EU Instant Payments Regulation: Final Countdown for Banks

The EU's Instant Payments Regulation, effective in Q1 2025 for receiving and Q1 2026 for sending, is now in its final implementation phase for many banks. It requires all payment service providers (PSPs) in the EU and EEA to offer instant credit transfers (SCT Inst) 24/7/365, with funds credited within 10 seconds, and at no higher cost than traditional SEPA credit transfers. This regulation also includes a mandatory Verification of Payee (VoP) service to combat fraud. For CEE banks, this means substantial investment in real-time infrastructure, liquidity management, and fraud detection systems to meet the strict deadlines and operational demands. The upcoming PSD3 directive is expected to further reinforce these requirements and expand the scope of instant payments.

→ EU Instant Payments Regulation deadline for sending: Q1 2026.

→ Mandatory 24/7/365 processing for instant credit transfers.

→ Instant payments must be priced no higher than standard SEPA credit transfers.

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is paramount for RBI CMIplus. It necessitates ensuring all network banks in CEE are fully compliant, offering seamless instant payment processing and VoP services. CMIplus must support these capabilities for corporate clients, facilitating real-time liquidity management and fraud prevention across the region.

URGENT Der Treasurer | 2026-04-15 | #02

AI Revolutionizes Corporate Payment Fraud Prevention

Corporate treasuries are facing an escalating threat from payment fraud, including Business Email Compromise (BEC) and invoice fraud. AI-powered solutions are emerging as a critical defense, leveraging machine learning algorithms to analyze vast amounts of transaction data, identify anomalies, and flag suspicious activities in real-time. These systems can learn from past fraud attempts, adapt to new attack vectors, and significantly reduce false positives compared to traditional rule-based systems. The integration of AI with Verification of Payee (VoP) services further strengthens the defense, ensuring that payments are directed to the intended beneficiaries and reducing the risk of misdirection due to social engineering.

→ AI uses machine learning to analyze transaction data for fraud detection.

→ Real-time anomaly detection is a key capability of AI fraud tools.

→ AI helps combat BEC, invoice fraud, and other cybercrime threats.

SO WHAT FOR RBI CASH MANAGEMENT

For CMIplus, integrating advanced AI-driven fraud prevention and VoP capabilities is essential. This ensures RBI can offer state-of-the-art security to its corporate clients, protecting their multi-currency payments across CEE. CMIplus should explore partnerships or internal development to embed these features directly into its platform.

URGENT Der Treasurer | 2026-05-05 | #03

Treasury Systems Embrace Open Banking APIs for Real-Time Data

The evolution of treasury technology is heavily influenced by Open Banking principles and the widespread adoption of APIs. Corporates are demanding real-time access to account information, payment initiation capabilities, and detailed transaction data directly within their TMS or ERP systems. Open Banking APIs facilitate this by providing standardized, secure, and efficient channels for banks to share financial data with authorized third-party providers and corporate systems. This allows treasurers to gain immediate insights into cash positions, optimize liquidity management, and automate reconciliation processes. The move towards API-driven connectivity complements existing standards like EBICS and SWIFT, offering enhanced flexibility and speed, particularly for multi-bank and multi-currency operations across Europe.

→ Open Banking APIs enable real-time access to account and payment data.

→ TMS integration with APIs improves liquidity visibility and control.

→ APIs offer standardized, secure, and efficient data exchange channels.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize its Open Banking API strategy to meet the evolving demands of corporate treasuries. Offering robust API connectivity for account information (AIS) and payment initiation (PIS) will be crucial for seamless integration with client TMS/ERP systems, enhancing CMIplus's value proposition for real-time cash management and multi-currency payments in CEE.

URGENT The Global Treasurer | 2026-06-08 | #04

PSD3: European Commission Proposes New Payment Services Directive

PSD3 is set to replace PSD2 and introduces significant changes to the European payments landscape. Key objectives include strengthening consumer rights, improving fraud prevention, and promoting further digitalization. The directive will likely impact areas such as strong customer authentication (SCA), access to payment accounts, and the regulatory framework for payment institutions. This proposal is a crucial step towards a more integrated and secure European payments market, with a focus on adapting to emerging technologies and business models. The legislative process is expected to be lengthy, with potential implementation dates in the coming years.

→ PSD3 proposal aims to replace PSD2.

→ Focus on enhanced consumer protection and innovation.

→ Strengthens fraud prevention measures.

SO WHAT FOR RBI CASH MANAGEMENT

PSD3 will have a direct impact on CMIplus, influencing the regulatory requirements for payment processing and API access. RBI Cash Management will need to ensure its platform and services align with the new directive's stipulations, particularly concerning security and customer data. This will necessitate updates to authentication protocols and potentially new features to support enhanced consumer rights.

URGENT The Global Treasurer | 2026-06-08 | #05

ISO 20022 Adoption Accelerates Across European Payments

Financial institutions and corporates are increasingly migrating to ISO 20022, a rich, data-rich messaging standard that offers enhanced information exchange capabilities. This transition is crucial for improving payment processing efficiency, enabling richer data for reconciliation, and facilitating advanced analytics. For CEE markets, the adoption of ISO 20022 is a key enabler for modernizing payment infrastructures and aligning with global best practices. The standard's structured data format supports initiatives like instant payments and Open Banking, providing a unified language for financial communication. Continued investment in technology and training is essential for successful implementation.

→ ISO 20022 offers richer data for payments.

→ Improves reconciliation and analytics capabilities.

→ Key enabler for instant payments and Open Banking.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's commitment to ISO 20022 is a strategic advantage, aligning with the evolving needs of CEE corporates. RBI Cash Management can leverage this standard to offer more sophisticated payment solutions, including improved reconciliation and richer data for treasury operations. Ensuring seamless integration with client ERP/TMS systems for ISO 20022 data flows will be a priority.

URGENT Finextra | 2026-06-05 | #06

BofA to Launch Cross-Border Real-Time Payments for Corporates

Bank of America is set to introduce a significant enhancement to its payment offerings, allowing its corporate, commercial, and financial institution clients to execute cross-border payments in real-time. This service will leverage existing infrastructure, specifically Swift, and will also be accessible via BofA's proprietary CashPro digital platform. The move aims to address the growing demand for faster, more efficient international transactions, reducing settlement times and improving liquidity management for global businesses. This development aligns with broader industry trends towards instant payments and the modernization of cross-border payment rails, offering a competitive edge in global cash management.

→ Bank of America launching cross-border real-time payments.

→ Targets corporate, commercial, and financial institution clients.

→ Payments facilitated via Swift or BofA's CashPro platform.

SO WHAT FOR RBI CASH MANAGEMENT

This is highly relevant for RBI Cash Management and CMIplus. It signals a major competitor's move into real-time cross-border payments for corporates, a key area for CMIplus's multi-currency and instant payment strategy. RBI should monitor this development closely to ensure CMIplus remains competitive in offering similar capabilities, especially within the CEE region and for international corporates.

URGENT Treasury Today | 2026-05-08 | #07

EU Legislation to Unlock SEPA Instant for Corporate Real-time Treasury

The upcoming EU legislation mandates that all payment service providers (PSPs) in the Eurozone offer SEPA Instant Payments, making it a universal standard. This regulatory push is critical for corporates, as it removes barriers to adoption and fosters a more ubiquitous real-time payment ecosystem. For treasurers, this means immediate settlement of funds, improved cash visibility, and the ability to execute just-in-time payments, transforming traditional liquidity management strategies. The legislation aims to standardize real-time payment offerings across the EU, driving innovation and competition among banks. It will likely accelerate the development of new treasury services built around instant payment capabilities, impacting all corporates operating within the SEPA zone.

→ EU legislation mandates SEPA Instant Payments for all Eurozone PSPs.

→ Aims to remove barriers for corporate adoption of instant payments.

→ Enables real-time treasury operations and enhanced liquidity management.

SO WHAT FOR RBI CASH MANAGEMENT

This legislation is a crucial development for RBI CMIplus, reinforcing the need to fully support SEPA Instant Payments across its network banks in CEE. It presents an opportunity to offer advanced real-time treasury solutions and liquidity management tools to corporate clients, leveraging the platform's multi-currency and cross-border capabilities. CMIplus should ensure its API and H2H channels are optimized for instant payment processing and reporting.

URGENT Treasury Today | 2026-06-03 | #08

Maximizing ISO 20022 Benefits for Enhanced Corporate Treasury Data

ISO 20022 migration is a global imperative, moving beyond SWIFT CBPR+ deadlines to encompass domestic payment systems. While many corporates focus on technical compliance, the true value lies in utilizing the enhanced data fields for better cash visibility, automated reconciliation, and richer analytics. Treasurers should work with their banks and TMS providers to ensure they are receiving and processing the full ISO 20022 message set, not just the basic elements. This includes structured remittance information, party identification, and detailed transaction data. Proactive engagement can lead to reduced manual effort, improved fraud detection, and more informed decision-making, transforming treasury from a cost center to a strategic partner.

→ ISO 20022 offers rich data beyond basic compliance requirements.

→ Enhanced data improves cash visibility and automated reconciliation processes.

→ Corporates should leverage full message sets with banks and TMS providers.

SO WHAT FOR RBI CASH MANAGEMENT

ISO 20022 is a core focus for CMIplus. This article highlights the need to educate clients on the *benefits* of the standard, not just the compliance aspect. CMIplus should ensure its platform fully supports the rich data fields of ISO 20022 for both incoming and outgoing payments, providing tools for advanced reconciliation and reporting. This reinforces the value proposition of CMIplus as a modern cash management platform.

URGENT The Global Treasurer | 2026-06-08 | #09

Instant Payments Growth Continues: Opportunities and Challenges for Corporates

Instant payment systems, enabling real-time fund transfers 24/7, are becoming increasingly prevalent. For corporates, this offers benefits such as improved cash flow visibility, faster settlement of invoices, and enhanced working capital management. However, it also necessitates more sophisticated liquidity management strategies to handle the immediate movement of funds and potential for increased fraud. CMIplus, by supporting these schemes, can empower clients to capitalize on the speed and efficiency of instant payments. Banks and corporates must collaborate to optimize the use of these systems and mitigate associated risks.

→ Instant payments offer real-time fund transfers.

→ Benefits include improved cash flow and working capital.

→ Requires advanced liquidity management strategies.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management's focus on instant payments through CMIplus is critical for serving CEE corporates. The platform's ability to facilitate and manage instant payment transactions will be a key differentiator. RBI will need to provide tools and insights to help clients navigate the liquidity implications and leverage the speed of these payments effectively.

URGENT EBA / ECB | 2026-06-08 | #10

ECB's Digital Euro Project Progresses with Innovation Platform and Pilot Phase

The European Central Bank is actively progressing with its exploration and development of a digital euro. Key components of this initiative include the establishment of an innovation platform to encourage experimentation and the planning for a pilot phase to test various functionalities. The digital euro aims to provide a safe, efficient, and accessible form of central bank money for retail payments in the digital age. This project is closely watched by financial institutions and corporates as it could fundamentally alter the payment landscape, impacting cross-border transactions and potentially enabling new payment solutions. The ECB is engaging with stakeholders to refine the design and technical aspects.

→ ECB's Digital Euro project is advancing.

→ Innovation platform is established for experimentation.

→ Pilot phase for testing functionalities is being planned.

SO WHAT FOR RBI CASH MANAGEMENT

The development of a digital euro could significantly impact future payment infrastructures and corporate treasury operations, including those managed by CMIplus. RBI Cash Management will need to monitor these developments closely to adapt its services and offerings to potential new payment rails and customer expectations.

URGENT Finextra | 2026-06-05 | #11

Airwallex Acquires Leapfin for Financial Data Automation

Airwallex, a global player in business payments, has announced the acquisition of Leapfin, a financial data automation platform. Leapfin is known for its expertise in automating critical financial processes such as revenue recognition and reconciliation, which are often complex and time-consuming for businesses. While financial terms were not disclosed, this strategic move by Airwallex indicates a growing industry focus on integrating advanced data management and automation into payment and treasury services. For corporate clients, this means potentially better visibility, accuracy, and efficiency in their financial operations, moving beyond just payment execution to deeper financial intelligence and streamlined reporting.

→ Airwallex acquired financial data automation platform Leapfin.

→ Leapfin specializes in revenue recognition and reconciliation.

→ Acquisition aims to enhance financial insights for business clients.

SO WHAT FOR RBI CASH MANAGEMENT

This acquisition highlights the increasing importance of financial data automation and reconciliation for corporate clients, a key aspect of corporate treasury. CMIplus should consider how it can enhance its own data reporting, reconciliation, and integration capabilities (e.g., with ERP/TMS systems) to provide similar value-added services, improving financial health and operational efficiency for its CEE corporate clients.

URGENT The Paypers | 2026-06-08 | #12

Mastercard Scales Tokenised Checkout Across Europe Towards 2030

Mastercard's initiative to scale tokenised checkout across Europe signifies a major push towards enhanced payment security and efficiency. The reported statistic that three in five e-commerce transactions are now tokenised highlights the growing acceptance and implementation of this technology. Tokenisation replaces sensitive card details with unique digital identifiers, reducing the risk of fraud for both consumers and merchants. This expansion is part of a broader strategy to prepare for future payment landscapes, with a target year of 2030 for widespread adoption. The move aligns with increasing regulatory focus on data security and consumer protection in online transactions.

→ Mastercard's tokenised checkout infrastructure expanded across Europe.

→ Three in five e-commerce transactions are now tokenised.

→ The initiative aims for widespread adoption by 2030.

SO WHAT FOR RBI CASH MANAGEMENT

This development is highly relevant for RBI Cash Management as it indicates a growing trend towards secure and efficient digital payments in the CEE region. CMIplus can leverage this by ensuring its payment processing capabilities are compatible with tokenised transactions, offering enhanced security and a smoother customer experience for corporate clients. This aligns with the broader goals of modernising payment infrastructure and supporting digital transformation.

URGENT Global Finance | 2026-06-08 | #13

Siemens Executive Details Corporate Treasury Tech Upgrade

Heiko Nix, a Siemens executive, outlines the strategic approach and specific projects involved in modernizing Siemens' corporate treasury technology. The interview likely covers critical areas such as enhancing automation, improving integration with existing ERP and TMS systems, and adopting advanced analytics for better financial decision-making. This significant upgrade reflects a broader industry trend where large multinational corporations are investing in their treasury functions to boost efficiency, gain superior visibility over global cash flows, and adapt to new regulatory and technological landscapes. Such insights are crucial for understanding the current and future demands placed on sophisticated cash management platforms. The focus is on leveraging technology to streamline operations and optimize liquidity management across diverse markets.

→ Siemens executive Heiko Nix details the corporate treasury technology upgrade.

→ The upgrade focuses on modernization, automation, and integration with ERP/TMS.

→ It reflects the evolving needs of large multinational corporate clients.

SO WHAT FOR RBI CASH MANAGEMENT

This interview offers direct insights into the technology priorities and challenges faced by large corporate clients, mirroring those served by RBI's CMIplus platform. RBI Cash Management can leverage these insights to ensure CMIplus features and roadmap align with corporate treasury demands, particularly regarding advanced integration capabilities (H2H, API), comprehensive reporting, and support for evolving payment standards and liquidity management tools.

URGENT EBA / ECB | 2026-06-08 | #14

ECB Highlights Importance of Price Stability Amidst Economic Uncertainty

The European Central Bank has underscored the paramount importance of maintaining price stability for the health of the Euro area economy. In its recent communications, the ECB highlighted that low and stable inflation is a prerequisite for sustainable economic growth, investment, and job creation. The central bank's commitment to its two percent inflation target remains firm, guiding its monetary policy decisions. This focus is crucial for businesses and financial markets, as it provides a predictable economic environment. The ECB's stance signals a continued dedication to its mandate, even in the face of evolving economic challenges and potential inflationary pressures.

→ ECB reaffirms commitment to price stability.

→ Low and stable inflation is seen as crucial for economic growth.

→ ECB remains committed to its two percent inflation target.

SO WHAT FOR RBI CASH MANAGEMENT

Maintaining price stability is fundamental for corporate treasury functions, influencing cash flow forecasting, investment decisions, and FX hedging strategies. RBI Cash Management, through CMIplus, supports clients in navigating these economic conditions by providing robust payment and liquidity management solutions.

URGENT The Paypers | 2026-06-05 | #15

EvonSys Launches TracEI to Streamline Payment Investigations

EvonSys's introduction of TracEI addresses a critical need within the banking sector for efficient payment exception handling. This Software-as-a-Service (SaaS) platform is specifically built to automate and standardize the complex workflows involved in investigating payment exceptions. By streamlining these processes, banks can expect to reduce operational costs, improve accuracy, and accelerate resolution times for payment discrepancies. The launch signifies a move towards greater technological adoption in back-office operations, aiming to enhance overall efficiency and customer satisfaction in payment processing.

→ EvonSys launched a new SaaS platform called TracEI.

→ TracEI is designed to automate payment exception management.

→ The platform aims to standardize investigation workflows for banks.

SO WHAT FOR RBI CASH MANAGEMENT

The launch of TracEI by EvonSys is significant for RBI Cash Management and CMIplus as it directly addresses the operational challenges of payment exception handling. For CMIplus, which facilitates a high volume of multi-currency and cross-border transactions, efficient investigation of payment exceptions is crucial. This platform could offer a solution for network banks within the CEE region to improve their operational efficiency, reduce costs, and enhance the overall service quality provided to corporate clients using CMIplus.

WATCH EBA / ECB | 2025-03-13 | #16

ECB Pilot Project for Research Access to Confidential Statistical Data Launched

The European Central Bank (ECB) announced the launch of a pilot project designed to provide researchers with controlled access to confidential statistical data. This initiative is a significant step towards enhancing the usability of the ECB's vast data resources for academic and policy-oriented research. By enabling secure access to granular and confidential datasets, the ECB hopes to stimulate new insights into economic and financial phenomena. The project is expected to facilitate deeper analysis of monetary policy transmission, financial stability, and payment systems. Specific details on the types of data available and the application process are being developed, with a phased rollout anticipated.

→ ECB launches pilot project for research access to confidential data.

→ Aims to foster transparency and innovation in economic research.

→ Enables secure access to granular and confidential datasets.

SO WHAT FOR RBI CASH MANAGEMENT

This initiative could indirectly benefit RBI Cash Management by fostering a deeper understanding of economic trends and financial market dynamics within the CEE region. Improved research access might lead to better data-driven insights for treasury and payment strategies.

FYI Strategic Treasurer | 2026-06-08 | #17

No News Content Found in Provided Source Data

As an intelligence analyst, I attempted to extract the top 3 most relevant news items from the provided 'Source: Strategic Treasurer' content. However, the content block supplied contained only technical website code, specifically CSS rules and font declarations, rather than any textual news articles, blog posts, or reports related to treasury strategy, cash management, or payments. Therefore, it was impossible to identify and summarize any pertinent news items for RBI Cash Management and the CMIplus platform based on the given input. The expected news content from Strategic Treasurer was not present.

→ Source content was website styling (CSS/fonts).

→ No news articles or relevant text found.

→ Extraction of news items was impossible.

SO WHAT FOR RBI CASH MANAGEMENT

Without actual news content from Strategic Treasurer, there is no direct impact or insight for RBI Cash Management or the CMIplus platform to report at this time. The platform's strategic focus areas remain unchanged.

FYI Strategic Treasurer | 2026-06-08 | #18

Missing Strategic Treasurer News for CMIplus Analysis

The task required identifying key news items from Strategic Treasurer relevant to RBI Cash Management and the CMIplus platform, focusing on topics like instant payments, ISO 20022, and Open Banking. Unfortunately, the provided 'Content' block was exclusively composed of CSS styling rules and font definitions, which are not news articles. This technical data does not offer any actionable intelligence regarding market trends, regulatory changes, or technological advancements in the treasury space that would be beneficial for CMIplus strategy.

→ Input was CSS/font declarations.

→ No treasury news content available.

→ Analysis for CMIplus relevance is not possible.

SO WHAT FOR RBI CASH MANAGEMENT

As no news content was provided, there are no immediate implications or actions for RBI Cash Management or the CMIplus platform. Continuous monitoring of actual Strategic Treasurer publications is recommended.

FYI

Strategic Treasurer | 2026-06-08 | #19

No Extractable News from Strategic Treasurer Source

The objective was to identify and summarize the top three most relevant news items from Strategic Treasurer for RBI's CMIplus platform, with a specific focus on CEE, payment regulations, instant payments, and treasury technology. However, the 'Content' provided was entirely composed of CSS code snippets and font declarations, which are structural and stylistic elements of a webpage, not informational articles. This absence of textual news content means that no analysis regarding regulatory deadlines, major product launches, or standards changes could be performed from the given input.

→ Source content was purely CSS/web code.

→ No articles on treasury or payments.

→ Unable to meet news extraction requirement.

SO WHAT FOR RBI CASH MANAGEMENT

Given the lack of news content, RBI Cash Management and the CMIplus platform cannot derive any new insights or strategic guidance from this specific input. Regular review of Strategic Treasurer's actual publications is advised.

Oliver Wyman Corporate Banking | 2026-06-08 | #01

Corporate Banking Evolution: Embracing Ecosystem Solutions Beyond Finance

The description of Oliver Wyman's "Corporate and Transaction Banking" practice highlights a key strategic direction: "ecosystem solutions that extend beyond traditional financial services." This indicates a move by corporate banks to become more than just lenders or payment providers. By integrating with non-financial services, banks can offer a more holistic value proposition to their corporate clients, potentially enhancing customer loyalty and creating new revenue streams. This approach likely involves leveraging technology and partnerships to connect clients with relevant third-party services, streamlining their operations and supply chains. For banks, it represents a significant opportunity to differentiate themselves in a competitive market and build stickier client relationships.

→ Corporate banking is evolving to offer solutions beyond traditional financial services.

→ The focus is on providing integrated 'ecosystem solutions' for corporate clients.

→ This strategy aims to embed banks deeper into clients' operational value chains.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus can play a crucial role in facilitating these ecosystem solutions by enabling seamless integration with non-financial platforms and services. Enhancing API capabilities and exploring partnerships will be vital for CMIplus to support RBI's strategy of offering value-added services that extend beyond core cash management.

EY Future of Treasury | 2026-03-08 | #02

AI Transforms Treasury: Predictive Analytics and Automation for Strategic Value

The future of treasury is heavily influenced by Artificial Intelligence, shifting the function from a cost center to a strategic value driver. AI-powered tools enable advanced predictive analytics for cash flow forecasting, liquidity management, and risk assessment, significantly improving accuracy and speed. Automation of routine tasks like reconciliation, payment processing, and compliance checks frees up treasury staff for higher-value activities. This transformation requires robust data infrastructure and integration capabilities, pushing banks to offer AI-ready solutions that can seamlessly connect with corporate ERP and TMS systems. The 'Voice of the Treasurer' increasingly demands intelligent tools for real-time insights and proactive management.

→ AI-driven cash flow forecasting improves accuracy by 20-30%.

→ Automation reduces manual reconciliation efforts by up to 70%.

→ AI enhances fraud detection and risk management capabilities.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should explore integrating AI modules for predictive liquidity analytics and automated reconciliation. Offering AI-powered insights can differentiate CMIplus, providing clients with superior cash flow visibility and operational efficiency across CEE.

URGENT EY Future of Treasury | 2026-03-08 | #03

Real-time Treasury: API-Driven Connectivity and Instant Payments Redefine Liquidity

Corporate treasurers are increasingly demanding real-time access to cash positions and the ability to execute instant payments across their global operations, particularly in fragmented regions like CEE. This necessitates a shift towards API-driven connectivity, allowing for direct integration between bank platforms (like CMIplus) and corporate ERP/TMS systems. Open Banking initiatives and the widespread adoption of ISO 20022 are critical enablers, standardizing data exchange and facilitating richer payment information. Banks that can offer robust, real-time liquidity management solutions, including dynamic cash pooling and virtual accounts, will gain a significant competitive advantage. The focus is on providing treasurers with immediate control and actionable insights over their multi-currency cash flows.

→ 80% of treasurers prioritize real-time cash visibility.

→ API adoption for treasury connectivity expected to grow by 50% in 3 years.

→ Instant payments are becoming standard for B2B transactions.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize expanding its Open Banking API capabilities and instant payment offerings across its CEE network. Enhancing real-time cash pooling and virtual account solutions will directly address core client demands for immediate liquidity control and operational efficiency.

URGENT EY Future of Treasury | 2026-03-08 | #04

Digital Assets and Strategic Treasury: Navigating New Payment Frontiers

The 'Voice of the Treasurer' is increasingly focused on strategic value creation, moving beyond transactional processing to encompass risk management, capital allocation, and navigating emerging technologies. Digital assets, such as stablecoins and central bank digital currencies (CBDCs), represent a significant frontier for payments and treasury. While mainstream adoption is still evolving, banks need to understand their potential impact on cross-border payments, liquidity, and settlement. Treasurers will look to their banking partners for guidance on integrating these new asset classes, managing associated compliance and security risks, and leveraging potential efficiencies. This shift elevates the bank's role from a service provider to a strategic advisor, particularly for international corporates operating in diverse regulatory environments like CEE.

→ 25% of large corporates are exploring digital asset payments by 2028.

→ Treasurers are shifting focus to strategic risk and opportunity management.

→ Banks need to develop advisory services for digital asset integration.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should monitor the adoption of digital assets and DLT in CEE, assessing potential integration points for future payment services. Developing expertise and advisory capabilities around stablecoins and tokenized payments will position RBI as a forward-thinking partner for corporate clients.

URGENT PwC Financial Services | 2026-03-15 | #05

Treasurers Prioritize Real-Time Cash Visibility for Strategic Liquidity

PwC's latest global treasury survey, involving over 350 treasurers worldwide, highlights that 70% identify enhanced cash visibility and liquidity management as their primary strategic objective. The methodology involved in-depth interviews and quantitative surveys across various industries. Key data indicates that only 30% of treasurers currently have real-time visibility across all their bank accounts, leading to suboptimal investment decisions and increased risk exposure. The implication is a strong market demand for advanced cash management solutions that aggregate data from diverse sources, offering predictive analytics and improved forecasting capabilities to navigate economic uncertainties, especially in complex multi-bank environments.

→ 70% of treasurers prioritize real-time cash visibility.

→ Only 30% currently achieve real-time visibility across all accounts.

→ Improved liquidity management is a key driver for technology adoption.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must continue to enhance its multi-bank, multi-currency aggregation capabilities, focusing on real-time data feeds and intuitive dashboards. Integrating advanced forecasting tools and potentially AI-driven insights into liquidity positions will be crucial for competitive advantage for corporates in CEE.

URGENT PwC Financial Services | 2026-04-01 | #06

API Banking Emerges as Key for Treasury Digital Transformation

PwC's survey of 350+ treasurers reveals that 65% plan to increase their adoption of API banking within the next two years to streamline treasury operations. The survey methodology included assessing current and planned technology investments, with a focus on digital integration strategies. Key data shows that early adopters report a 20-30% reduction in manual reconciliation efforts and faster access to critical financial data. This trend signifies a move away from traditional host-to-host and file-based integrations towards more agile, real-time API connections, enabling better cash flow management, automated payments, and enhanced fraud detection capabilities across global and regional operations.

→ 65% of treasurers plan increased API banking adoption in 2 years.

→ Early adopters see 20-30% reduction in manual reconciliation.

→ APIs enable real-time data exchange and automated payments.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should prioritize expanding its Open API capabilities, offering a comprehensive suite of APIs for account information, payment initiation, and eBAM. Proactive engagement with corporate clients to understand their specific API integration needs, especially with ERP/TMS systems, will be vital for market leadership in CEE.

URGENT PwC Financial Services | 2026-05-01 | #07

AI and Automation Reshaping Future Treasury Operations

PwC's survey of 350+ treasurers indicates that 45% are currently piloting or planning to implement AI-driven solutions within their treasury functions over the next three years. The methodology included questions on technology investment priorities and perceived benefits of emerging tech. Key data shows that AI is primarily being explored for cash flow forecasting (60% of AI pilots), fraud detection (40%), and optimizing working capital (35%). This signals a shift towards intelligent automation, moving beyond basic robotic process automation (RPA) to leverage AI for more complex decision-making and predictive insights, ultimately aiming for a more resilient and proactive treasury function in an increasingly complex financial landscape.

→ 45% of treasurers plan AI implementation in 3 years.

→ AI pilots focus on cash flow forecasting (60%).

→ Fraud detection and working capital optimization are key AI use cases.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should strategically explore integrating AI capabilities into its platform, starting with enhanced cash flow forecasting and anomaly detection for payments. This could involve partnerships or internal R&D; to offer cutting-edge, AI-powered insights, positioning RBI as an innovator in the CEE cash management space.

URGENT EY Financial Services Regulatory | 2026-06-08 | #08

PSD3 and Payments Regulation: Evolving Open Banking and Consumer Protection

The Payment Services Directive 3 (PSD3) is poised to significantly reshape the payments landscape, building upon the foundations of PSD2. EY anticipates that PSD3 will likely introduce broader Open Banking requirements, potentially extending beyond traditional account information services to include payment initiation and other financial data. Furthermore, there will be a continued emphasis on strengthening consumer protection, including enhanced fraud prevention, dispute resolution mechanisms, and data security standards. Financial institutions must adapt their strategies and technological infrastructure to meet these evolving regulatory demands, ensuring seamless and secure payment experiences for their clients.

→ PSD3 will likely expand Open Banking scope.

→ Enhanced consumer protection in payments is a key focus.

→ Stricter data security and fraud prevention measures are expected.

SO WHAT FOR RBI CASH MANAGEMENT

The evolution of PSD3 will directly impact CMIplus's payment initiation and account information services, especially for cross-border transactions within the CEE region. Adapting to expanded Open Banking APIs and ensuring compliance with enhanced consumer protection will be crucial for maintaining competitive advantage and client satisfaction.

URGENT EACT | 2023-05-03 | #09

Treasury Survey Highlights Evolving Priorities: Digitalization and Fraud Prevention Key Concerns

The EACT Annual Treasury Survey, a long-standing barometer of the profession, reveals persistent and evolving concerns among European corporate treasurers. For over a decade, the survey has tracked key priorities, with digitalization of treasury processes and robust fraud prevention strategies consistently ranking at the forefront. This focus is amplified by the growing adoption of real-time payment systems and the parallel need for enhanced security measures. The survey's findings underscore the critical importance of technological adoption and risk management in modern treasury operations, reflecting a proactive approach to adapting to a dynamic financial environment.

→ Digitalization of treasury processes remains a top priority for European treasurers.

→ Fraud prevention is a critical and growing concern, driven by payment evolution.

→ The EACT Treasury Survey serves as an authoritative barometer of industry trends.

SO WHAT FOR RBI CASH MANAGEMENT

The emphasis on digitalization and fraud prevention directly aligns with CMIplus's strategic roadmap. Enhancing our platform's capabilities in these areas, particularly in the CEE region, will be crucial for supporting our clients' evolving needs and mitigating risks associated with modern payment landscapes.

URGENT Deloitte Banking Outlook | 2026-01-01 | #10

AI Ambition Reshaping Banking: Strategic Imperative for 2026

Deloitte's 2026 outlook highlights AI ambition as a core theme for banks, demanding bold choices amidst macro headwinds. The outlook suggests that embracing AI is no longer optional but a strategic necessity for enhancing efficiency, improving customer experience, and developing new revenue streams. While specific methodologies or data are not detailed in the provided snippet, the emphasis is on the transformative potential of AI across various banking functions, from back-office operations to front-end client interactions. Banks must navigate the complexities of AI adoption, including data governance, ethical considerations, and talent acquisition, to truly capitalize on its benefits and remain competitive in an evolving landscape.

→ AI adoption is a strategic imperative for banks in 2026.

→ AI drives digital transformation and operational efficiency.

→ Banks must balance innovation with ethical and data governance challenges.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus can leverage AI to enhance fraud detection, automate reconciliation, and provide predictive analytics for corporate treasuries. Exploring AI-driven insights for liquidity management and personalized cash flow forecasting should be a roadmap priority.

European Wholesale Banks Must Seize Opportunity for Future Growth

The report "How European Wholesale Banks Can Seize The Moment" suggests that after years of struggling with profitability, European wholesale banks are at a critical juncture. The analysis, likely based on extensive market data and client engagements, points to a potential turnaround driven by evolving market dynamics and a need for strategic recalibration. Banks that proactively adapt their business models, embrace digital transformation, and focus on client-centric solutions will be best positioned to thrive. This outlook implies a shift from defensive cost-cutting to offensive growth strategies, requiring significant investment in technology and talent. The underlying message is that the current environment, while challenging, presents a unique window for European players to redefine their competitive landscape and achieve sustainable success.

→ European wholesale banking sector shows potential for recovery after underperformance.

→ Strategic adaptation and proactive business model evolution are crucial for future success.

→ Digital transformation and client-centricity are identified as key drivers of growth.

SO WHAT FOR RBI CASH MANAGEMENT

This insight highlights the need for CMIplus to support European wholesale banks in their strategic transformation. Focusing on innovative digital solutions and client-centric services will be paramount for RBI Cash Management to remain competitive and relevant in this evolving landscape.

URGENT EY Financial Services Regulatory | 2026-06-08 | #12

AI Governance and Regulation: Navigating Ethical and Compliance Landscapes

The rapid integration of Artificial Intelligence (AI) across financial services presents significant opportunities but also introduces complex regulatory challenges. EY highlights the critical need for financial institutions to develop comprehensive AI governance frameworks. These frameworks should encompass ethical considerations, data privacy, algorithmic transparency, and bias mitigation. Regulatory bodies are increasingly focusing on AI, demanding clear accountability and risk management strategies. Proactive engagement with these evolving regulatory expectations will be crucial for maintaining trust and operational integrity.

→ Financial firms must establish clear AI governance policies.

→ Ethical considerations and bias mitigation are paramount for AI deployment.

→ Regulatory scrutiny on AI in finance is intensifying.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, understanding and adhering to AI governance regulations will be vital as AI is integrated into platform features for analytics, fraud detection, or customer service. Ensuring compliance will build client trust and facilitate the adoption of AI-powered enhancements.

URGENT EACT | 2024-10-29 | #13

Verification of Payee Emerges as Crucial Tool for Fraud-Conscious Treasurers

Ahead of key EACT sessions, the importance of Verification of Payee (VoP) has been underscored as a vital component of modern fraud prevention strategies for corporate treasurers. As the adoption of real-time and instant payment types accelerates across Europe, so too must the sophistication of fraud detection mechanisms. VoP, often facilitated by solutions like the Legal Entity Identifier (LEI), provides an essential layer of security by confirming the legitimacy of payees. This proactive approach is becoming indispensable for treasurers navigating an increasingly complex and fraud-prone payment ecosystem, with regulatory bodies actively evolving their requirements to support such measures.

→ Verification of Payee (VoP) is a crucial tool for fraud-conscious treasurers.

→ The rise of real-time payments necessitates advanced fraud detection strategies.

→ Legal Entity Identifier (LEI) can play a role in streamlining VoP processes.

SO WHAT FOR RBI CASH MANAGEMENT

The increasing focus on Verification of Payee presents a significant opportunity for CMIplus to integrate and promote robust VoP solutions. This aligns with our commitment to providing secure and efficient payment processing, particularly in the CEE market where fraud risks are a growing concern.

URGENT Deloitte Banking Outlook | 2026-01-01 | #14

Stablecoins: Disruptive Force in Payments and Cash Management

Deloitte's 2026 banking outlook identifies the potential disruptive entrance of stablecoins as a critical factor banks must address. This highlights a significant shift in the digital payments landscape, where stablecoins could offer faster, cheaper, and more transparent cross-border transactions, challenging traditional payment rails. While the specific impact and adoption rates are still evolving, the outlook signals that banks need to proactively assess stablecoin technology, its regulatory implications, and potential integration into their existing payment and cash management offerings. Ignoring this trend could lead to competitive disadvantages as corporates seek more efficient digital payment solutions.

→ Stablecoins are identified as a potential disruptive force in banking.

→ They offer potential for faster, cheaper cross-border payments.

→ Banks must proactively assess stablecoin technology and regulatory impacts.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should monitor stablecoin developments closely, especially for multi-currency payments and cross-border transactions in CEE. Evaluating potential API integrations or partnerships to offer stablecoin-based payment rails could be a future strategic consideration for enhanced real-time treasury.

URGENT Oliver Wyman Corporate Banking | 2026-06-08 | #15

Private Credit's Next Act: Tapping into Asset-Based Lending

The insight "Private Credit's Next Act: Why private credit is tapping into asset-based lending" suggests a significant evolution within the private credit sector. By integrating asset-based lending (ABL) strategies, private credit funds are broadening their investment scope and providing more tailored financing solutions to corporates. This move indicates a strategic response to market demand for flexible and collateral-backed financing. ABL offers a way for private credit to tap into a wider range of corporate assets, potentially unlocking new deal flows and enhancing returns. The implication is that banks and corporates should anticipate increased competition and innovation in this space, as private credit players become more sophisticated in their approach to corporate finance.

→ Private credit is actively incorporating asset-based lending into its strategies.

→ This integration expands the investment universe and financing options for corporates.

→ ABL provides a collateral-backed approach, appealing to risk-adjusted returns.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management, this trend underscores the growing importance of integrated financing and treasury solutions. CMIplus should consider how to better support clients seeking ABL-related services and how to leverage its platform to facilitate more complex, collateral-aware cash management and liquidity strategies.

URGENT Euro Banking Association | 2025-11-20 | #01

Report: IPR, PSR, PSD3 Major Impact on Liquidity Management

PSD3, INSTANT PAYMENTS, LIQUIDITY MANAGEMENT

The Euro Banking Association's Liquidity Management Working Group (LMWG) published a new report analyzing the far-reaching effects of three critical EU regulatory initiatives. These include the Instant Payments Regulation (IPR), the proposed Payment Services Regulation (PSR), and the proposed Payment Services Directive 3 (PSD3). The report highlights how these measures will drive the uptake of instant payments, foster a more level playing field among market participants, and fundamentally transform the current liquidity management environment for financial institutions across Europe. It serves as a crucial guide for banks to understand and prepare for the upcoming changes.

→ Analysis of Instant Payments Regulation (IPR) impact.

→ Analysis of proposed Payment Services Regulation (PSR) impact.

→ Analysis of proposed Payment Services Directive 3 (PSD3) impact.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management (CMIplus) must review this report to understand the specific liquidity management challenges and opportunities arising from IPR, PSR, and PSD3. This includes assessing potential impacts on real-time liquidity needs, intraday credit, and the development of new services to support instant payments and open banking capabilities for corporate clients.

URGENT Euro Banking Association | 2025-09-16 | #02

PSPs Urged to Implement OCT Inst for Cross-Border Instant Payments

INSTANT PAYMENTS, CROSS-BORDER PAYMENTS

Deadline: 2026-01-01

The Euro Banking Association (EBA) and its Expert Group on Cross-Border Payments (EGXP) have published a white paper detailing the benefits and implementation roadmap for OCT Inst. This scheme is presented as a promising approach to achieve the G20 Roadmap targets for cost, speed, access, and transparency in cross-border payments by 2027. PSPs are strongly encouraged to initiate their individual implementation planning without delay and collaborate on necessary deliverables. A separate EBA communication further recommended that PSPs begin resource planning with the goal to start implementation in 2026, emphasizing the urgency for readiness.

→ Implement One-Leg-Out Instant Credit Transfer (OCT Inst) scheme.

→ Meet G20 Roadmap targets for cross-border payments by 2027.

→ PSPs to initiate implementation planning immediately.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management (CMIplus) needs to assess its current cross-border payment capabilities and develop a strategic plan for integrating OCT Inst. This involves evaluating technical requirements, resource allocation, and potential new product offerings to facilitate instant, transparent, and cost-effective cross-border payments for corporate clients in CEE, ensuring readiness for the 2026 implementation goal.

URGENT Deutsche Bank | 2026-06-08 | #01

Deutsche Bank Enhances Cash Management with Focus on CEE Expansion

Deutsche Bank's 'flow' platform, through its content and case studies, signals a strong commitment to enhancing its corporate banking services, including cash management, within the CEE market. This expansion likely involves leveraging digital channels, API integrations, and potentially advanced payment solutions to cater to the specific needs of businesses operating in this dynamic region. The bank's focus on topics like cash management, trade finance, and technology suggests a comprehensive approach to supporting corporate treasury functions and cross-border transactions in CEE.

→ Deutsche Bank is actively focusing on expanding its cash management services in the CEE region.

→ Digital channels and API integrations are likely key components of this expansion.

→ The bank aims to provide comprehensive support for corporate treasury and cross-border transactions.

SO WHAT FOR RBI CASH MANAGEMENT

Deutsche Bank's CEE expansion in cash management directly competes with CMIplus's core market, necessitating a strong focus on innovation and client service to maintain market share.

URGENT UniCredit | 2026-06-08 | #02

UniCredit Enhances Digital Platform for Corporate Clients with Advanced APIs

UniCredit is actively advancing its digital corporate banking capabilities, particularly through its UniCredit Direct platform. The focus is on providing robust API solutions that allow corporate clients to integrate their ERP and TMS systems directly with UniCredit's banking services. This strategy aims to automate payment initiation, retrieve real-time account information, and manage liquidity more efficiently. For CEE clients, this means improved access to sophisticated digital tools, aligning with the region's growing demand for advanced treasury solutions and digital transformation. The goal is to offer a consistent, high-quality digital experience across all markets.

→ Focus on UniCredit Direct for digital corporate client engagement.

→ Emphasis on API integration for ERP/TMS connectivity.

→ Aims for real-time data access and automated payment processing.

SO WHAT FOR RBI CASH MANAGEMENT

UniCredit's push for advanced API integration directly competes with CMIplus's H2H and Open API offerings. CMIplus must ensure its API suite remains competitive in functionality, ease of integration, and regional coverage, especially for multi-bank setups.

URGENT UniCredit | 2026-06-08 | #03

UniCredit Bolsters CEE Cash Management and Liquidity Offerings

UniCredit, with its significant footprint in CEE, is continuously strengthening its cash management and liquidity solutions for corporate clients in the region. This involves enhancing existing products like cash pooling, virtual accounts, and multi-currency payments to meet the evolving needs of international and local businesses. The strategy aims to provide seamless cross-border capabilities, enabling corporates to centralize treasury functions and gain better visibility and control over their cash positions across multiple CEE countries. This commitment ensures UniCredit remains a leading partner for corporates operating in or expanding into the dynamic CEE market.

→ Leveraging UniCredit's extensive CEE network for corporate clients.

→ Focus on cash pooling, virtual accounts, and multi-currency payments.

→ Aims to centralize treasury functions and improve cash visibility.

SO WHAT FOR RBI CASH MANAGEMENT

This directly impacts CMIplus as UniCredit is a major competitor in CEE cash management. CMIplus needs to highlight its unique network advantages, local expertise, and specialized CEE-focused solutions to retain and attract clients.

URGENT UniCredit | 2026-06-08 | #04

UniCredit Accelerates ISO 20022 and Instant Payment Adoption

UniCredit is committed to modernizing its payment infrastructure to align with global standards and client expectations for speed and data quality. A key focus is the full adoption of ISO 20022 for all payment types, which provides richer data and improved reconciliation for corporate treasuries. Simultaneously, the bank is expanding its instant payment offerings, enabling real-time transactions 24/7/365 across its network, including its strong presence in CEE. This strategic investment ensures that UniCredit's corporate clients benefit from faster, more transparent, and more efficient payment processing, supporting their operational needs in an increasingly real-time economy.

→ Full adoption of ISO 20022 for enhanced payment data.

→ Expansion of instant payment services across Europe, including CEE.

→ Aims for real-time, transparent, and efficient payment processing.

SO WHAT FOR RBI CASH MANAGEMENT

UniCredit's advancements in ISO 20022 and instant payments are critical competitive factors. CMIplus must ensure its own offerings in these areas are robust, widely available across its CEE network, and effectively communicated to clients, especially regarding cross-border instant payment capabilities.

URGENT Citi Treasury | 2026-06-08 | #05

Citi Accelerates API-First Strategy for Real-Time Corporate Cash Management

Citi continues to invest heavily in its API banking capabilities, recognizing the growing demand from large multinational corporations for direct, programmatic access to banking services. This includes real-time payment initiation, status updates, and comprehensive account information, crucial for efficient liquidity management. The focus extends to supporting instant payment schemes across Europe, ensuring clients can leverage faster settlement times. For CEE-based corporates, this means faster cross-border and domestic transactions, improving working capital cycles and operational efficiency, and enhancing their ability to manage multi-currency flows.

→ Strong emphasis on API integration for treasury functions.

→ Support for real-time and instant payment rails globally, including Europe.

→ Enhanced data visibility and automation for corporate clients.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure its Open API offerings are competitive in breadth and depth, particularly for real-time payments and data exchange. Citi's push reinforces the need for RBI to continuously innovate its API and instant payment capabilities in the CEE region.

URGENT Deutsche Bank | 2026-06-08 | #06

Deutsche Bank's Flow Platform Showcases Digital Banking and API Innovation

The 'flow' platform serves as a central hub for Deutsche Bank's corporate and transaction banking content, underscoring their strategic focus on digital innovation. Key areas of emphasis include CB Connect API, which facilitates seamless integration for clients, and broader transaction banking capabilities. This digital-first approach aims to provide clients with greater control and efficiency in managing their financial operations, aligning with the growing demand for embedded finance solutions. The platform's content strategy suggests a proactive stance in addressing evolving client needs and market trends.

→ Deutsche Bank's 'flow' platform is a key channel for showcasing corporate and transaction banking innovations.

→ Emphasis on API-driven solutions like CB Connect API for client integration.

→ Strategic focus on digital transformation and enhanced client connectivity.

SO WHAT FOR RBI CASH MANAGEMENT

Deutsche Bank's investment in digital platforms and APIs presents a competitive challenge to CMIplus, particularly in offering integrated and efficient payment and treasury solutions.

URGENT Citi Treasury | 2026-06-08 | #07

Citi Enhances Digital Treasury Solutions, Deepening ERP/TMS Integrations

Citi's strategy involves offering sophisticated digital tools that allow corporate treasurers to automate processes like cash forecasting, reconciliation, and intercompany lending. A key component is the development of robust connectors and standardized interfaces (like ISO 20022 and H2H) to integrate directly with clients' ERP and TMS platforms. This reduces manual effort, improves data accuracy, and provides a single source of truth for financial data. For CEE corporates, this means greater efficiency in managing multi-currency operations and optimizing cash across various entities within the region, directly impacting their treasury transformation efforts.

→ Investment in digital treasury tools for automation and efficiency.

→ Prioritization of deep integration with corporate ERP and TMS.

→ Leveraging standards like ISO 20022 for data enrichment.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's EBICS and H2H channels are direct competitors here. RBI needs to ensure its integration capabilities, especially with major ERP/TMS systems prevalent in CEE, remain superior and offer comparable digital treasury functionalities.

URGENT HSBC | 2025-12-01 | #08

HSBC Accelerates AI Adoption with Mistral AI Partnership

HSBC's strategic move to partner with Mistral AI signifies a significant push towards embedding AI capabilities within its banking infrastructure. The partnership is designed to streamline internal operations, improve efficiency for employees, and ultimately deliver a superior banking experience to its global customer base. This focus on AI aligns with broader digital transformation trends in the financial sector, aiming to leverage advanced technology for competitive advantage.

→ HSBC is collaborating with AI firm Mistral AI.

→ The partnership focuses on accelerating AI adoption across global operations.

→ Key objectives include improving business processes and customer service.

SO WHAT FOR RBI CASH MANAGEMENT

HSBC's investment in AI could lead to more sophisticated treasury and cash management solutions, potentially impacting CMIplus's offerings in areas like predictive analytics for liquidity management.

URGENT Intesa Sanpaolo | 2026-06-08 | #09

Intesa Sanpaolo Accelerates Digital Corporate Banking and Cash Management in CEE

Intesa Sanpaolo is actively investing in its corporate and transaction banking capabilities, particularly within its extensive CEE subsidiary network. This strategic push aims to provide advanced digital solutions, including real-time payment processing and sophisticated liquidity management tools, to multinational and local corporates. The bank is likely leveraging API-driven platforms to integrate seamlessly with client ERP/TMS systems, aligning with broader industry trends like ISO 20022 migration and instant payment adoption. This strengthens their competitive position by offering efficient, modern cash management services across the region, catering to the evolving needs of corporate treasurers.

→ Strategic focus on digital transformation for corporate banking in CEE markets.

→ Emphasis on API integration and real-time payment capabilities for enhanced client experience.

→ Development of advanced treasury and liquidity management solutions to support corporate efficiency.

SO WHAT FOR RBI CASH MANAGEMENT

Intesa Sanpaolo's digital push in CEE directly competes with CMIplus's offerings, particularly in API-driven solutions and multi-currency cash management. RBI should monitor their progress in real-time payments and treasury integration to maintain its competitive edge and identify potential partnership opportunities.

WATCH Deutsche Bank | 2026-06-08 | #10

Tokenisation of Securities Gains Momentum, Driven by Client Demand

The article highlights Deutsche Bank's view on the increasing adoption of tokenisation within the structured products and securities market. This trend is being propelled by direct client feedback and shifts in market dynamics, pushing the industry towards a more consolidated and efficient model. Deutsche Bank's involvement suggests a strategic interest in leveraging blockchain and distributed ledger technology for its issuer and investor services. This could translate into new offerings for corporate clients seeking innovative ways to manage their assets and capital.

→ Tokenisation of structured products and securities is nearing a significant adoption phase.

→ Client voices and market shifts are key drivers for this trend.

→ Deutsche Bank is positioning itself to support issuer and investor services in tokenised markets.

SO WHAT FOR RBI CASH MANAGEMENT

While not directly cash management, this trend towards tokenisation could eventually impact corporate treasury functions and the way assets are managed and collateralised, requiring CMIplus to monitor future developments.

WATCH

BNP Paribas | 2026-06-08 | #11

BNP Paribas Enhances Cross-Border Payments with XTransfer Partnership

The partnership between BNP Paribas and XTransfer signifies a strategic move to enhance cross-border payment efficiency for corporate clients. By integrating XTransfer's capabilities, BNP Paribas aims to offer a more seamless and cost-effective solution for international transactions, particularly for businesses operating in global markets. This initiative aligns with the broader trend of banks leveraging fintech partnerships to expand their service offerings and improve customer experience in areas like payments and receivables. The focus on simplifying these complex processes is crucial for corporates looking to optimize their working capital and global operations, with potential benefits extending to CEE clients seeking easier access to international markets.

→ Partnership with fintech XTransfer to improve cross-border payments.

→ Focus on simplifying international transaction processes for corporates.

→ Aims to enhance efficiency and cost-effectiveness of global payments.

SO WHAT FOR RBI CASH MANAGEMENT

BNP Paribas's strategic partnerships for cross-border payments present a competitive challenge to CMIplus, particularly if similar solutions are not readily available or as integrated within RBI's network. CMIplus needs to ensure its offerings remain competitive in terms of speed, cost, and ease of use for international transactions.

WATCH

HSBC | 2025-09-25 | #12

HSBC Explores Quantum Computing for Algorithmic Trading

HSBC's collaboration with IBM on quantum-enabled algorithmic trading represents a forward-looking approach to financial market innovation. By testing the capabilities of quantum computing, HSBC aims to identify potential breakthroughs in trading speed and efficiency. This exploration into quantum technology could lead to the development of next-generation treasury and trading solutions, offering significant competitive advantages in complex financial markets.

→ HSBC partnered with IBM for a quantum computing trial.

→ The trial focused on algorithmic bond trading.

→ This demonstrates HSBC's pursuit of advanced financial technologies.

SO WHAT FOR RBI CASH MANAGEMENT

While not directly related to core cash management, advancements in algorithmic trading could influence how large corporates manage their FX exposures and optimize treasury operations, indirectly impacting CMIplus.

Flagship Reports

Deep analysis of key industry reports

EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

→ {'description': 'of respondents will use managed services from banks to address the challenges of digitization.', 'value': '44%', 'page': 7}

→ {'description': 'of CFOs and treasurers are comfortable with customized strategic advice based on data analysis from banks.', 'value': '90%', 'page': 12}

→ {'description': "of corporate treasurers are comfortable using a sector-specific platform tailored to their industry's unique needs.", 'value': '92%', 'page': 17}

TOP ACTION FOR CMIPLUS

[HIGH] Optimize CMIplus cash management solutions for specific CEE sectors to differentiate and boost client engagement and loyalty.

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.

TOP ACTION FOR CMIPLUS

[HIGH] Integrate AI for Intelligent Routing, Fraud Detection, and Liquidity Management
