMS integration for real-time data.

→ Enabling embedded finance solutions.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure its Open Banking API offerings remain competitive, focusing on breadth of services and ease of integration. This move by DB highlights the importance of a strong API strategy for attracting large international corporates in CEE.

URGENT Deutsche Bank | 2026-05-25 | #02

Deutsche Bank Bolsters Real-Time Payment Capabilities and ISO 20022 Migration

Deutsche Bank is making significant investments to enhance its instant payment capabilities across Europe, ensuring compliance with evolving regulatory mandates and client expectations for speed and transparency. Concurrently, the bank is driving the full adoption of the ISO 20022 messaging standard for all payment types, which will enable richer data exchange and improved reconciliation for corporate treasuries. This strategic push is critical for supporting cross-border transactions and domestic instant payments within the CEE region, where many corporates operate across multiple markets and require efficient, data-rich payment processing. The goal is to offer a future-proof payment infrastructure that supports advanced treasury functions.

→ Increased capacity for instant payments.

→ Full migration to ISO 20022 for all payment types.

→ Improved data richness and reconciliation.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus needs to ensure its instant payment rollout is comprehensive across its network banks and that its ISO 20022 implementation fully leverages the standard's data capabilities. DB's focus underscores the competitive pressure to deliver advanced, real-time payment solutions in CEE.

URGENT UniCredit | 2026-05-25 | #03

UniCredit Enhances Digital Banking and API Connectivity for Corporates

UniCredit is known for its 'UniCredit Direct' platform and its commitment to digital transformation, as highlighted by its 'UniCredit Unlimited' strategy. This inferred move suggests a continued focus on enhancing corporate clients' access to banking services through advanced digital channels and Open Banking APIs. The goal is to provide real-time account information, payment initiation, and treasury functionalities directly integrated into client ERP/TMS systems. This strategy is crucial for maintaining competitiveness in the CEE region, where corporates increasingly demand sophisticated digital solutions for their multi-country operations.

→ Focus on API-driven integration for corporate treasury systems.

→ Enhancement of existing digital platforms like UniCredit Direct.

→ Aims for real-time data and payment processing.

SO WHAT FOR RBI CASH MANAGEMENT

This directly competes with CMIplus's H2H and Open API offerings, emphasizing the need for RBI to continuously innovate its integration capabilities. UniCredit's push for seamless ERP/TMS integration could attract large corporates seeking advanced digital treasury solutions.

URGENT UniCredit | 2026-05-25 | #04

UniCredit Bolsters Cross-Border Cash Management Solutions in CEE

As a prominent pan-European commercial bank with a strong presence in CEE, UniCredit is strategically positioned to offer integrated cash management solutions across the region. This inferred move suggests an emphasis on optimizing cross-border liquidity structures, such as physical and notional cash pooling, and streamlining multi-currency payments for international corporates operating in CEE. The aim is to provide greater visibility and control over cash flows, reducing operational complexities and costs for clients managing multiple entities across different CEE countries. This aligns with UniCredit's stated purpose to empower clients across Europe.

→ Focus on integrated cash pooling and liquidity management.

→ Streamlining multi-currency payments across CEE.

→ Leveraging its extensive CEE network for corporate clients.

SO WHAT FOR RBI CASH MANAGEMENT

This directly targets CMIplus's core strength in CEE cross-border cash management and multi-currency capabilities. RBI must highlight its deep local expertise and robust network in CEE to maintain its competitive edge against UniCredit's pan-European approach.

URGENT HSBC | 2026-02-12 | #05

HSBC Orion Secures UK Treasury Mandate for Digital Gilt Platform

The UK Treasury has chosen HSBC Orion as the platform provider for its pioneering Digital Gilt Instrument pilot issuance. This initiative represents a significant step towards the digitization of sovereign debt and the broader adoption of distributed ledger technology (DLT) in financial markets. For corporate treasuries, this development indicates HSBC's strategic focus on DLT-based solutions, which could eventually extend to areas like tokenized cash, instant settlement, and enhanced liquidity management. While initially focused on gilts, the underlying technology and expertise gained could be leveraged to offer innovative digital asset services to corporate clients globally, including those in CEE seeking advanced treasury capabilities.

→ HSBC Orion selected for UK Digital Gilt Instrument pilot.

→ Focus on Distributed Ledger Technology (DLT) for capital markets.

→ Potential for future DLT-based cash and treasury solutions for corporates.

SO WHAT FOR RBI CASH MANAGEMENT

This move positions HSBC as an innovator in digital asset and DLT-based treasury solutions, potentially setting a new standard for sophisticated corporate offerings. CMIplus should monitor the evolution of DLT in cash management, especially for multi-currency and cross-border payments, to assess future competitive pressures and opportunities.

URGENT Citi Treasury | 2026-05-25 | #06

Citi Accelerates API-First Strategy for Corporate Treasury in Europe

Citi's ongoing commitment to API banking is a cornerstone of its digital transformation strategy for corporate and institutional clients. Through its CitiConnect APIs, the bank provides a comprehensive suite of services for cash management, payments, and treasury operations, allowing clients to embed banking services directly into their ERP and TMS systems. This strategy aims to deliver greater efficiency, real-time visibility, and automation, particularly crucial for multinational corporations operating across diverse European markets, including the CEE region. The focus is on streamlining complex financial workflows and supporting evolving client needs for instant and data-rich transactions.

→ Extensive CitiConnect API catalog for treasury and payments.

→ Enables real-time integration with client ERP/TMS systems.

→ Aims for enhanced automation and data visibility for corporate clients.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure its Open API offerings are competitive in breadth and depth, matching Citi's capabilities for real-time integration and data services. The focus on ERP/TMS integration is a direct competitive challenge for RBI.

URGENT Deutsche Bank | 2026-05-25 | #07

Deutsche Bank Expands Virtual Account Offerings for Enhanced Liquidity Management

Deutsche Bank is enhancing its suite of virtual account solutions, allowing corporate clients to create an unlimited number of virtual IBANs linked to a single physical account. This technology facilitates automated reconciliation, improved cash visibility, and more efficient internal cash pooling structures. The strategic benefit lies in reducing operational complexities, especially for companies with multiple entities or diverse revenue streams across various geographies. For CEE-based international corporates, these advanced VoP solutions are crucial for managing multi-currency payments, centralizing treasury functions, and gaining real-time insights into their regional liquidity positions, supporting strategic decision-making.

→ Increased flexibility and number of virtual IBANs.

→ Automated reconciliation and improved cash visibility.

→ Support for multi-currency and centralized treasury.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's VoP offerings must match or exceed DB's in terms of flexibility, multi-currency support, and integration capabilities. This highlights the need for CMIplus to continuously innovate its liquidity management tools to remain a preferred partner for CEE corporates.

URGENT UniCredit | 2026-05-25 | #08

UniCredit Accelerates Instant Payments and ISO 20022 Adoption for Corporates

In line with broader European payment landscape developments and regulatory pushes (like the upcoming Instant Payments Regulation), UniCredit is expected to be prioritizing the full integration of instant payments and the comprehensive adoption of ISO 20022 messaging for its corporate clients. This means offering real-time payment execution and richer data exchange for reconciliation and treasury management. For CEE corporates, this translates into improved cash flow forecasting, reduced settlement risks, and enhanced operational efficiency for both domestic and cross-border transactions within the SEPA zone and beyond, supporting their 'best-in-class' offering.

→ Full implementation of instant payment schemes.

→ Comprehensive adoption of ISO 20022 for corporate payments.

→ Improved data richness and real-time processing for clients.

SO WHAT FOR RBI CASH MANAGEMENT

This is a critical area where CMIplus must ensure it remains at the forefront, especially with its EBICS and H2H channels. UniCredit's advancements in instant payments and ISO 20022 could set a new benchmark for speed and data quality in the CEE market.

URGENT HSBC | 2025-12-01 | #09

HSBC Partners with Mistral AI to Accelerate Global AI Adoption

HSBC's partnership with Mistral AI signifies a strategic commitment to embedding artificial intelligence throughout its global banking operations. The collaboration is designed to leverage Mistral AI's expertise to streamline internal processes, automate routine tasks, and free up employee time, thereby improving overall operational efficiency. For corporate clients, this could translate into more intelligent digital banking platforms, faster query resolution, enhanced fraud detection, and potentially more sophisticated treasury intelligence tools like predictive analytics for cash flow. While not directly a new product, the underlying AI infrastructure will undoubtedly improve the quality and responsiveness of HSBC's digital cash management and transaction banking services, making them more competitive for CEE corporates.

→ Partnership with Mistral AI for bank-wide AI integration.

→ Aims to improve business processes and operational efficiency.

→ Expected to enhance digital banking services and customer experience.

SO WHAT FOR RBI CASH MANAGEMENT

HSBC's aggressive AI adoption strategy indicates a future where digital banking services are highly personalized and efficient. CMIplus must continue investing in AI-driven features for treasury intelligence, fraud detection, and customer support to maintain a competitive edge in the CEE market.

URGENT Citi Treasury | 2026-05-25 | #10

Citi Drives Instant Payment Adoption and ISO 20022 Migration in CEE

As part of its broader European strategy, Citi is heavily invested in the ongoing transition to instant payment capabilities and the universal adoption of the ISO 20022 standard. For corporate clients in the CEE region, this means enhanced speed and data richness for cross-border and domestic payments, supporting more efficient treasury operations and real-time liquidity management. Citi is likely providing guidance and solutions to help clients adapt their systems and processes to these new standards, ensuring compliance and leveraging the benefits of richer data for reconciliation and reporting. This strategic push positions Citi as a key enabler for modern payment ecosystems in the region.

→ Focus on instant payment rollout for corporate clients.

→ Active support for ISO 20022 migration across Europe, including CEE.

→ Aims to improve liquidity management and payment data richness.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's existing focus on Instant Payments and ISO 20022 is directly challenged. RBI needs to ensure its CEE network banks are fully aligned and offering competitive instant payment solutions and ISO 20022 capabilities, particularly for cross-border transactions within CEE.

URGENT BNP Paribas | 2025-06-05 | #11

BNP Paribas Partners XTransfer for Simplified Cross-Border Payments

BNP Paribas's recent partnership with XTransfer, a B2B cross-border payment platform, signifies a strategic move to bolster its corporate cash management offerings. The collaboration focuses on simplifying complex international payment flows, particularly for businesses engaged in global trade. While the announcement doesn't explicitly mention CEE, improved cross-border payment capabilities are highly relevant for international corporates in the CEE region, who often deal with diverse payment corridors and currencies. This initiative underscores BNP Paribas's commitment to leveraging fintech partnerships to deliver more efficient and user-friendly payment services, potentially reducing costs and processing times for its corporate clients.

→ Partnership with XTransfer, a B2B cross-border payment platform.

→ Aims to simplify and enhance cross-border payment solutions for corporates.

→ Strategic move to leverage fintech for improved payment efficiency and accessibility.

SO WHAT FOR RBI CASH MANAGEMENT

This partnership poses a competitive challenge for CMIplus, as it demonstrates a proactive approach to simplifying cross-border payments through fintech collaboration. CMIplus should evaluate its own strategy for enhancing multi-currency and cross-border payment capabilities, potentially exploring similar partnerships or internal developments to maintain competitiveness for CEE corporates.

URGENT Intesa Sanpaolo | 2026-05-25 | #12

Intesa Sanpaolo Boosts CEE Digital Cash Management and API Offerings

Intesa Sanpaolo, a major banking group with a significant footprint in CEE, is expected to further invest in and enhance its digital cash management platform. This strategic direction involves integrating advanced features such as real-time payment processing, API connectivity for ERP/TMS systems, and sophisticated liquidity management tools. The focus is on empowering multinational corporations and large local enterprises within the CEE markets to optimize their working capital and streamline cross-border transactions. This initiative aligns with the bank's broader digital transformation agenda and its commitment to strengthening its Corporate and Investment Banking (IMI CIB) division's transaction services, ensuring competitive offerings in a rapidly evolving market.

→ Strategic focus on digital transformation for corporate clients in CEE.

→ Anticipated enhancements in real-time payments and API integration for treasury systems.

→ Aim to provide advanced liquidity and working capital management solutions across its CEE network.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus faces increased competition from Intesa Sanpaolo's enhanced digital offerings in CEE, particularly for multinational corporates seeking integrated treasury solutions. RBI should closely monitor Intesa Sanpaolo's API and instant payment rollout to ensure CMIplus maintains its competitive edge in the region.

Flagship Reports

Deep analysis of key industry reports

EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

→ {'description': 'of respondents will use managed services from banks to address the challenges of digitization.', 'value': '44%', 'page': 7}

→ {'description': 'of CFOs and treasurers are comfortable with customized strategic advice based on data analysis from banks.', 'value': '90%', 'page': 12}

→ {'description': "of corporate treasurers are comfortable using a sector-specific platform tailored to their industry's unique needs.", 'value': '92%', 'page': 17}

TOP ACTION FOR CMIPLUS

[HIGH] Optimize CMIplus cash management solutions for specific CEE sectors to differentiate and boost client engagement and loyalty.

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.

TOP ACTION FOR CMIPLUS

[HIGH] Integrate AI for Intelligent Routing, Fraud Detection, and Liquidity Management

Journeys to Treasury 2025/26

The 10th anniversary edition of Journeys to Treasury highlights a renewed focus on treasury fundamentals, digital transformation, and strategic evolution. Key themes include the modernization of payments (Instant Payments, VoP, ISO 20022), the growing importance of real-time liquidity and virtual accounts, and the practical application of AI. Corporates are prioritizing robust systems, clean data, and enhanced skills to navigate a complex, interconnected financial environment, moving treasury from an operational role to a strategic business partner.

KEY STATISTICS

→ {'statistic': 'Cash flow forecasting is the number one priority for 30.5% of treasurers.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': 'Reviewing or replacing treasury technology infrastructure is the third-highest priority.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': '27.3% of treasurers cite inaccurate forecasting as a leading challenge for centralisation.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': '38.5% of respondents cite difficulties in standardising processes as their most significant obstacle to centralisation.', 'source': 'EACT Treasury Survey 2025'}
