EU Instant Payments Mandate: Banks Face Tight Deadlines

The EU's Instant Payments Regulation, which entered into force in April 2024, sets strict timelines for payment service providers (PSPs) in the Eurozone to implement instant credit transfer capabilities. PSPs in the Euro area must be able to receive instant payments by January 2025 and send them by October 2025. For non-Eurozone member states that process Euro transactions, the deadlines are extended to January 2027 for receiving and October 2027 for sending. This regulation aims to accelerate payment processing, reduce costs, and enhance liquidity for corporates, but poses significant IT and operational challenges for banks, particularly in CEE where adoption rates may vary.

→ EU Instant Payments Regulation effective April 2024.

→ Eurozone banks: receive by Jan 2025, send by Oct 2025.

→ Non-Eurozone (Euro transactions): receive by Jan 2027, send by Oct 2027.

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is critical for RBI Cash Management as CMIplus operates across CEE, including Eurozone and non-Eurozone countries. RBI must ensure its network banks and the CMIplus platform are fully compliant by the respective deadlines, offering seamless instant payment capabilities to corporate clients. This also presents an opportunity to differentiate by providing advanced liquidity management tools for real-time transactions.

PSD3 Proposals Target Enhanced Open Banking for Corporates

The European Commission's proposed PSD3 and Financial Data Access (FIDA) frameworks are set to significantly evolve the Open Banking landscape, with a strong emphasis on corporate use cases. While PSD2 primarily focused on consumer payments, PSD3 is expected to streamline API access, improve data sharing consent mechanisms, and enhance security for corporate accounts. This could enable treasurers to gain a more comprehensive, real-time view of their multi-bank positions and automate cash management processes more effectively. The FIDA regulation, in parallel, aims to create a broader framework for data sharing across financial sectors, potentially unlocking new services for corporates beyond traditional payment initiation and account information.

→ PSD3 and FIDA proposals aim to expand Open Banking to corporates.

→ Focus on standardized API access and improved data sharing.

→ Expected to enhance real-time cash visibility and automation for treasurers.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus already leverages Open Banking APIs. PSD3 and FIDA will necessitate updates to RBI's API strategy, ensuring compliance and offering advanced, standardized API services to corporate clients for account information and payment initiation. This is a strategic opportunity to strengthen CMIplus's position as a leading digital cash management platform in CEE by providing cutting-edge Open Banking solutions.

URGENT Der Treasurer | 2026-06-15 | #03

AI Revolutionizes Corporate Payment Fraud Prevention

The growing volume and speed of digital payments, particularly instant payments, have made corporate treasury departments more vulnerable to fraud. Traditional fraud detection methods often struggle to keep pace. AI and machine learning are now at the forefront of prevention, analyzing vast datasets of transaction patterns, user behavior, and external threat intelligence in real-time. These systems can identify anomalies, detect sophisticated phishing attempts, and flag suspicious transactions before they are executed. Integration of AI into treasury management systems (TMS) and banking platforms is becoming crucial for corporates to protect their assets and maintain financial integrity in an increasingly complex threat landscape.

→ AI combats rising payment fraud, especially with instant payments.

→ Real-time anomaly detection and predictive analytics are key.

→ Analyzes transaction patterns, user behavior, and threat intelligence.

SO WHAT FOR RBI CASH MANAGEMENT

For CMIplus, integrating advanced AI-driven fraud prevention is paramount to ensure the security and trust of its corporate clients. RBI should explore partnerships or in-house development to embed real-time fraud detection capabilities within the CMIplus platform, particularly for instant and high-value payments. This enhances the platform's value proposition and protects clients operating across the CEE region.

URGENT The Global Treasurer | 2026-06-15 | #04

EU Instant Payments Regulation Drives ISO 20022 Adoption

The European Union's Instant Payments Regulation, which came into force earlier this year, requires all EU and EEA payment service providers to offer instant credit transfers in EUR at no extra cost compared to standard transfers. Banks must ensure funds are credited within ten seconds, regardless of the time or day. This regulation is a game-changer for corporate treasury, demanding significant upgrades to payment infrastructure. Concurrently, the regulation reinforces the need for full migration to ISO 20022 for all payment messages, ensuring richer data and seamless interoperability across the instant payment ecosystem. The first key deadlines for receiving instant payments are approaching in early 2027, with sending capabilities following shortly after, putting pressure on banks and corporates alike to prepare their systems.

→ EU Instant Payments Regulation mandates instant EUR credit transfers.

→ Funds must be credited within 10 seconds, 24/7/365.

→ No additional cost compared to standard transfers.

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is critical for RBI CMIplus, directly impacting its payment processing capabilities across CEE. CMIplus must ensure full compliance with instant payment mandates and leverage its ISO 20022 capabilities to support corporates in meeting these new requirements, offering seamless real-time payment initiation and receipt. It also presents an opportunity to enhance multi-currency instant payment offerings.

URGENT The Global Treasurer | 2026-06-01 | #05

Open Banking APIs Boost Corporate Fraud Prevention

The evolution of Open Banking continues to empower corporates with greater control and visibility over their financial operations. Recent advancements focus on leveraging APIs for robust fraud prevention. Banks are rolling out new API endpoints that allow corporate treasury systems (TMS/ERP) to perform real-time validation of beneficiary accounts, check payment patterns, and integrate directly with bank-side fraud detection engines. This proactive approach helps identify suspicious transactions before execution, reducing financial losses and operational risks. The push for PSD3 is also expected to further standardize and strengthen these API capabilities, making secure data exchange and transaction monitoring more seamless across the European banking landscape, particularly benefiting multi-banked corporates in CEE.

→ Open Banking APIs enable real-time beneficiary account validation.

→ Direct integration with bank fraud detection engines.

→ Reduces financial losses and operational risks from fraud.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus can leverage these enhanced Open Banking APIs to offer advanced fraud prevention features to its corporate clients. Integrating real-time payment verification and fraud alerts directly into the platform will add significant value, reinforcing CMIplus as a secure and reliable cash management solution, especially for its CEE clients managing multi-currency payments.

URGENT The Global Treasurer | 2026-05-20 | #06

CEE Corporates Embrace AI for Advanced Cash Forecasting

The CEE region, characterized by dynamic economic environments, sees corporates prioritizing robust cash management. A recent survey indicates a significant uptick in the adoption of AI-powered solutions for cash forecasting among large international corporates in CEE. These advanced tools analyze historical data, market trends, and even external factors to predict cash flows with unprecedented accuracy, moving beyond traditional statistical models. This allows treasurers to make more informed decisions regarding liquidity, short-term investments, and funding needs. The integration of AI into treasury management systems (TMS) and corporate banking platforms is becoming a competitive differentiator, enabling better working capital optimization and reducing reliance on manual processes.

→ Increased AI adoption for cash forecasting in CEE.

→ AI analyzes historical data, market trends, and external factors.

→ Improves cash flow prediction accuracy significantly.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus can capitalize on this trend by exploring AI-driven cash forecasting modules or integrations. Offering enhanced forecasting capabilities, potentially through partnerships or in-house development, would be highly attractive to RBI's CEE corporate clients, reinforcing CMIplus as a cutting-edge platform for liquidity and cash management.

URGENT Strategic Treasurer | 2026-06-10 | #07

EU ISO 20022 Migration Progress Accelerates

The European payments landscape is undergoing a major transformation with the widespread adoption of ISO 20022. This global messaging standard promises enhanced data capabilities, improved reconciliation, and better fraud detection. While the initial migration for SEPA credit transfers and direct debits is largely complete, the focus is now shifting to cross-border payments (SWIFT CBPR+ migration) and domestic schemes. Many CEE countries are aligning their national payment infrastructures with ISO 20022, requiring significant investment in IT systems and processes for both banks and their corporate clients. Regulatory bodies continue to emphasize the importance of timely adoption to unlock the full potential of modern payment systems.

→ SWIFT CBPR+ migration deadline for cross-border payments is approaching.

→ ISO 20022 enables richer data, improving reconciliation and analytics.

→ CEE countries are actively upgrading domestic payment infrastructures.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management, through CMIplus, must ensure full compliance and seamless support for ISO 20022 across all channels (EBICS, H2H, SWIFT). This includes providing tools for corporates to leverage richer data and assisting with their own migration challenges, particularly in the diverse CEE market.

URGENT Strategic Treasurer | 2026-05-28 | #08

EU Instant Payments Regulation Drives Adoption

The European Union has finalized its Instant Payments Regulation, which will make instant credit transfers mandatory and affordable across the Eurozone. This regulation aims to enhance financial inclusion, boost liquidity management for businesses, and foster innovation in payment services. Banks will be required to offer instant payments at no higher cost than standard credit transfers, and to ensure their availability 24/7/365. The phased implementation will see deadlines for receiving and sending instant payments, with a strong focus on security and fraud prevention. This move is expected to transform the payment landscape, making real-time payments the new norm and impacting corporate cash flows and treasury operations.

→ EU Instant Payments Regulation mandates 24/7/365 availability.

→ Fees for instant payments must not exceed standard credit transfer fees.

→ Phased implementation deadlines for banks are expected in 2027.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must fully integrate and promote instant payment capabilities, ensuring compliance with the new EU regulation across its CEE network. This presents an opportunity to offer enhanced liquidity management and real-time payment solutions to corporate clients, requiring robust infrastructure and fraud detection systems.

URGENT Strategic Treasurer | 2026-06-01 | #09

Open Banking APIs Transform Corporate Treasury

While initially driven by PSD2 for retail banking, Open Banking APIs are now profoundly impacting corporate treasury functions. Companies are using APIs to connect directly with their banks, enabling real-time access to account information, transaction data, and payment initiation capabilities. This direct connectivity facilitates more accurate cash forecasting, automated reconciliation, and efficient liquidity management. The shift towards API-driven treasury is also paving the way for innovative solutions like virtual accounts and payment factories, offering greater control and flexibility. Banks are responding by developing comprehensive API suites to meet the evolving demands of their corporate clients, moving beyond basic data access to more sophisticated treasury services.

→ APIs enable real-time cash visibility and automated reconciliation.

→ Beyond PSD2, APIs support advanced treasury functions like payment factories.

→ Corporate adoption of API-driven treasury solutions is accelerating.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must continue to expand its Open API offerings, enabling seamless integration with corporate ERP/TMS systems and supporting advanced treasury functionalities. This is crucial for maintaining competitiveness and providing value-added services for real-time cash management and automated processes for RBI's corporate clients in CEE.

URGENT EBA / ECB | 2026-06-22 | #10

Digital Euro Progress: Pilot and Innovation Platform Active

The ECB is actively exploring the development and implementation of a digital euro, a project with significant implications for the future of payments. The initiative includes a pilot phase to test technical solutions and user experience, alongside an innovation platform to engage stakeholders and foster new ideas. Key aspects under consideration include privacy, accessibility, and the potential impact on financial stability. While no specific new press release date is provided, the continuous mention of 'Timeline and progress', 'Pilot', and 'Innovation platform' indicates ongoing, active development, crucial for future payment infrastructure and corporate treasury strategies.

→ Digital euro pilot phase is ongoing

→ Innovation platform actively fostering development

→ Focus on privacy and accessibility for users

SO WHAT FOR RBI CASH MANAGEMENT

The digital euro represents a potential paradigm shift in payment methods. CMIplus must monitor its development closely to assess future integration needs, potential new payment rails, and the impact on multi-currency cash pooling and real-time payment processing for corporate clients in CEE.

URGENT EBA / ECB | 2026-06-22 | #11

ECB Reinforces SEPA and Instant Payments Strategy

The European Central Bank maintains its strategic commitment to fostering a modern and harmonized retail payments environment within Europe. This includes ongoing efforts to ensure the smooth functioning and evolution of SEPA (Single Euro Payments Area) and to drive the adoption of instant payments. The ECB's role as a catalyst involves setting strategic directions, engaging with market participants through groups like AMI-SeCo, and promoting cyber resilience. This continuous push for faster and more efficient payment methods is vital for corporate cash management, enabling real-time liquidity and improved treasury operations across the CEE region.

→ ECB acts as a catalyst for retail payments strategy

→ Strong focus on SEPA harmonisation and evolution

→ Driving widespread adoption of instant payments

SO WHAT FOR RBI CASH MANAGEMENT

For CMIplus, the ECB's emphasis on SEPA and instant payments is paramount. It reinforces the need for robust ISO 20022 compliant systems, real-time payment capabilities, and efficient cross-border processing. RBI Cash Management must ensure CMIplus continues to support and leverage these developments for its CEE corporate clients, including potential for VoP and enhanced liquidity management.

URGENT Finextra | 2026-06-19 | #12

Deluxe Acquires Payment Processor Celero for $625 Million

Deluxe, historically known for inventing the chequebook, is making a strategic push into contemporary payment processing by acquiring Celero Commerce. The all-cash deal is valued at $625 million. Celero Commerce is a payment processor that provides services to small and medium-sized businesses. This acquisition will enable Deluxe to offer a more comprehensive suite of payment solutions, combining its traditional strengths with modern processing capabilities. For the payments industry, this represents further consolidation and a clear signal of traditional players adapting to the evolving digital payment landscape, potentially impacting competition and service innovation for corporate clients.

→ Acquirer: Deluxe (known for chequebooks).

→ Target: Celero Commerce (payment processor).

→ Deal value: $625 million cash.

SO WHAT FOR RBI CASH MANAGEMENT

This acquisition is highly relevant for RBI Cash Management as CMIplus facilitates multi-currency payments and interacts with various payment processors. Changes in the payment processing landscape, such as this consolidation, can influence service availability, pricing, and integration options for corporate clients in CEE. RBI should assess the implications for its payment routing and potential partnerships with such expanded entities.

URGENT The Paypers | 2026-06-22 | #13

Erste and Raiffeisen Join EPI's Wero Initiative

The European Payments Initiative (EPI) announced that Erste Bank Oesterreich and Raiffeisen have become shareholders, reinforcing the commitment to a pan-European payment scheme. This strategic expansion is set to boost the deployment of Wero, EPI's digital wallet and instant payment solution, specifically within the Austrian market. The addition of these two major Austrian banking groups signifies growing support for Wero's ambition to provide a unified, instant payment experience across Europe, challenging existing international card schemes. This development is crucial for the future of European payments, promoting financial sovereignty and streamlining transactions for consumers and businesses alike. It underscores a collective effort to build a robust, competitive European payment infrastructure.

→ Erste Bank Oesterreich and Raiffeisen are new EPI shareholders.

→ The goal is to accelerate Wero's rollout in Austria.

→ Wero is EPI's unified instant payment solution.

SO WHAT FOR RBI CASH MANAGEMENT

As part of the Raiffeisen Bank International (RBI) group, the involvement of Raiffeisen in EPI and Wero is highly significant for CMIplus. This signals a strategic commitment to a new European payment standard, potentially impacting future SEPA and instant payment offerings and requiring CMIplus to align with Wero's capabilities for corporate clients in CEE.

URGENT Treasury Today | 2026-05-22 | #14

EU Legislation to Unlock SEPA Instant for Corporates

The European Union is implementing new legislation that mandates the availability and accessibility of SEPA Instant Payments for all payment service providers and their corporate clients. This move is expected to overcome existing barriers to corporate adoption, such as varying bank readiness and lack of consistent pricing. The legislation will likely set clear deadlines for compliance, ensuring that corporates can leverage instant payments for improved liquidity management, faster reconciliation, and enhanced working capital efficiency. This regulatory framework is a critical step towards achieving a truly real-time treasury environment within the EU, impacting cash management strategies and payment processing across the CEE region.

→ Mandatory SEPA Instant Payments for PSPs and corporates.

→ Aims to accelerate corporate adoption across the EU.

→ Expected to improve corporate liquidity and working capital.

SO WHAT FOR RBI CASH MANAGEMENT

This legislation is a major driver for CMIplus, necessitating full support for SEPA Instant Payments across all CEE network banks. RBI must ensure CMIplus offers robust, compliant, and user-friendly instant payment functionalities, potentially integrating new features like Request-to-Pay or real-time reporting to meet evolving corporate demands.

URGENT Treasury Today | 2026-06-10 | #15

ISO 20022 Relevance in a DLT World Questioned

As financial institutions and corporates increasingly explore the potential of Distributed Ledger Technology (DLT) for payments and asset transfers, the established role of ISO 20022 as the universal financial messaging standard comes under scrutiny. The discussion revolves around whether ISO 20022, designed for traditional centralized systems, can effectively bridge with or be superseded by DLT-native messaging protocols. Key considerations include data richness, interoperability challenges, and the potential for DLT to offer real-time, atomic settlement that could redefine payment messaging needs. The article likely examines strategies for co-existence, adaptation, or potential divergence between these two powerful technological trends.

→ ISO 20022's future questioned amidst DLT adoption.

→ Explores interoperability challenges between ISO 20022 and DLT.

→ Considers DLT's potential to redefine payment messaging.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus heavily relies on ISO 20022 for its payment messaging. RBI needs to monitor DLT developments closely and assess their potential impact on future payment infrastructure and standards. This implies exploring how CMIplus could integrate or adapt to DLT-based solutions, ensuring continued relevance and interoperability for corporate clients, especially for cross-border payments or new asset classes.

URGENT Finextra | 2026-06-19 | #16

Finastra Sells Core Banking Unit to Pollen Street Capital

Finastra, a prominent financial technology provider, has completed the sale of its Universal Banking (UB) core banking software division. This unit, which provides critical infrastructure for banks globally, has been acquired by Pollen Street Capital, a UK-based private equity firm. The transaction's financial specifics remain confidential. This strategic move allows Finastra to streamline its focus on other key areas, while Pollen Street Capital gains a substantial asset in the core banking technology market. The acquisition could lead to new investments and strategic directions for the UB platform, potentially influencing the competitive landscape for core banking solutions and their integration with cash management services.

→ Finastra sold its Universal Banking (UB) core banking software business.

→ Buyer: UK-based private equity firm Pollen Street Capital.

→ Financial terms: Not disclosed.

SO WHAT FOR RBI CASH MANAGEMENT

This acquisition is significant for RBI Cash Management as it impacts the core banking software market, which underpins many CMIplus functionalities. Potential strategic shifts or new investments in the UB platform could influence future integration possibilities, competitive offerings, and the overall technology landscape for corporate cash management in CEE. RBI should monitor how this acquisition affects Finastra's broader ecosystem and potential partnerships.

URGENT The Paypers | 2026-06-22 | #17

NymCard Unveils FullStack Payments Infrastructure for Banks

NymCard's nCore FullStack represents a significant advancement in banking payment infrastructure, providing a unified solution that streamlines various critical banking operations. By consolidating issuing, lending, payments, settlement, and compliance into a single-integration platform, nCore FullStack aims to reduce complexity and operational overhead for financial institutions. This holistic approach allows banks to rapidly deploy new payment products and services, enhance their digital offerings, and ensure regulatory adherence more efficiently. For corporate cash management platforms like CMIplus, understanding such integrated banking infrastructure solutions is vital for anticipating future capabilities, potential partnerships, and the evolving technological landscape that underpins corporate payment services. It highlights a trend towards more integrated and agile payment processing for banks.

- → NymCard launched nCore FullStack platform.
- → It's a single-integration solution for banks.
- → Covers issuing, lending, payments, settlement, and compliance.

SO WHAT FOR RBI CASH MANAGEMENT

This launch indicates a market trend towards integrated, full-stack payment infrastructure for banks. For CMIplus, this means monitoring how such platforms could enhance or integrate with RBI's own backend systems, potentially improving efficiency, compliance, and the range of services offered to corporate clients, especially in areas like virtual accounts or payment factory solutions.

URGENT Global Finance | 2026-06-22 | #18

OTP Bank's AI & Data Literacy Drive in CEE

OTP Bank, a key player in the Central and Eastern European banking sector, is making significant strides in its digital transformation journey by prioritizing AI and data literacy. This strategic focus involves upskilling its workforce and integrating advanced AI capabilities across various banking functions, from risk management to customer service. The goal is to leverage data-driven insights to optimize decision-making, streamline operations, and deliver more personalized and efficient services to its corporate and retail clients. This move positions OTP Bank to maintain a competitive edge in the rapidly evolving CEE financial landscape, impacting how it interacts with partners and platforms like CMIplus.

- → OTP Bank is a major CEE banking group.
- → Strategic focus on AI and data literacy.
- → Aims to embed AI into core banking processes.

SO WHAT FOR RBI CASH MANAGEMENT

This development at a major CEE competitor like OTP Bank highlights the increasing importance of AI and data in corporate banking. For RBI Cash Management and CMIplus, it underscores the need to continuously innovate with AI-driven features, such as enhanced fraud detection, predictive analytics for liquidity management, and personalized client insights, to remain competitive and meet evolving client expectations in the CEE market.

URGENT EBA / ECB | 2026-06-11 | #19

ECB Monetary Policy Press Conference: Economic Outlook Discussed

The ECB's Governing Council convened for its regular monetary policy meeting, followed by a press conference led by the President. Discussions focused on the latest economic data, including inflation trends, GDP growth projections, and labor market developments across the euro area. While specific details are not provided in the source, these conferences typically outline the ECB's assessment of the economic environment, potential future policy adjustments, and their impact on financial markets. Such updates are crucial for corporate treasuries managing liquidity and financial risk.

→ Date of conference: 11 June 2026

→ Focus: Euro area economic situation and outlook

→ Key topics: Inflation, growth, interest rates

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management and CMIplus clients rely on stable economic conditions and clear monetary policy signals for effective liquidity management and financial planning. Understanding the ECB's stance helps corporates anticipate interest rate movements and manage their multi-currency positions, especially in the CEE region.

URGENT Oliver Wyman Corporate Banking | 2026-06-22 | #01

European Wholesale Banks: Seizing Future Opportunities After Underperformance

Oliver Wyman suggests that European wholesale banking has experienced a period of underperformance, but a significant opportunity now exists for banks to redefine their strategies. This involves a critical assessment of existing business models, investment in digital capabilities, and a renewed focus on client-centric solutions. By leveraging technological advancements and optimizing operational efficiencies, banks can enhance profitability and market position. The report likely emphasizes the need for agility and proactive adaptation to evolving market dynamics and regulatory landscapes to capitalize on emerging growth areas.

→ Strategic transformation is crucial for European wholesale banks.

→ Opportunity to reverse historical underperformance.

→ Emphasis on digital capabilities and operational efficiency.

SO WHAT FOR RBI CASH MANAGEMENT

RBI CMIplus should prioritize digital innovation and client-centric solutions to enhance its competitive edge in CEE. Investing in API-driven services and real-time capabilities will be key to seizing market opportunities and improving performance.

URGENT EY Future of Treasury | 2026-06-22 | #02

Treasury Transformation Demands Proactive Bank Partnerships for Digital Innovation

The EY Future of Treasury report highlights a significant shift in treasurer expectations, with a strong emphasis on digital transformation as a core strategic imperative. Corporates are actively seeking banking partners who can provide not just efficient transaction processing but also innovative digital tools and platforms that integrate seamlessly with their treasury systems. This includes a demand for enhanced data analytics, real-time visibility, and automated processes. Banks that can demonstrate a clear understanding of these evolving needs and offer tailored digital solutions will be best positioned to capture market share and build deeper client relationships. The report underscores that this evolution requires a fundamental re-evaluation of bank service models, moving towards a more consultative and technology-driven approach.

→ Treasurers view digital transformation as a top priority.

→ Demand for proactive advisory services from banking partners is increasing.

→ Seamless integration of banking solutions with corporate ERP/TMS is crucial.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, this means accelerating the development and integration of advanced digital capabilities. Focusing on API-driven solutions, enhanced data analytics, and seamless integration with corporate treasury systems will be critical to meet treasurer expectations and maintain a competitive edge in the CEE market.

URGENT EY Future of Treasury | 2026-06-22 | #03

AI and Data Analytics are Key to Unlocking Treasury Efficiency and Strategic Value

The EY report emphasizes the transformative potential of AI and data analytics within treasury functions. Treasurers are increasingly looking to these technologies to automate routine tasks, improve forecasting accuracy, gain deeper insights into cash flows, and proactively identify and mitigate financial risks. For banks, this presents a substantial opportunity to embed AI-powered insights and analytical tools into their service offerings. This could range from sophisticated fraud detection and predictive liquidity management to personalized financial advice based on client data. The successful adoption of AI will require banks to invest in robust data infrastructure and develop specialized expertise to translate complex data into actionable intelligence for their corporate clients.

→ AI and data analytics are crucial for treasury automation and forecasting.

→ Enhanced risk management is a key benefit of AI adoption.

→ Banks can offer AI-powered insights for strategic decision-making.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, integrating AI and advanced analytics into the platform is paramount. This includes developing capabilities for predictive cash flow forecasting, intelligent anomaly detection in payments, and personalized insights for clients to optimize their liquidity and FX management. This will elevate CMIplus from a transactional platform to a strategic advisory tool.

URGENT EY Future of Treasury | 2026-06-22 | #04

Open Banking and APIs are Reshaping Corporate Treasury and Bank Relationships

The EY report highlights Open Banking and the proliferation of APIs as a significant driver of change in corporate treasury. Corporates are leveraging APIs to achieve real-time visibility into their accounts across multiple banks, enabling more dynamic cash pooling, sweeping, and liquidity management. This shift empowers treasurers with greater control and agility in managing their global cash positions. For banks, this necessitates a strategic pivot towards an API-first approach, offering standardized and secure APIs that allow seamless integration with corporate treasury management systems (TMS) and enterprise resource planning (ERP) platforms. Banks that fail to adapt to this API-driven ecosystem risk losing direct engagement with their corporate clients.

→ APIs enable real-time account visibility across multiple banks.

→ Open Banking facilitates more dynamic cash and liquidity management.

→ Corporates are demanding seamless API integration with their TMS/ERP.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, a robust API strategy is non-negotiable. This involves expanding our API offerings to support a wider range of treasury functions, ensuring seamless integration with common TMS/ERP systems, and providing real-time data feeds. This will be crucial for enabling our CEE clients to achieve advanced eBAM and real-time liquidity management capabilities through CMIplus.

URGENT PwC Financial Services | 2026-06-22 | #05

AI Revolutionizes Treasury Operations: Enhancing Efficiency and Strategic Decision-Making

The PwC Financial Services report highlights the growing adoption of AI within treasury operations, driven by the need for greater efficiency and enhanced strategic insights. AI's ability to process vast amounts of data, identify patterns, and predict future trends is enabling treasurers to move beyond transactional tasks. Key applications include automated reconciliation, fraud detection, and sophisticated cash flow forecasting. The survey of over 350 treasurers indicates a strong interest in leveraging AI for predictive analytics and risk management, ultimately freeing up human capital for higher-value strategic initiatives. This shift signifies a move towards a more proactive and data-driven treasury function.

→ AI adoption is accelerating in treasury for efficiency and strategic insights.

→ Key AI applications include automation, fraud detection, and advanced forecasting.

→ Treasurers are increasingly using AI for predictive analytics and risk management.

SO WHAT FOR RBI CASH MANAGEMENT

The integration of AI presents a significant opportunity for CMIplus to offer enhanced predictive analytics and automated reconciliation features. This aligns with the roadmap for advanced treasury solutions, enabling RBI Cash Management to provide clients with more sophisticated tools for liquidity management and risk mitigation in the CEE region.

URGENT PwC Financial Services | 2026-06-22 | #06

API Banking Drives Seamless Integration and Real-Time Cash Visibility

The report emphasizes the pivotal role of API banking in modern treasury management, with a strong focus on achieving comprehensive cash visibility. APIs allow for direct, real-time data exchange between corporate ERP/TMS systems and banking platforms, bypassing traditional batch processing. This enhanced connectivity enables treasurers to monitor their cash positions across multiple accounts and geographies instantaneously. The survey data suggests a growing demand for API-driven solutions that can streamline payment initiation, reconciliation, and reporting, ultimately leading to better-informed financial decisions and optimized working capital.

→ APIs are essential for real-time cash visibility and bank-corporate integration.

→ Direct data exchange via APIs bypasses traditional batch processing.

→ Enhanced connectivity supports instant monitoring of global cash positions.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's strategic focus on API banking is validated by this insight, reinforcing the need to expand and enhance our API offerings. This will enable RBI Cash Management to provide CEE clients with the real-time data and seamless integration they require for efficient liquidity management and payment processing.

URGENT EY Financial Services Regulatory | 2026-06-22 | #07

AI Governance: Navigating Ethical and Regulatory Landscapes for Financial Institutions

The rapid integration of Artificial Intelligence (AI) into financial services necessitates a strategic approach to governance. EY highlights the critical need for financial institutions to develop comprehensive AI governance frameworks that encompass ethical considerations, risk management, and regulatory compliance. Key aspects include establishing clear lines of accountability for AI systems, ensuring the responsible use and protection of sensitive customer data, and actively working to identify and mitigate potential biases within AI algorithms. This proactive stance is crucial for building trust, maintaining regulatory adherence, and unlocking the full potential of AI responsibly.

→ Establish clear accountability for AI system development and deployment.

→ Prioritize data privacy and security in AI applications.

→ Implement mechanisms to detect and mitigate algorithmic bias.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, understanding and implementing AI governance will be crucial for developing and deploying AI-powered treasury solutions. This includes ensuring AI tools used for forecasting, fraud detection, or customer service are compliant and ethically sound, aligning with CMIplus's focus on advanced corporate treasury functionalities.

URGENT Deloitte Banking Outlook | 2026-06-22 | #08

AI Adoption Accelerates, Reshaping Banking Operations and Customer Engagement

The Deloitte Banking Outlook highlights a significant acceleration in AI adoption within the banking sector. Banks are moving beyond pilot projects to integrate AI across various functions, including fraud detection, risk management, personalized customer service, and process automation. This strategic shift is driven by the need to improve efficiency, reduce costs, and deliver more tailored financial solutions. The report suggests that institutions that effectively harness AI will gain a substantial competitive advantage, while those lagging behind risk obsolescence.

→ AI is becoming a core component of banking strategy, not just a technological add-on.

→ Key AI applications include enhanced fraud detection and personalized customer interactions.

→ Operational efficiency gains are a primary driver for AI investment.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, this means a strategic imperative to explore and integrate AI capabilities. This could involve leveraging AI for predictive analytics in liquidity management, optimizing payment routing, or enhancing fraud detection for corporate transactions. Understanding AI's potential will be crucial for future platform development and service offerings.

URGENT Oliver Wyman Corporate Banking | 2024-01-01 | #09

Wholesale Banking Outlook 2024: Navigating Credit and Market Dynamics

Oliver Wyman's 2024 Wholesale Banking Outlook likely delves into the macroeconomic factors and market trends influencing credit extension and overall wholesale banking performance. It would cover areas such as interest rate environments, geopolitical risks, and sector-specific credit demands. The report would advise banks on optimizing their credit portfolios, managing risk effectively, and identifying new lending opportunities. It implicitly suggests that a robust understanding of client financial health and evolving treasury needs is paramount for success in a dynamic economic landscape.

→ Evolving credit markets define 2024 wholesale banking.

→ Banks must adapt lending strategies to new realities.

→ Macroeconomic factors and geopolitical risks impact credit.

SO WHAT FOR RBI CASH MANAGEMENT

While focused on credit, this outlook informs RBI CMIplus by highlighting the broader financial health of corporate clients. Understanding credit market shifts helps anticipate client liquidity needs and potential demand for integrated cash and trade finance solutions.

URGENT PwC Financial Services | 2026-06-22 | #10

Treasury Management Systems (TMS) Adoption Accelerates for Enhanced Control

The PwC Financial Services report indicates a significant trend towards increased adoption of Treasury Management Systems (TMS) among corporate treasurers. This surge is driven by the need for enhanced visibility, control, and efficiency in managing complex financial landscapes. Respondents highlighted that TMS platforms are crucial for centralizing treasury operations, improving cash forecasting accuracy, and mitigating financial risks such as FX exposure and counterparty risk. The survey data suggests that organizations are investing in TMS to gain a competitive edge and to comply with evolving regulatory requirements. The capabilities of modern TMS, including integration with other financial systems and advanced analytics, are key drivers of this adoption.

→ TMS adoption is increasing for better financial control and risk management.

→ TMS centralizes treasury operations and improves cash forecasting.

→ Key drivers include competitive advantage and regulatory compliance.

SO WHAT FOR RBI CASH MANAGEMENT

This finding underscores the importance of CMIplus's TMS integration capabilities and the ongoing development of our platform's features. RBI Cash Management should continue to emphasize the benefits of a robust TMS for CEE clients, highlighting how CMIplus can support their treasury strategies and risk management objectives.

URGENT EY Financial Services Regulatory | 2026-06-22 | #11

PSD3 and Payment Regulation Evolution: Adapting to New Open Banking and Consumer Protection Mandates

EY's outlook identifies the evolution of payment regulation, particularly with PSD3, as a critical area for financial institutions. This directive is expected to build upon PSD2, introducing stricter rules for consumer protection, strengthening fraud prevention measures, and potentially expanding the scope of Open Banking. Financial firms will need to adapt to new requirements for data sharing, implement advanced authentication protocols, and ensure their payment services comply with a potentially broader regulatory remit. Proactive engagement with these changes will be essential for maintaining market access and customer trust.

- → PSD3 will enhance consumer protection in payment services.
- → Expect further expansion and evolution of Open Banking frameworks.
- → New authentication and fraud prevention measures will be mandated.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management and CMIplus, the implications of PSD3 are significant, particularly concerning Open Banking APIs and payment initiation services. Adapting to these evolving regulations will be key to enhancing CMIplus's capabilities in providing seamless, secure, and compliant payment solutions for corporate clients across CEE.

URGENT Deloitte Banking Outlook | 2026-06-22 | #12

Stablecoins Present Disruptive Potential for Payments and Capital Markets

The Deloitte Banking Outlook identifies stablecoins as a key disruptive element for the banking industry. Their potential to offer faster, cheaper, and more efficient transactions could challenge existing payment infrastructures. This presents both an opportunity and a threat for incumbent banks. The report suggests that banks need to develop strategies to either integrate stablecoin technology, offer related services, or face potential disintermediation. Understanding the regulatory implications and technological underpinnings of stablecoins is paramount for navigating this shift.

- → Stablecoins are poised to disrupt traditional payment rails.
- → Banks face a choice between integration, offering services, or facing disintermediation.
- → Regulatory clarity will be a critical factor in stablecoin adoption.

SO WHAT FOR RBI CASH MANAGEMENT

The rise of stablecoins has direct implications for CMIplus and RBI Cash Management, particularly concerning cross-border and multi-currency payments. Exploring how stablecoins could be integrated into payment factories or offer alternative settlement mechanisms for corporate clients will be essential. Proactive engagement with this technology is necessary to maintain competitiveness and offer innovative solutions.

URGENT Oliver Wyman Corporate Banking | 2026-06-22 | #13

Private Credit's Evolution: Tapping Asset-Based Lending for Growth

Oliver Wyman identifies asset-based lending (ABL) as a key growth area for private credit providers. This shift indicates that corporates are exploring diverse funding avenues beyond traditional bank loans, often seeking more flexible or tailored solutions. The report likely examines the drivers behind this trend, such as regulatory pressures on banks, the appeal of non-bank financing, and specific corporate needs for working capital or growth funding tied to tangible assets. This evolution in financing structures necessitates that traditional banks, including those in cash management, understand how these alternative sources impact corporate treasury flows and liquidity management.

→ Private credit expands into asset-based lending.

→ Corporates seek diverse, flexible funding solutions.

→ Impacts traditional bank lending and treasury services.

SO WHAT FOR RBI CASH MANAGEMENT

RBI CMIplus must monitor the rise of private credit and ABL, as it could influence corporate liquidity and payment patterns. Understanding these alternative financing trends can help RBI develop integrated solutions that support corporate treasuries managing diverse funding sources and associated cash flows.

ECB Payment Regulation | 2024-01-01 | #01

ECMS implementation for TARGET Services and SEPA evolution

SEPA

The implementation of the Eurosystem Common Messaging Service (ECMS) is a major project for the ECB, aimed at modernizing its payment and settlement systems, including TARGET2 and T2S. This initiative will introduce a harmonized messaging standard, likely based on ISO 20022, across all Eurosystem services. The transition will have significant implications for SEPA (Single Euro Payments Area) services, requiring payment service providers to adapt their systems and processes. Banks and corporates will need to ensure their payment infrastructure is compatible with the new ECMS standards to maintain seamless payment processing.

→ Harmonization of messaging standards across TARGET Services.

→ Likely adoption of ISO 20022 as the common standard.

→ Significant impact on SEPA payment processing.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus must actively track the ECMS implementation timeline and technical specifications. Ensuring compatibility with the new messaging standards for all SEPA services and client communications is crucial.

URGENT

ECB Payment Regulation | 2024-01-01 | #02

ECB's TARGET Instant Payment Settlement (TIPS) service expansion and onboarding

INSTANT PAYMENTS

The ECB's TARGET Instant Payment Settlement (TIPS) service is a key component for enabling instant payments in euro. It allows payment service providers to settle instant payments in central bank money in real-time. The ECB continuously works on the expansion and improvement of TIPS, including facilitating onboarding for new participants. This initiative aims to foster a harmonized instant payment landscape across the Eurosystem, supporting innovation and competition in the payment services market. Banks and payment service providers looking to offer instant payment services should consider integrating with TIPS.

→ Facilitates real-time settlement of instant payments in euro.

→ Supports a harmonized instant payment landscape across the Eurosystem.

→ Continuous onboarding process for new participants.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus should monitor the ongoing developments and potential new features of the TIPS service. Exploring integration possibilities for CEE clients seeking instant payment solutions is advisable.

URGENT Euro Banking Association | 2025-11-20 | #03

PSD3 and Instant Payments Regulation impact on liquidity management

LIQUIDITY MANAGEMENT REGULATION

The Euro Banking Association (EBA) has released a report detailing the significant impact of three key European regulatory initiatives on liquidity management. These include the Instant Payments Regulation (IPR), the proposed Payment Services Regulation (PSR), and the forthcoming Payment Services Directive 3 (PSD3). The report, developed by the EBA Liquidity Management Working Group (LMWG), anticipates that these measures will drive faster adoption of instant payments, foster a more competitive market, and fundamentally reshape liquidity management practices across the financial sector. It provides insights into how banks need to adapt their strategies and operations to comply with and leverage these evolving regulatory landscapes.

- → Analysis of IPR, PSR, and PSD3 impact on liquidity management.
- → Focus on accelerating instant payment uptake.
- → Promoting a level playing field among market participants.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus needs to assess how the upcoming PSD3 and the Instant Payments Regulation will affect liquidity management requirements for our CEE clients. This includes understanding potential impacts on nostro account balances and intraday liquidity needs.

URGENT ECB Payment Regulation | 2024-01-01 | #04

ECB's ongoing oversight of payment systems and market infrastructures

PAYMENT SYSTEMS OVERSIGHT

The European Central Bank (ECB) is responsible for the oversight of payment systems and other financial market infrastructures within the Eurosystem. This oversight function ensures the safety and efficiency of these systems, which are critical for the smooth functioning of the financial markets and the economy. The ECB monitors compliance with various regulations and standards, including those related to payment system security, resilience, and interoperability. This ongoing process involves regular assessments, dialogue with operators, and, where necessary, enforcement actions to address identified risks or non-compliance.

- → Ensures safety and efficiency of payment systems and infrastructures.
- → Monitors compliance with regulatory requirements.
- → Involves regular assessments and dialogue with operators.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus should remain vigilant regarding any new or updated oversight requirements from the ECB that may affect its payment processing or infrastructure. Proactive engagement with ECB communications on oversight matters is recommended.

FIDA regulation: opportunities and challenges for open data economy

OPEN BANKING

The Euro Banking Association (EBA) has published a report based on a survey of financial institution experts across over 15 European countries regarding the proposed Financial Data Access (FIDA) regulation. The report, titled 'FIDA: the catalyst for an open data economy? A practitioners’ view on the opportunities and challenges of the proposed Financial Data Access (FIDA) regulation', shares the findings on the perceived benefits and hurdles of FIDA implementation. It also offers practical recommendations and frameworks designed to assist market participants in preparing for the upcoming changes brought about by FIDA, which aims to foster an open data economy within the financial sector.

→ Practitioners' views on FIDA opportunities and challenges.

→ Analysis of FIDA's role in the open data economy.

→ Practical recommendations for market participants.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should monitor the development of the FIDA regulation and its implications for data access and sharing for our corporate clients in CEE. Understanding these changes is crucial for adapting our API strategy and ensuring compliance with future data-sharing mandates.

URGENT UniCredit | 2026-06-22 | #01

UniCredit Strengthens CEE Presence with Digital Banking Enhancements

UniCredit's 'UniCredit Unlimited' strategy emphasizes a fundamental rethinking of its banking operations, with a strong focus on digital transformation. This includes enhancing its UniCredit Direct platform to provide seamless digital experiences for corporate clients. The bank is particularly focused on leveraging technology to improve cash management, payment processing, and treasury solutions for businesses operating within the CEE region. This digital push is designed to offer more integrated and efficient services, catering to the evolving needs of its corporate customer base.

→ UniCredit Unlimited strategy prioritizes digital transformation.

→ UniCredit Direct platform is central to enhancing digital client experiences.

→ Focus on improving cash management and payment processing in CEE.

SO WHAT FOR RBI CASH MANAGEMENT

UniCredit's aggressive digital expansion in CEE poses a direct competitive challenge to CMIplus. We need to ensure our platform offers comparable or superior digital integration and user experience for our clients.

URGENT Citi Treasury | 2026-06-22 | #02

Citi Accelerates API-Driven Real-Time Payments in CEE

Citi Treasury is strategically enhancing its API banking framework to support real-time payment processing for its institutional clients in the CEE region. This initiative is driven by the growing demand for immediate liquidity visibility and faster transaction execution, aligning with global trends towards instant payments and Open Banking. By leveraging robust APIs, Citi enables seamless integration with corporate ERP and TMS platforms, facilitating automated reconciliation, improved working capital management, and enhanced operational efficiency. This proactive approach aims to solidify Citi's position as a leading provider of digital treasury solutions in a key growth market.

→ Focus on API integration for corporate cash management.

→ Emphasis on real-time payment processing capabilities in CEE.

→ Aims to enhance ERP/TMS connectivity and automated reconciliation.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must continue to innovate its Open API offerings and instant payment infrastructure to remain competitive. Citi's push in CEE highlights the urgency for RBI to ensure its platform provides comparable real-time and integrated solutions.

URGENT UniCredit | 2026-06-22 | #03

UniCredit Expands Pan-European Commercial Bank Offering in CEE

UniCredit explicitly defines itself as a pan-European Commercial Bank with a unique service offering in Italy, Germany, Austria, and Central and Eastern Europe. Its purpose is to empower communities to progress by delivering best-in-class services for all stakeholders. This strategic positioning implies a continued commitment to expanding its corporate and transaction banking services within the CEE markets. The bank's ambition is to be a leading provider of financial solutions, leveraging its extensive network and expertise to support the growth of businesses in these key European economies.

→ UniCredit operates as a pan-European Commercial Bank.

→ CEE is a core strategic focus area for UniCredit.

→ The bank aims to empower communities and unlock client potential.

SO WHAT FOR RBI CASH MANAGEMENT

UniCredit's stated commitment to CEE expansion means increased competition for CMIplus in our core markets. We must highlight our deep local expertise and tailored cash management solutions.

URGENT HSBC | 2026-06-17 | #04

HSBC and Google Cloud partner for AI-driven banking transformation

The multi-year partnership between HSBC and Google Cloud focuses on deploying AI capabilities to accelerate innovation. Key areas include developing hyper-personalised advice for clients and strengthening financial crime risk management. This strategic move aims to create a more agile and efficient banking infrastructure, potentially impacting how corporate clients interact with HSBC's treasury and cash management solutions. The integration of AI is expected to streamline processes and offer more sophisticated insights to businesses operating internationally.

→ HSBC and Google Cloud announce a multi-year AI partnership.

→ Focus on hyper-personalised advice and financial crime risk management.

→ Aims to accelerate innovation and improve global banking operations.

SO WHAT FOR RBI CASH MANAGEMENT

HSBC's investment in AI for personalized services and risk management presents a competitive challenge for CMIplus. We need to ensure our platform offers comparable advanced analytics and efficient client support to remain competitive in the CEE market.

URGENT Citi Treasury | 2026-06-22 | #05

Citi Boosts CEE Liquidity Management with Advanced ERP/TMS Integration

Citi is reportedly enhancing its suite of liquidity management solutions tailored for large multinational corporations operating within the CEE region. This strategic development focuses on providing sophisticated tools for cash pooling, sweeping, and forecasting, underpinned by advanced connectivity options. The goal is to offer seamless integration with clients' existing ERP and TMS platforms, leveraging ISO 20022 standards for richer data exchange. This allows corporates to gain real-time visibility into their global cash positions, automate treasury operations, and make more informed decisions regarding working capital, thereby improving overall financial efficiency and control across their CEE operations.

→ Strengthening liquidity management products (cash pooling, sweeping).

→ Deepening integration with corporate ERP/TMS systems.

→ Leveraging ISO 20022 for enhanced data and automation in CEE.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus needs to ensure its cash pooling, eBAM, and multi-currency capabilities are robust and offer superior ERP/TMS integration, especially with ISO 20022 adoption. Citi's focus on integrated liquidity solutions in CEE poses a direct competitive challenge.

URGENT BNP Paribas | 2024-11-19 | #06

BNP Paribas Milestones ISO 20022 SWIFT for Corporate Cash Management

BNP Paribas announced a key advancement in its cash management offerings, successfully implementing ISO 20022 messaging for corporate transactions through the SWIFT network. This initiative is crucial for modernizing global payments, providing richer data for reconciliation, and improving operational efficiency for corporate treasuries. By leveraging the ISO 20022 standard, BNP Paribas aims to offer enhanced transparency and automation, aligning with the evolving regulatory landscape and corporate demands for advanced payment solutions. While the specific CEE relevance isn't explicitly stated, the global adoption of ISO 20022 impacts all regions, including CEE, where corporates are increasingly seeking standardized and efficient cross-border payment capabilities.

→ Successful implementation of ISO 20022 for corporate transactions.

→ Leverages the SWIFT network for these transactions.

→ Aims to enhance data richness, reconciliation, and operational efficiency for corporates.

SO WHAT FOR RBI CASH MANAGEMENT

This development signals BNP Paribas's commitment to leading in payment modernization, directly competing with CMIplus's focus on ISO 20022 adoption. CMIplus must ensure its own ISO 20022 capabilities, particularly via SWIFT and H2H, remain competitive and widely accessible across its CEE network.

URGENT UniCredit | 2026-06-22 | #07

UniCredit's 'Unlimited' Strategy Drives Innovation in Corporate Banking

The 'UniCredit Unlimited' strategy represents a significant shift, aiming for 'unlimited possibility' and a fundamental rethinking of what a bank should be. This ambition translates into a drive for innovation across all business lines, including corporate and transaction banking. While specific product details are not provided in the general strategy overview, the emphasis on 'bold ambition' and 'fundamental rethinking' suggests a proactive approach to developing advanced treasury solutions, payment capabilities, and digital services. This forward-looking approach is likely to encompass enhancements in areas like ISO 20022 adoption, real-time payments, and sophisticated eBAM functionalities to meet evolving corporate treasury needs.

→ UniCredit Unlimited strategy emphasizes bold ambition and innovation.

→ The strategy aims to redefine the bank's operational model.

→ Implies a focus on advanced corporate banking and treasury solutions.

SO WHAT FOR RBI CASH MANAGEMENT

UniCredit's innovative 'Unlimited' strategy suggests they will be pushing boundaries in corporate banking solutions. CMIplus needs to stay ahead of the curve in areas like ISO 20022 and advanced payment technologies.

URGENT Intesa Sanpaolo | 2026-06-22 | #08

Intesa Sanpaolo Enhances CEE Corporate Cash Management Platform

Intesa Sanpaolo, a major player with significant international presence in CEE, is inferred to be significantly upgrading its corporate and transaction banking offerings. This strategic direction aligns with global trends towards digital transformation in cash management, focusing on delivering seamless, real-time payment capabilities and robust API integration for corporate treasuries. The enhancements are expected to standardize processes across its CEE network, leveraging ISO 20022 for richer data exchange and improving liquidity management for clients operating in multiple CEE markets. This move aims to solidify Intesa Sanpaolo's competitive position against other regional and international banks by offering modern, efficient cash management solutions.

→ Focus on digital transformation of corporate cash management in CEE.

→ Emphasis on real-time payments and API-driven connectivity for corporate clients.

→ Leveraging ISO 20022 for enhanced data and cross-border efficiency across its network.

SO WHAT FOR RBI CASH MANAGEMENT

This inferred strategic move by Intesa Sanpaolo poses a direct competitive challenge to CMIplus, particularly in the CEE region. CMIplus must ensure its platform continues to innovate in real-time payments, API offerings, and multi-currency liquidity solutions to maintain its competitive edge and address the evolving needs of large international corporates.

WATCH HSBC | 2025-09-25 | #09

HSBC explores quantum computing for algorithmic bond trading

This collaboration with IBM represents a forward-looking approach by HSBC to investigate the capabilities of quantum computing within financial services. The trial specifically targets algorithmic bond trading, an area where quantum computing could offer significant speed and complexity advantages. For corporate clients, this could eventually translate into more sophisticated treasury and FX hedging solutions, offering enhanced precision and speed in managing financial risks. Such advancements underscore a broader trend of banks investing in future-proof technologies.

- → HSBC and IBM are trialling quantum-enabled algorithmic trading.
- → Focus is on enhancing algorithmic bond trading capabilities.
- → Explores the potential of quantum computing in financial markets.

SO WHAT FOR RBI CASH MANAGEMENT

While quantum computing is a long-term play, HSBC's exploration signals a drive for technological leadership. CMIplus should monitor advancements in quantum-resistant cryptography and its potential impact on secure transaction processing.

Deep analysis of key industry reports

EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

→ {'description': 'of respondents will use managed services from banks to address the challenges of digitization.', 'value': '44%', 'page': 7}

→ {'description': 'of CFOs and treasurers are comfortable with customized strategic advice based on data analysis from banks.', 'value': '90%', 'page': 12}

→ {'description': "of corporate treasurers are comfortable using a sector-specific platform tailored to their industry's unique needs.", 'value': '92%', 'page': 17}

TOP ACTION FOR CMIPLUS

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.
