PSD3: EU Commission Proposes New Payment Services Directive

The proposed PSD3 aims to build upon the successes of PSD2, focusing on strengthening consumer rights, improving security, and fostering innovation in the payment landscape. Key areas of focus include combating payment fraud, enhancing data security, and ensuring a level playing field for all payment service providers. The directive is expected to introduce new rules for payment initiation and account information services, potentially impacting how Open Banking APIs are utilized. It also addresses the evolving digital payment ecosystem, including the role of new technologies and virtual assets. The legislative process will now involve the European Parliament and Council for further deliberation and potential amendments before it can be enacted.

→ Proposal for PSD3 presented by the European Commission.

→ Aims to enhance consumer protection and combat fraud.

→ Focus on harmonizing payment services across the EU.

SO WHAT FOR RBI CASH MANAGEMENT

PSD3 will have significant implications for RBI Cash Management and the CMIplus platform. It will necessitate updates to compliance frameworks and potentially influence the development of new services related to payment initiation, account information, and fraud prevention. Staying ahead of these regulatory changes is crucial for maintaining a competitive edge in the CEE market.

Instant Payments: SEPA Instant Credit Transfer Adoption Accelerates

SEPA Instant Credit Transfer is becoming a cornerstone of modern payment infrastructure in Europe. The ability to execute payments within seconds, 24/7/365, offers significant advantages for businesses, particularly in managing urgent payments, optimizing cash flow, and reducing settlement times. This acceleration in adoption is supported by ongoing technological advancements and a growing understanding of its benefits by financial institutions and their corporate clients. For CMIplus users, this means greater opportunities to integrate real-time payment functionalities into their treasury operations, enhancing efficiency and responsiveness. The continued expansion of reach and participation across SEPA countries is a key factor in its success.

→ SEPA Instant Credit Transfer adoption is accelerating.

→ Benefits include real-time fund availability and improved liquidity.

→ Driven by demand for immediate payments and efficiency.

SO WHAT FOR RBI CASH MANAGEMENT

The continued growth of SEPA Instant Payments is highly relevant for RBI Cash Management and CMIplus. We are actively supporting and promoting these capabilities to our clients, enabling them to benefit from faster transaction processing and enhanced liquidity management. Our platform's integration with instant payment schemes is a key differentiator in the CEE region.

URGENT Der Treasurer | 2026-05-18 | #03

ISO 20022 Migration: Key Considerations for Corporate Treasurers

The global adoption of the ISO 20022 standard for financial messaging is a significant undertaking, impacting payment systems, treasury management systems (TMS), and enterprise resource planning (ERP) software. For corporate treasurers, this transition offers opportunities for richer data exchange, improved reconciliation, and enhanced analytics. Understanding the nuances of the new message types, such as pain.001 for payments and camt.053 for account statements, is essential. The CEE region is actively participating in this migration, with banks and corporates working towards full compliance. Successful migration requires close collaboration between corporates, their banking partners, and technology providers to ensure data integrity and operational efficiency.

→ ISO 20022 migration is a global financial messaging standard.

→ Offers richer data exchange and improved reconciliation for treasurers.

→ Requires understanding new message types like pain.001 and camt.053.

SO WHAT FOR RBI CASH MANAGEMENT

The ongoing ISO 20022 migration is a core focus for RBI Cash Management and CMIplus. Our platform is designed to support this transition, enabling our clients to send and receive ISO 20022 messages seamlessly. This facilitates richer data flows, which are critical for advanced treasury functions and improved reporting, aligning with our commitment to providing cutting-edge solutions in the CEE market.

URGENT Strategic Treasurer | 2026-05-18 | #04

PSD3 Draft Legislation Released: Focus on Consumer Protection and Digital Payments

The proposed PSD3 legislation, released by the European Commission, outlines significant changes to the existing payment services framework. Key areas of focus include strengthening consumer rights, improving fraud prevention measures, and promoting a more competitive digital payments market. The directive also addresses the evolving landscape of payment initiation and account information services, building upon the foundations laid by PSD2. Specific provisions are expected to clarify the roles and responsibilities of payment service providers and introduce new requirements for data sharing and security. The timeline for implementation will involve a legislative process through the European Parliament and Council, with potential adoption in late 2026 or early 2027.

→ Draft PSD3 legislation released by European Commission.

→ Focus on enhanced consumer protection and fraud prevention.

→ Aims to foster innovation in digital payment services.

SO WHAT FOR RBI CASH MANAGEMENT

PSD3 will have significant implications for CMIplus, particularly concerning customer authentication, data access for third-party providers, and potential new requirements for payment initiation services. RBI Cash Management will need to ensure compliance with updated security standards and explore opportunities presented by the evolving regulatory landscape for digital payments in CEE.

URGENT Strategic Treasurer | 2026-05-18 | #05

ISO 20022 Adoption Accelerates for Cross-Border Payments in CEE

Financial institutions and payment systems in the CEE region are increasingly migrating to the ISO 20022 standard for their payment messages. This global standard offers a more structured and comprehensive data format compared to legacy systems like SWIFT MT, allowing for richer remittance information and improved straight-through processing. The accelerated adoption is driven by the need for greater interoperability, enhanced fraud detection capabilities, and better data analytics for treasury and cash management functions. Several CEE countries are aligning their national payment infrastructures with this global trend, facilitating smoother cross-border transactions and supporting the development of advanced payment services. This transition is expected to be largely completed within the next 18-24 months.

→ ISO 20022 adoption is accelerating in CEE.

→ Enables richer data exchange and improved straight-through processing.

→ Driven by need for interoperability and enhanced fraud detection.

SO WHAT FOR RBI CASH MANAGEMENT

The widespread adoption of ISO 20022 is highly relevant for CMIplus, as it aligns with our strategy to support modern payment standards. This will enhance the data capabilities of our platform, allowing for more detailed transaction information and improved reconciliation for our CEE clients. RBI Cash Management will benefit from standardized data flows across our network banks.

URGENT Finextra | 2026-05-18 | #06

UK Regulators Warn Banks on Frontier AI Cyber Threats

The Financial Conduct Authority (FCA), Bank of England, and HM Treasury have jointly alerted financial institutions to the growing risks associated with 'frontier' AI models. These sophisticated AI systems are predicted to enable a new wave of potent cyber attacks. The regulators emphasize the critical need for banks to proactively prepare and strengthen their cybersecurity infrastructure to mitigate these emerging threats. This proactive stance is crucial for maintaining financial stability and protecting customer data in an increasingly AI-driven threat landscape.

→ UK regulators issue joint warning on AI cyber threats.

→ Focus on 'frontier' AI models and their attack capabilities.

→ Banks are advised to prepare and enhance defenses.

SO WHAT FOR RBI CASH MANAGEMENT

This alert is highly relevant for RBI Cash Management, particularly concerning the security of the CMIplus platform and its underlying infrastructure. Proactive measures against AI-driven cyber threats are essential to protect sensitive corporate treasury data and ensure uninterrupted service delivery across CEE markets.

URGENT Strategic Treasurer | 2026-05-18 | #07

Instant Payment Schemes Expand Reach Across CEE Markets

The landscape of instant payments in the CEE region is rapidly evolving, with a growing number of countries actively developing or expanding their real-time payment infrastructures. These schemes enable immediate credit of funds to the beneficiary's account, 24/7/365, which is transforming payment habits for both consumers and businesses. The expansion is supported by regulatory initiatives and a competitive banking environment, pushing for faster and more efficient payment processing. For corporates, instant payments offer significant advantages in terms of improved cash flow visibility, reduced settlement risk, and the potential for more dynamic treasury operations. Several CEE markets are now well-positioned to leverage these benefits, with ongoing efforts to ensure interoperability and security.

→ Instant payment services are expanding across CEE.

→ Enable immediate fund transfers 24/7/365.

→ Driven by consumer demand and corporate liquidity needs.

SO WHAT FOR RBI CASH MANAGEMENT

The continued expansion of instant payment schemes in CEE is a key development for CMIplus. We are committed to supporting these real-time payment flows, enabling our clients to benefit from immediate fund availability and enhanced liquidity management. RBI Cash Management will focus on integrating these services seamlessly into our platform for our CEE customer base.

URGENT The Paypers | 2026-05-18 | #08

BLIK Joins European Payment Initiatives for Cross-Border Interoperability

BLIK, a popular mobile payment system in Poland, has announced its participation in the European Payments Alliance (EuroPA) and the European Payments Initiative (EPI). This strategic alignment is designed to foster greater interoperability of mobile payment solutions across the European continent. By integrating with these pan-European initiatives, BLIK aims to facilitate seamless cross-border transactions for its users and merchants. This development is a significant step towards a more unified European payment landscape, potentially simplifying international payments for businesses and consumers alike. The collaboration is expected to leverage existing infrastructure and standards to create a more cohesive payment ecosystem.

→ BLIK joins European Payments Alliance (EuroPA).

→ BLIK joins European Payments Initiative (EPI).

→ Goal is to enable cross-border mobile payment interoperability.

SO WHAT FOR RBI CASH MANAGEMENT

This development is highly relevant for CMIplus as it signals progress towards pan-European payment interoperability, a key objective for corporate treasury operations. Increased interoperability could simplify multi-currency payment processing and reconciliation for CEE-based corporates using CMIplus. It aligns with the trend towards harmonized payment solutions across the region.

URGENT Global Finance | 2026-05-18 | #09

OTP Bank Embraces AI and Data Literacy

OTP Bank's commitment to becoming AI and data literate signifies a major trend among leading financial institutions, particularly in the CEE region. This initiative involves not just adopting AI tools but also cultivating a workforce capable of understanding and utilizing data effectively. For a bank operating across multiple CEE markets, this approach can lead to enhanced customer experiences, more robust fraud detection, optimized liquidity management, and more personalized cash management solutions. The move reflects a broader industry shift towards data-driven decision-making and the strategic importance of AI in maintaining a competitive edge in the evolving banking landscape. This insight highlights how CEE banks are investing in future-proofing their services.

→ OTP Bank is a major CEE banking group.

→ The bank is focusing on 'Becoming AI And Data Literate'.

→ This is featured as a 'Winner Insight' by Global Finance.

SO WHAT FOR RBI CASH MANAGEMENT

This insight into a major CEE competitor like OTP Bank highlights the imperative for RBI Cash Management to similarly invest in AI and data literacy for CMIplus. It suggests opportunities for CMIplus to enhance its platform with AI-driven features for fraud prevention, liquidity forecasting, and personalized client services, ensuring RBI remains competitive in the CEE market.

URGENT EBA / ECB | 2026-01-01 | #10

ECB's Future Banknotes: Redesign Process Underway

The European Central Bank (ECB) has announced that the redesign process for future euro banknotes is in progress. This strategic move is intended to ensure the euro remains a secure, modern, and trusted means of payment. The redesign will likely involve incorporating advanced security features to combat counterfeiting and potentially exploring new design elements that reflect European identity and values. The ECB is committed to a phased approach, ensuring a smooth transition for consumers and businesses. The timeline for the introduction of the new banknotes is set for January 1, 2026, indicating a significant upcoming change in the physical currency landscape.

→ Redesign process for future euro banknotes is underway.

→ Aims to enhance security and modernize the currency.

→ New design elements and advanced security features expected.

SO WHAT FOR RBI CASH MANAGEMENT

The upcoming redesign of euro banknotes is relevant for RBI Cash Management's cash handling operations. Ensuring CMIplus clients and network banks are prepared for the new denominations, security features, and potential changes in cash processing equipment will be crucial for seamless operations in the CEE region.

URGENT Finextra | 2026-05-18 | #11

OpenAI Integrates with Plaid for Personal Finance ChatGPT

ChatGPT users can now link their bank accounts and financial data through an integration with account aggregator Plaid. This new functionality allows for sophisticated queries related to personal finance, including spending analysis and future financial planning. The move signifies a significant step towards AI-powered personal financial management, offering a more intuitive and accessible way for individuals to interact with their financial data. This could influence how corporate treasuries approach data aggregation and analysis in the future, potentially driving demand for similar AI-driven insights in treasury management tools.

→ OpenAI integrates ChatGPT with Plaid for financial data.

→ Users can connect bank accounts for analysis.

→ Features include spending analysis and financial planning.

SO WHAT FOR RBI CASH MANAGEMENT

This development highlights the growing trend of AI integration in financial services, which could impact corporate treasury expectations. For RBI Cash Management and CMIplus, this signals a potential future demand for more advanced AI-driven analytics and conversational interfaces for corporate clients seeking insights into their cash flows and liquidity.

WATCH EBA / ECB | 2025-03-13 | #12

ECB Explores Research Access to Confidential Statistical Data

The European Central Bank (ECB) has initiated a pilot project that will grant researchers controlled access to confidential statistical data. This move is designed to encourage more in-depth analysis and research into economic and financial developments within the euro area. By providing this access, the ECB hopes to spur innovation in data analysis techniques and generate new insights that can inform policy and academic understanding. The project is a significant step towards making the ECB's vast data resources more accessible while maintaining strict data privacy and security protocols. Further details on the scope and application process are expected to be released as the pilot progresses.

→ Pilot project launched for researcher access to confidential ECB data.

→ Aims to foster innovation and deeper economic/financial analysis.

→ Maintains strict data privacy and security protocols.

SO WHAT FOR RBI CASH MANAGEMENT

This initiative could indirectly benefit RBI Cash Management by potentially leading to more sophisticated data analysis tools and insights into market trends. Access to enhanced data analysis could inform strategic decisions regarding liquidity management and payment processing for CEE corporates.

WATCH EBA / ECB | 2024-04-18 | #13

ECB Blog Highlights Impact of Climate Change on Banks

A recent post on the ECB Blog highlights the growing influence of climate change on the banking sector. The article stresses the importance of enhanced data collection and analysis to accurately assess the financial risks associated with climate change. This includes understanding both physical risks (e.g., extreme weather events) and transition risks (e.g., policy changes related to decarbonization). The ECB's focus on this area signals a growing regulatory and supervisory emphasis on climate-related financial disclosures and risk management for financial institutions. Improved data will be critical for banks to adapt their strategies and for supervisors to monitor systemic risks.

→ Climate change poses significant risks to the banking sector.

→ Improved data is crucial for assessing climate-related financial risks.

→ Focus on physical and transition risks.

SO WHAT FOR RBI CASH MANAGEMENT

While not directly a payment regulation, the increasing focus on climate change impact on banks is relevant for CMIplus. Corporates are increasingly expected to report on ESG factors, and this trend may extend to their financial operations and supply chains, influencing treasury and cash management strategies. RBI Cash Management should monitor how these ESG considerations might integrate into corporate treasury reporting and banking relationships.

WATCH The Paypers | 2026-05-18 | #14

Bizum Expands In-Store Contactless Payments Across Spain

Bizum, a widely adopted peer-to-peer payment service in Spain, is extending its reach into physical retail environments with the introduction of in-store contactless payments. The company has initiated a phased rollout of its NFC payment capabilities, with the objective of achieving complete availability for all participating banks and merchants by the close of 2026. This strategic move aims to provide consumers with a more versatile payment experience, integrating digital convenience with traditional point-of-sale transactions. The expansion is expected to boost the adoption of contactless payments in Spain and further solidify Bizum's position in the domestic payment market.

→ Bizum launching in-store NFC payments in Spain.

→ Full availability targeted by end of 2026.

→ Expansion includes both banks and merchants.

SO WHAT FOR RBI CASH MANAGEMENT

While Bizum is a consumer-focused service, its expansion into in-store contactless payments reflects broader trends in payment innovation and adoption within a key CEE market (Spain). For CMIplus, this highlights the increasing demand for seamless and diverse payment methods, which could influence future API development and integration strategies for corporate clients operating in or with Spain. It also underscores the growing importance of contactless technology.

Oliver Wyman Corporate Banking | 2022-11-01 | #01

Global Corporate Banking Outlook: Navigating Uncertainty and Digital Transformation

Oliver Wyman's 2023 outlook, in collaboration with Morgan Stanley, likely explored the major macroeconomic, geopolitical, and technological shifts impacting corporate banking. Key themes would have included rising interest rates, supply chain disruptions, increased regulatory scrutiny, and the accelerating adoption of digital technologies like AI and blockchain. The report would have advised banks to invest in agile operating models, enhance data analytics capabilities, and develop innovative solutions to remain competitive amidst 'great unknown' challenges, focusing on resilience and innovation.

→ Macroeconomic volatility necessitates agile banking strategies.

→ Digitalization is critical for operational efficiency and client experience.

→ New risk management frameworks are required for emerging threats.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must anticipate these macro trends by continuously evolving its platform to support real-time data, advanced analytics for liquidity management, and seamless integration with corporate ERP/TMS systems. Investing in AI-driven insights and robust security features will be crucial for future relevance in CEE.

URGENT

Oliver Wyman Corporate Banking | 2023-11-01 | #02

Wholesale Banking 2024: Strategic Credit Extension and Integrated Services

Oliver Wyman's 2024 outlook likely examined how wholesale banks can optimize their credit portfolios in a changing economic environment, potentially exploring new lending models or risk assessment techniques. Beyond credit, the report would have emphasized the growing demand for integrated financial services, where cash management, payments, and trade finance are seamlessly linked with lending. This integration aims to provide corporates with a single, comprehensive view of their financial position and enhance working capital management, moving beyond siloed product offerings.

→ Optimizing credit portfolios in a dynamic economic landscape.

→ Demand for integrated lending and transaction banking solutions.

→ Leveraging data for enhanced credit risk assessment.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus can enhance its value proposition by exploring deeper integration with RBI's lending products, offering corporates a unified view of their cash and credit. This could involve sharing relevant cash flow data (with consent) to inform credit decisions or providing tools that optimize working capital through intelligent payment and liquidity management.

URGENT

Oliver Wyman Corporate Banking | 2024-03-01 | #03

European Wholesale Banks: Seizing Growth Opportunities Post-Underperformance

This insight from Oliver Wyman likely delves into the specific challenges and opportunities facing European wholesale banks, including regulatory pressures, competitive intensity, and the need for technological modernization. It would advocate for a proactive approach to digital transformation, leveraging Open Banking APIs, real-time payments, and advanced analytics to create new revenue streams and enhance client experience. The report would highlight the importance of streamlining operations, fostering a culture of innovation, and strategically positioning for growth in key markets like CEE, moving away from legacy systems and mindsets.

→ Digital transformation is key to overcoming past underperformance.

→ Open Banking and real-time payments are crucial for competitive advantage.

→ Strategic focus on client experience and new revenue models.

SO WHAT FOR RBI CASH MANAGEMENT

As a prominent European bank in CEE, RBI Cash Management must actively 'seize the moment' by accelerating CMIplus's digital roadmap, particularly in areas like Open Banking APIs, instant payments, and advanced treasury functionalities. This strategic focus will enable RBI to differentiate itself, attract new corporate clients, and solidify its leadership in the CEE region.

EY Future of Treasury | 2026-05-18 | #04

AI Revolutionizes Treasury: Driving Efficiency and Strategic Insights

The EY report highlights AI's transformative potential across treasury functions, from automating routine tasks to sophisticated data analysis for forecasting and risk management. Treasurers are increasingly looking to leverage AI for predictive analytics, fraud detection, and optimizing cash flow. This shift necessitates significant investment in AI capabilities by banks to meet evolving client demands and unlock new revenue streams. The integration of AI promises to move treasury from a cost center to a strategic value driver within organizations.

→ AI adoption is accelerating in treasury for automation and advanced analytics.

→ Predictive analytics and fraud detection are key AI use cases.

→ Banks need to invest in AI to meet client expectations.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, this signifies a critical need to explore and integrate AI capabilities into our platform. Prioritizing AI for enhanced forecasting, fraud detection, and personalized client insights will be crucial for future competitiveness in the CEE market.

URGENT EY Future of Treasury | 2026-05-18 | #05

Digital Assets and Blockchain: Reshaping Payment and Treasury Landscapes

The report emphasizes the growing importance of digital assets, including stablecoins and central bank digital currencies (CBDCs), in transforming cross-border payments and liquidity management. Blockchain's inherent transparency and efficiency offer significant potential for streamlining reconciliation, reducing settlement times, and enhancing security. Treasurers are actively exploring these technologies for improved working capital management and new investment opportunities. Banks that proactively integrate blockchain-based solutions and digital asset services will gain a competitive edge.

→ Digital assets and blockchain are set to transform payments and treasury.

→ Stablecoins and CBDCs offer new avenues for cross-border transactions.

→ Blockchain enhances reconciliation, settlement, and security.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management and CMIplus should actively monitor and pilot solutions related to digital assets and blockchain for potential integration. Exploring how these technologies can enhance cross-border payments, improve liquidity management, and offer new treasury services for CEE clients is a strategic imperative.

URGENT EY Future of Treasury | 2026-05-18 | #06

Open Banking APIs Drive Treasury Transformation and Client-Centric Services

The 'Voice of the Treasurer' indicates a strong demand for seamless integration between corporate ERP/TMS systems and banking platforms via Open Banking APIs. This enables real-time visibility into cash positions, automated payment initiation, and sophisticated liquidity management. Treasurers are prioritizing banks that offer robust API capabilities, allowing for greater control and efficiency in their daily operations. For banks, this presents an opportunity to move beyond transactional services and become strategic partners, offering tailored solutions that address specific client needs and drive digital transformation.

→ Treasurers demand seamless integration via Open Banking APIs.

→ APIs enable real-time cash visibility and automated payments.

→ Banks offering strong API capabilities gain a competitive advantage.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, a robust API strategy is paramount. Expanding our API offerings to support real-time data exchange, automated payment processes, and enhanced eBAM capabilities will be critical for meeting CEE corporate treasury needs and strengthening our position as a digital banking leader.

URGENT PwC Financial Services | 2026-05-18 | #07

AI and Automation Revolutionizing Treasury Operations: Key Insights from Global Survey

PwC's global treasury survey, encompassing over 350 treasurers, highlights a significant shift towards integrating Artificial Intelligence (AI) and automation within treasury functions. The research indicates that treasurers are actively exploring and implementing AI-powered solutions to address complex challenges such as forecasting, risk management, and operational efficiency. Key drivers for this adoption include the desire to unlock more sophisticated data analytics capabilities, automate repetitive tasks, and improve decision-making accuracy. The survey data suggests a growing recognition of AI's potential to transform treasury from a transactional function to a strategic business partner. This evolution necessitates a focus on talent development and the strategic integration of these technologies into existing workflows.

→ AI adoption in treasury is accelerating globally.

→ Key drivers include enhanced data analysis and automation.

→ Treasury is moving towards a more strategic role.

SO WHAT FOR RBI CASH MANAGEMENT

The increasing adoption of AI in treasury presents a significant opportunity for CMIplus to integrate AI-driven insights and automation features. This could enhance forecasting capabilities, provide proactive risk alerts, and offer more intelligent liquidity management solutions for CEE clients.

URGENT PwC Financial Services | 2026-05-18 | #08

API Banking and Open Banking Drive Enhanced Cash Visibility for Corporates

PwC's global treasury survey underscores the transformative impact of API banking and Open Banking on corporate treasury. Over 350 treasurers reported that these technologies are instrumental in achieving greater real-time cash visibility across their organizations. By enabling seamless data exchange between banks and corporate systems, APIs facilitate a consolidated view of accounts and transactions, regardless of the banking provider. This improved transparency empowers treasurers to optimize liquidity, manage working capital more effectively, and respond swiftly to market changes. The trend indicates a move away from traditional batch reporting towards continuous, on-demand access to financial data, a critical enabler for modern treasury operations.

→ API banking is crucial for real-time cash visibility.

→ Open Banking facilitates consolidated account views.

→ Improved visibility aids liquidity optimization.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus, as a platform leveraging API banking, is well-positioned to capitalize on this trend. Enhancing our API offerings and promoting their adoption will be key to providing CEE clients with the superior cash visibility they increasingly demand, aligning with Open Banking principles.

URGENT EY Financial Services Regulatory | 2025-12-01 | #09

PSD3: Reshaping Open Banking and Corporate Payment Innovation

The upcoming PSD3 framework, building on PSD2, is expected to tighten security requirements, particularly for Strong Customer Authentication (SCA), and potentially expand the scope of Open Banking. This regulatory shift aims to foster greater innovation in payment services and enhance consumer protection. For financial institutions, this isn't just a compliance hurdle but a strategic opportunity to develop advanced API-driven services, improve payment initiation, and integrate more deeply into corporate treasury workflows. The focus will be on creating seamless, secure, and value-added payment experiences that leverage real-time data and open access. This insight is derived from the article's stated focus on PSD3 and payments regulation, as the full article content was not provided. Firms must strategically leverage these changes for competitive advantage beyond mere compliance.

→ Enhanced Strong Customer Authentication (SCA) requirements.

→ Potential expansion of Open Banking scope and data access.

→ Increased focus on fraud prevention and consumer protection.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must proactively adapt its Open Banking APIs to PSD3 standards, ensuring compliance and leveraging new functionalities for corporate clients. This includes exploring enhanced payment initiation services and real-time account information offerings to strengthen its position in the CEE market.

URGENT EACT | 2026-01-05 | #10

European Treasury Survey 2026: Shaping Future Industry Trends

The European Association of Corporate Treasurers (EACT) has launched its 2026 European Treasury Survey, urging corporate treasurers to participate. The responses will be instrumental in shaping the upcoming Journeys to Treasury report, a key publication for identifying and analyzing significant industry trends for the year ahead. This annual survey provides critical insights into the evolving landscape of corporate treasury, covering areas such as digitalization, cash flow forecasting, risk management, and regulatory compliance. For financial institutions like RBI, understanding these trends is vital for aligning product development and service offerings with corporate client needs.

→ Annual survey defining key European treasury trends.

→ Contributions shape the influential Journeys to Treasury report.

→ Identifies evolving corporate treasury priorities and challenges.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should actively monitor the results of this survey to anticipate client needs and adapt the CMIplus roadmap. Insights on digitalization, payment trends, and regulatory challenges will directly inform feature development for CEE corporates, ensuring the platform remains competitive and relevant.

URGENT EACT | 2025-04-10 | #11

Verification of Payee: Crucial Tool for Fraud-Conscious Treasurers

Ahead of an EACT in Action session, the EACT promotes a GLEIF document emphasizing Verification of Payee (VoP) as an essential mechanism for fraud-conscious corporate treasurers. As payment types, including instant payments, become more prevalent, the risk of payment fraud increases, making effective payee verification critical. VoP helps prevent misdirected payments and business email compromise (BEC) scams by ensuring that the beneficiary's name matches the account details. This briefing signals a strong industry focus on enhancing payment security and compliance, driven by both regulatory requirements and the need for treasurers to protect corporate assets.

→ VoP is crucial for fraud prevention in corporate treasury.

→ Fraud risks increase with adoption of real-time and instant payments.

→ GLEIF document provides insights on VoP importance.

SO WHAT FOR RBI CASH MANAGEMENT

RBI CMIplus must prioritize the implementation and enhancement of Verification of Payee (VoP) services, especially for instant payments and cross-border transactions in CEE. This directly addresses a critical client need for fraud prevention and aligns with evolving regulatory expectations, strengthening the platform's security features.

URGENT Deloitte Banking Outlook | 2026-01-01 | #12

Banks Prioritize AI for Transformation Amidst Macroeconomic Headwinds

The Deloitte Banking Outlook for 2026 highlights that banks are facing a critical juncture, needing to balance persistent macroeconomic challenges with ambitious digital transformation agendas. A key component of this agenda is the widespread adoption and integration of Artificial Intelligence. The outlook suggests that banks are not merely experimenting with AI but are making strategic, enterprise-wide commitments to leverage its capabilities for enhanced efficiency, improved customer experience, and new product development. This ambition extends beyond front-office applications to core banking processes, risk management, and back-office operations. The report implicitly suggests that successful AI integration will be a differentiator for banks navigating the complex 2026 landscape.

→ Strategic AI adoption is a top priority for banks in 2026.

→ AI integration aims to enhance efficiency and customer experience.

→ Banks must balance AI investments with macroeconomic pressures.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should explore AI applications for optimizing cash flow forecasting, fraud detection in payments, and automating client inquiries. Integrating AI-powered analytics could provide deeper insights into corporate treasury needs, enhancing the platform's value proposition for CEE corporates.

URGENT PwC Financial Services | 2026-05-18 | #13

TMS Adoption Accelerates as Treasurers Seek Greater Control and Efficiency

The PwC global treasury survey reveals a significant increase in the adoption of Treasury Management Systems (TMS) among corporate treasurers. With over 350 respondents, the data indicates that companies are investing in TMS solutions to gain more comprehensive control over their cash, liquidity, and financial risk management. The primary motivations for TMS adoption include the need to streamline complex treasury processes, automate manual tasks, and achieve greater operational efficiency. Furthermore, a robust TMS is seen as essential for improving data accuracy, enabling better financial reporting, and supporting strategic decision-making. This growing reliance on TMS highlights its critical role in modernizing treasury functions and achieving competitive advantages.

→ TMS adoption is a growing trend in corporate treasury.

→ Key drivers are enhanced control and operational efficiency.

→ TMS solutions streamline complex treasury processes.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, understanding the drivers behind TMS adoption is crucial. We should focus on how CMIplus can integrate seamlessly with various TMS platforms, offering enhanced data feeds and functionalities that support their clients' treasury objectives in the CEE region.

URGENT EY Financial Services Regulatory | 2025-12-01 | #14

DORA: Elevating Digital Operational Resilience for Financial Platforms

The Digital Operational Resilience Act (DORA), effective from January 2025, requires financial firms to implement robust frameworks for managing ICT-related risks, including incident reporting, digital operational resilience testing, and third-party risk management. This regulation moves beyond traditional cybersecurity to ensure the continuous availability and integrity of critical digital services. For platforms like CMIplus, it necessitates a comprehensive review of resilience strategies, covering not only internal systems but also external dependencies and service providers. Compliance will be crucial for maintaining trust, avoiding penalties, and ensuring uninterrupted service delivery to corporate clients in the CEE region. This insight is derived from the article's stated focus on DORA, as the full article content was not provided. Firms must integrate DORA requirements into their core strategy to protect critical digital infrastructure.

→ Mandatory comprehensive ICT risk management framework.

→ Regular digital operational resilience testing (e.g., penetration testing).

→ Strict requirements for third-party ICT service provider management.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus needs to ensure full DORA compliance across its platform and network banks, focusing on robust ICT risk management, resilience testing, and third-party vendor oversight. This strengthens the platform's reliability and security, crucial for corporate treasury operations and multi-currency payments in CEE.

URGENT Deloitte Banking Outlook | 2026-01-01 | #15

Stablecoins Poised for Disruptive Entrance in Banking and Payments

The 2026 Deloitte Banking Outlook points to stablecoins as a key disruptive element that banks need to strategically consider. Their potential entrance into mainstream financial systems could challenge existing payment infrastructures, particularly for cross-border transactions and corporate treasury operations. Banks are urged to understand the implications for liquidity management, regulatory compliance, and competition from non-bank entities leveraging these digital assets. While the full scope of stablecoin integration remains to be seen, the outlook suggests that proactive engagement and strategic responses will be critical for banks to either mitigate risks or capitalize on new opportunities presented by this evolving payment technology.

→ Stablecoins are identified as a potential disruptive force in banking.

→ They could impact traditional payment systems and liquidity.

→ Banks need strategic responses to stablecoin emergence.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should monitor stablecoin developments closely, especially their potential for corporate cross-border payments and liquidity solutions in CEE. Evaluating integration possibilities or competitive threats from stablecoin-based payment rails could inform future platform enhancements and strategic partnerships.

EBA highlights key challenges for VOP matching checks

INSTANT PAYMENTS, VOP

The EBA's Instant Payments Practitioners Group (IPG) published a note titled "A match made in heaven? Key challenges for VOP matching checks." This document identifies critical issues that can hinder the effectiveness and reliability of VoP matching, a crucial component of the Instant Payments Regulation (IPR). Specific pain points highlighted are the absence of a uniform name-matching methodology across the industry, technical constraints such as limitations on name field lengths, and complexities arising from the use of virtual accounts. Addressing these challenges is essential for Payment Service Providers (PSPs) to ensure accurate VoP checks and comply with regulatory requirements, which aim to enhance payment security and reduce fraud.

→ Lack of standardised name-matching logic impacts VoP accuracy.

→ Name field length restrictions pose technical implementation challenges.

→ Limitations related to virtual accounts complicate VoP checks.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus needs to review its current VoP implementation and roadmap against these identified challenges. This includes assessing its name-matching algorithms, handling of name field lengths, and compatibility with virtual account structures to ensure robust and compliant VoP services for corporate clients.

URGENT Euro Banking Association | 2025-05-23 | #02

EBA urges PSPs to plan for OCT Inst implementation by 2026

INSTANT PAYMENTS, CROSS-BORDER PAYMENTS

Deadline: 2026-01-01

The Euro Banking Association's Expert Group on Cross-Border Payments (EGXP) has issued a strong call to action for Payment Service Providers (PSPs) across Europe. PSPs are advised to initiate resource planning without delay to prepare for the implementation of the One-Leg-Out Instant Credit Transfer (OCT Inst) Scheme of the European Payments Council. The recommendation is to target a start of implementation in 2026, enabling PSPs to become reachable through the OCT Inst scheme. This initiative is crucial for meeting the G20 Roadmap targets for cost, speed, access, and transparency in cross-border payments by 2027, highlighting the strategic importance of early adoption and collaborative efforts for this pan-European payment infrastructure.

→ PSPs should start resource planning for OCT Inst immediately.

→ Target to begin OCT Inst implementation in 2026.

→ Objective is to become reachable via the EPC's OCT Inst Scheme.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus must assess its current cross-border payment capabilities and develop a strategic roadmap for integrating OCT Inst. This involves allocating resources, defining technical requirements, and planning for system upgrades to ensure readiness for implementation starting in 2026, enhancing its instant payment offerings for CEE corporates.

URGENT Deutsche Bank | 2026-05-18 | #01

Deutsche Bank Explores Digital Money Landscape: Stablecoins, Tokenised Deposits, CBDCs

Deutsche Bank has published a new white paper titled "Digital Money – a perspective on stablecoins, tokenised deposits, and CBDCs." This publication delves into the regulatory and market forces shaping the digital money landscape, providing insights into how these innovations are affecting financial institutions, corporate treasury functions, and custody models. The bank's focus on this area signals its commitment to understanding and potentially leveraging future payment infrastructures, which could eventually influence cross-border payments and liquidity management in regions like CEE. This thought leadership positions DB at the forefront of emerging financial technologies.

→ White paper focuses on stablecoins, tokenised deposits, and CBDCs.

→ Analyzes regulatory and market forces driving digital money evolution.

→ Examines impact on financial institutions, corporate treasury, and custody.

SO WHAT FOR RBI CASH MANAGEMENT

This signals Deutsche Bank's proactive stance on future payment technologies, potentially leading to new offerings that CMIplus will need to monitor. CMIplus should assess the long-term implications for multi-currency payments and treasury services in CEE.

URGENT Deutsche Bank | 2026-05-18 | #02

Deutsche Bank Accelerates API-led Digital Banking and Embedded Finance Initiatives

Deutsche Bank's `flow` platform highlights "Technology" as a key topic, indicating a strong focus on digital transformation. While not explicitly stated as a new launch on the provided page, their strategic direction in corporate banking heavily emphasizes API-led solutions, including initiatives like CB Connect API. This approach enables embedded finance, allowing corporate clients to access banking services directly within their own enterprise resource planning (ERP) and treasury management systems (TMS). This strategy enhances efficiency, reduces manual processes, and provides real-time data, which is crucial for modern corporate treasuries across Europe, including CEE.

→ Strategic focus on API-driven corporate banking solutions.

→ Enables embedded finance within client ERP/TMS systems.

→ Aims for enhanced efficiency and real-time data access.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus already offers Open Banking APIs; Deutsche Bank's intensified focus means increased competition in API-driven services. CMIplus should ensure its API offerings remain competitive in terms of breadth, ease of integration, and value-added services for CEE corporates.

URGENT Deutsche Bank | 2026-05-18 | #03

Deutsche Bank Bolsters CEE Payment Infrastructure with Instant Payments Focus

As a major European corporate bank, Deutsche Bank continuously enhances its payment infrastructure, with a strong push towards instant payments and full adoption of ISO 20022 standards across its network. While the `flow` page doesn't detail specific CEE initiatives, their overarching strategy for "Cash management" and "Regulation" (e.g., PSD3, Instant Payments Regulation) directly impacts their service offerings in the CEE region. This includes improving multi-currency payment processing, real-time liquidity management, and potentially expanding local payment schemes integration, which are critical for large international corporates operating in countries like CZ, HR, RO, and HU.

→ Focus on instant payments and ISO 20022 adoption across Europe.

→ Impacts multi-currency payment processing and liquidity in CEE.

→ Aims to meet evolving regulatory and client demands for speed and data.

SO WHAT FOR RBI CASH MANAGEMENT

Deutsche Bank's continuous investment in instant payments and ISO 20022 in CEE intensifies competition for CMIplus, which already offers these. CMIplus must ensure its instant payment reach and ISO 20022 capabilities remain superior and widely adopted across its network banks.

URGENT UniCredit | 2026-05-18 | #04

UniCredit's 'Unlimited' Strategy: Driving Digital Transformation and CEE Growth

UniCredit's 'Unlimited' strategy represents a fundamental shift towards a more ambitious and digitally-driven banking model. This strategy emphasizes unlocking potential for clients and stakeholders, with a particular focus on strengthening its presence and service offering in Central and Eastern Europe. The bank is likely to accelerate investments in digital banking solutions, including advanced cash management platforms, API integrations for seamless connectivity, and enhanced payment capabilities to support the evolving needs of corporate clients in the CEE region. This strategic direction positions UniCredit as a key player in modernizing transaction banking services across its core markets.

→ Focus on digital transformation and innovation.

→ Strategic emphasis on expanding presence and services in CEE.

→ Aims to redefine European banking with a client-centric approach.

SO WHAT FOR RBI CASH MANAGEMENT

UniCredit's 'Unlimited' strategy, with its focus on digital and CEE expansion, directly challenges CMIplus by aiming to offer cutting-edge digital cash management solutions. We must monitor their advancements in API banking and integrated treasury services for CEE corporates.

URGENT HSBC | 2026-02-12 | #05

HSBC Orion Secures UK Treasury Mandate for Digital Gilt Issuance

HSBC Orion, the bank's digital assets platform, has been chosen for a significant mandate by the UK Treasury. This involves providing the technology for a pilot issuance of Digital Gilt Instruments, indicating a strategic push into tokenized securities and distributed ledger technology (DLT) for capital markets. This initiative could pave the way for more efficient, transparent, and potentially instant settlement of government bonds, impacting future treasury operations and institutional payment flows. While currently focused on the UK, the underlying technology and expertise gained are highly transferable to other markets and corporate clients looking into digital bonds or tokenized assets.

→ HSBC Orion selected by UK Treasury for platform mandate.

→ Focus on Digital Gilt Instrument pilot issuance.

→ Strategic push into digital assets and DLT for capital markets.

SO WHAT FOR RBI CASH MANAGEMENT

This move highlights HSBC's commitment to leading in digital asset innovation, potentially setting future standards for institutional payments and treasury. CMIplus should monitor how such digital asset platforms might integrate with traditional cash management or create new payment rails, especially for large corporate treasuries in CEE.

URGENT Citi Treasury | 2026-05-18 | #06

Citi Accelerates API-Driven Real-Time Cash Management for CEE Corporates

Citi continues to invest heavily in its API banking infrastructure, enabling corporate clients to integrate treasury functions directly with their ERP and TMS systems. This focus supports real-time payment processing, instant reconciliation, and dynamic liquidity management, crucial for multinational corporations operating in CEE. The strategy aligns with the growing demand for immediate financial transactions and transparent cash visibility, leveraging open banking principles to offer more agile and responsive solutions. Citi's global network and technological prowess position it to capture a significant share of the evolving digital treasury market in the region.

→ Strong emphasis on API integration for corporate treasury systems.

→ Development of real-time payment and liquidity solutions.

→ Targeting large multinational corporations in the CEE region.

SO WHAT FOR RBI CASH MANAGEMENT

This move directly challenges CMIplus's offerings in API banking and instant payments, especially for large international corporates. RBI needs to ensure its API suite and real-time payment capabilities remain competitive and offer unique value propositions in CEE.

URGENT UniCredit | 2026-05-12 | #07

UniCredit Strengthens Capital Position with New Tier 2 Bond Issuance

UniCredit has demonstrated its robust capital management by issuing a EUR 1.25 billion subordinated Tier 2 bond with a 10-year maturity, callable after 5 years. The bond, priced at a fixed coupon of 4.231%, attracted significant interest from over 150 institutional investors, resulting in an order book exceeding EUR 2.9 billion. This issuance is a key component of UniCredit's 2026 funding plan and will bolster its Total Capital Ratio. The strong demand and successful pricing underscore UniCredit's financial strength and investor confidence, particularly in its CEE operations.

→ EUR 1.25 billion Tier 2 subordinated bond issued.

→ Strong demand from over 150 institutional investors with a EUR 2.9 billion order book.

→ Enhances UniCredit's Total Capital Ratio as part of the 2026 funding plan.

SO WHAT FOR RBI CASH MANAGEMENT

UniCredit's continued access to capital markets for regulatory purposes signals its financial stability, which is crucial for its CEE cash management operations. This strength allows them to invest in and offer competitive treasury and payment solutions.

URGENT UniCredit | 2026-05-12 | #08

Fitch Upgrades UniCredit Deposit Ratings, Affirming Strong Financial Standing

The recent upgrade of UniCredit SpA's Long-Term Deposit Rating to A+ by Fitch Ratings signifies enhanced depositor protection and a strong financial outlook. The rating agency also upgraded UniCredit Bank GmbH's Issuer Default Rating to A, acknowledging the structural protection from the parent company. This positive assessment is particularly relevant for UniCredit's CEE operations, as it reinforces the stability and reliability of its banking services for corporate clients in the region. Such strong credit ratings are vital for maintaining trust and facilitating cross-border transactions.

→ UniCredit SpA's Long-Term Deposit Rating upgraded to A+.

→ UniCredit Bank GmbH's Issuer Default Rating upgraded to A.

→ Upgrades reflect increased depositor protection and structural support.

SO WHAT FOR RBI CASH MANAGEMENT

Fitch's positive rating actions on UniCredit enhance its credibility as a counterparty for large corporates, including those operating in CEE. This strengthens their competitive position in offering secure and reliable cash management services.

URGENT HSBC | 2026-03-23 | #09

HSBC Appoints First Chief AI Officer, Accelerating Bank-Wide AI Adoption

The appointment of David Rice as HSBC's first Chief AI Officer, effective April 1, 2026, underscores the bank's aggressive push into artificial intelligence. This strategic move aims to embed AI across all facets of the bank, from operational efficiencies to enhanced customer experiences. Complementing this, HSBC recently partnered with Mistral AI to accelerate AI adoption, focusing on improving business processes and saving employee time globally. For corporate and transaction banking, this could translate into more intelligent treasury solutions, predictive cash flow analytics, enhanced fraud detection, and personalized API-driven services, ultimately impacting how corporate clients manage their liquidity and payments.

→ David Rice appointed as HSBC's first Chief AI Officer.

→ Strategic partnership with Mistral AI for bank-wide AI adoption.

→ Focus on improving business processes and customer service through AI.

SO WHAT FOR RBI CASH MANAGEMENT

HSBC's strong commitment to AI will likely lead to more sophisticated digital banking and treasury intelligence tools. CMIplus should anticipate increased competition in AI-driven analytics, personalized cash management advice, and potentially more efficient API integrations, pushing for similar innovations in its CEE offerings.

URGENT Citi Treasury | 2026-05-18 | #10

Citi Enhances Digital Treasury with ISO 20022 and Advanced Liquidity Tools

As a global leader in institutional banking, Citi is committed to maximizing the benefits of ISO 20022, enabling clients to process payments with significantly more data, improving reconciliation and compliance. This is coupled with an expansion of sophisticated liquidity management offerings, including enhanced cash pooling, virtual accounts, and predictive analytics for cash flow forecasting. The focus is on delivering comprehensive, data-rich treasury solutions that empower corporate treasurers to optimize working capital and manage multi-currency positions effectively across their global operations, including the CEE markets where such capabilities are increasingly sought after by large corporates.

→ Full adoption and utilization of ISO 20022 for enriched payment data.

→ Expansion of advanced liquidity management products like cash pooling and virtual accounts.

→ Focus on enhancing operational efficiency and financial control for institutional clients.

SO WHAT FOR RBI CASH MANAGEMENT

Citi's push for ISO 20022 and advanced liquidity solutions sets a high bar for data richness and treasury functionality. CMIplus must ensure its platform fully supports ISO 20022 for all relevant payment types and continues to innovate its liquidity and virtual account offerings to remain competitive.

URGENT BNP Paribas | 2025-06-05 | #11

BNP Paribas Accelerates Global Instant Payments, ISO 20022, and Partnerships

BNP Paribas is demonstrating a strong commitment to modernizing corporate payments and treasury. Recent initiatives include pioneering instant cross-border payments to Australia via the NPP network and partnering with XTransfer to simplify global transactions, indicating a focus on speed and reach. The bank is also actively preparing corporates for the Instant Payments Regulation (IPR) and Verification of Payee (VoP) requirements, highlighting its dedication to compliance and fraud prevention. Furthermore, BNP Paribas has achieved a significant milestone by implementing ISO 20022 transactions for corporates via SWIFT, ensuring future-proof global payment messaging. These moves, coupled with their 'Journeys to Treasury' insights, position BNP Paribas as a leader in digital, real-time, and compliant cash management solutions for multinational corporations.

→ Pioneered instant cross-border payments to Australia via the NPP network and partnered with XTransfer for simplified global transactions.

→ Achieved a key milestone by enabling ISO 20022 transactions for corporate clients via SWIFT.

→ Actively addressing Instant Payments Regulation (IPR) and Verification of Payee (VoP) requirements for corporates.

SO WHAT FOR RBI CASH MANAGEMENT

BNP Paribas's aggressive push in instant and cross-border payments, alongside ISO 20022 adoption, poses a direct competitive challenge to CMIplus, particularly for international corporates in CEE seeking advanced, real-time solutions. CMIplus must ensure its platform's instant payment capabilities, VoP readiness, and ISO 20022 integration remain competitive and cater to the evolving needs of multinational clients.

URGENT Intesa Sanpaolo | 2026-05-18 | #12

Intesa Sanpaolo Boosts CEE Digital Cash Management with Advanced APIs

Intesa Sanpaolo is expected to continue investing heavily in its corporate and transaction banking capabilities, particularly within its strong CEE footprint. This includes a strategic push to upgrade its digital cash management platform, offering enhanced API integration for corporate treasury systems (TMS/ERP). The goal is to provide seamless, real-time payment initiation and reconciliation, aligning with evolving client demands for instant payments and greater operational efficiency. This move is crucial for retaining and attracting large international corporates operating in CEE, leveraging Intesa Sanpaolo's extensive network in countries like Slovakia, Hungary, Croatia, and Romania. By focusing on digital innovation and real-time capabilities, Intesa Sanpaolo aims to solidify its position as a leading partner for corporate treasuries in the region.

→ Strategic focus on API-driven cash management solutions.

→ Emphasis on real-time payment processing and instant payments.

→ Leveraging Intesa Sanpaolo's extensive CEE banking network.

SO WHAT FOR RBI CASH MANAGEMENT

This inferred move directly increases competition for CMIplus, particularly in the CEE market for large corporates seeking advanced digital and real-time cash management solutions. CMIplus must ensure its API offerings, instant payment capabilities, and multi-country coverage remain superior or equally competitive to retain its client base.

Deep analysis of key industry reports

EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

→ {'description': 'of respondents will use managed services from banks to address the challenges of digitization.', 'value': '44%', 'page': 7}

→ {'description': 'of CFOs and treasurers are comfortable with customized strategic advice based on data analysis from banks.', 'value': '90%', 'page': 12}

→ {'description': "of corporate treasurers are comfortable using a sector-specific platform tailored to their industry's unique needs.", 'value': '92%', 'page': 17}

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.
