EU Instant Payments Regulation: Final Countdown for Banks

The EU Instant Payments Regulation mandates that all payment service providers (PSPs) in the Eurozone must offer instant credit transfers for both receiving and sending transactions by early 2027. The regulation, which came into force in April 2024, set a nine-month deadline for receiving instant payments and an 18-month deadline for sending them. This means banks must be ready to receive instant payments by January 2025 and send them by October 2025. For non-Eurozone EU member states, the deadlines are extended by two years. The regulation also requires PSPs to verify the payee's identity (VoP) to combat fraud, adding another layer of complexity to implementation.

→ EU Instant Payments Regulation effective April 2024.

→ Eurozone banks must receive instant payments by January 2025.

→ Eurozone banks must send instant payments by October 2025.

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is critical for CMIplus, impacting all SEPA-participating banks in RBI's network. RBI must ensure its CEE network banks are fully compliant with the deadlines for both receiving and sending instant payments, including the VoP requirement, to maintain seamless service for corporate clients.

URGENT Der Treasurer | 2026-09-28 | #02

ISO 20022 Evolution: EBICS 3.0 Adoption Accelerates

While ISO 20022 has been mandatory for SEPA payments for years, its potential for richer data exchange in cross-border and domestic non-SEPA payments is now being actively explored and implemented by corporates and banks. This includes enhanced remittance information and structured data for reconciliation. Concurrently, EBICS 3.0, with its improved security features and support for larger file sizes and more complex message types, is gaining traction. This standard is crucial for corporates in Germany and parts of CEE for host-to-host connectivity, enabling automated and secure communication with multiple banks, aligning perfectly with the advanced data structures of ISO 20022.

→ ISO 20022 adoption extends beyond basic SEPA.

→ Focus on richer data for reconciliation and cross-border payments.

→ EBICS 3.0 offers enhanced security and larger file support.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus already supports ISO 20022 and EBICS v2.5/v3. This trend reinforces the need for RBI to continuously enhance its platform to fully leverage ISO 20022's data capabilities and ensure robust EBICS 3.0 integration across its CEE network, providing advanced treasury solutions to clients.

URGENT Der Treasurer | 2026-10-05 | #03

PSD3 Proposals Shape Future of Open Banking

PSD3 is set to replace PSD2, addressing shortcomings in fraud prevention, especially for instant payments, and improving consumer control over data. Key changes include stricter requirements for strong customer authentication (SCA) and enhanced information sharing between banks and payment service providers to detect fraudulent transactions. Alongside PSD3, the FIDA framework will enable customers to share their financial data with a broader range of financial institutions and fintechs, fostering innovation in areas like lending and financial management. These legislative changes will drive further standardization of APIs and require banks to invest in robust infrastructure to support secure data sharing and new service offerings.

→ PSD3 aims to replace PSD2, focusing on fraud and consumer protection.

→ Stricter SCA requirements and enhanced fraud detection.

→ Financial Data Access (FIDA) framework expands data sharing beyond payments.

SO WHAT FOR RBI CASH MANAGEMENT

PSD3 and FIDA will profoundly influence RBI's Open Banking strategy and API development for CMIplus. RBI must prepare for new compliance requirements, particularly around fraud prevention and data sharing, and seize opportunities to offer innovative API-driven services to corporate clients across CEE.

URGENT The Global Treasurer | 2026-10-19 | #04

EU Instant Payments Regulation: CEE Banks Face Implementation Deadlines

The EU's Instant Payments Regulation aims to make instant payments universally available and affordable across the SEPA region. This regulation requires payment service providers (PSPs) to offer instant credit transfers in EUR, process them within 10 seconds, and ensure charges are no higher than standard credit transfers. For CEE banks, this means significant upgrades to their payment infrastructure and adherence to strict timelines for both sending and receiving instant payments. The regulation also includes provisions for robust fraud prevention and verification of payee (VoP) services, which are critical for corporate clients. Non-compliance could lead to penalties, emphasizing the urgency for full integration.

→ Mandatory instant payments across SEPA by deadline.

→ 10-second processing time for EUR credit transfers.

→ No higher charges than standard transfers allowed.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full compliance with the EU Instant Payments Regulation, particularly for its CEE network banks. This involves supporting real-time processing, implementing VoP features, and leveraging ISO 20022 for richer data, enhancing service for corporate clients.

URGENT The Global Treasurer | 2026-10-19 | #05

Open Banking APIs Transform Corporate Treasury and Cash Management

While initially driven by PSD2 for retail banking, Open Banking's potential for corporate treasury is rapidly expanding. New API standards and frameworks allow corporates to integrate their TMS/ERP systems directly with bank accounts, enabling real-time access to balances, transaction data, and initiation of payments. This shift supports sophisticated cash pooling, automated reconciliation, and enhanced liquidity management. For platforms like CMIplus, leveraging these APIs means offering richer, more integrated services to multinational corporates, particularly those operating across diverse CEE markets. The move towards PSD3 is expected to further solidify and expand these capabilities, making API-driven treasury operations a new standard.

→ Open Banking extends beyond PSD2 to corporate treasury.

→ APIs enable real-time cash visibility and automation.

→ Supports advanced cash pooling and reconciliation.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus can capitalize on the growing adoption of Open Banking APIs by enhancing its connectivity options for corporate clients. Integrating with more bank APIs across CEE will provide superior real-time data, eBAM functionalities, and payment initiation, strengthening its position as a leading cash management platform.

URGENT The Global Treasurer | 2026-10-19 | #06

Enhanced Fraud Prevention Critical for CEE Corporate Payments Security

Corporate payment fraud, including invoice fraud and business email compromise (BEC), continues to pose a significant threat, with financial losses increasing globally. In the CEE region, where digital transformation is accelerating, robust fraud prevention mechanisms are paramount. Regulators are pushing for enhanced security protocols, including multi-factor authentication, real-time transaction monitoring, and AI-driven anomaly detection. The upcoming PSD3 is expected to introduce stricter requirements for payment service providers regarding fraud detection and liability. CMIplus, serving large international corporates, must integrate state-of-the-art fraud prevention tools and educate clients on best practices to safeguard multi-currency payments and maintain trust.

→ Corporate payment fraud remains a significant threat.

→ CEE region requires robust, localized prevention.

→ Regulatory push for multi-factor authentication and AI.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize integrating advanced fraud prevention features, such as real-time monitoring and AI-driven analytics, into its platform. This is crucial for protecting CEE corporate clients from evolving threats and ensuring compliance with future regulations like PSD3, reinforcing the platform's security credentials.

URGENT Strategic Treasurer | 2026-10-10 | #07

EU Instant Payments Mandate Transforms Corporate Cash Management

The EU's new Instant Payments Regulation, effective early 2026, compels all payment service providers in the EU and EEA to offer instant credit transfers in Euro, with funds credited within 10 seconds, 24/7/365. This move aims to modernize the European payment landscape, reduce friction, and enhance liquidity for businesses. For corporates, this means faster access to funds, improved working capital management, and the need to adapt internal systems and processes to leverage real-time capabilities. Banks, including those in the CEE region like RBI, are under pressure to upgrade their infrastructure to comply with the regulation, which also includes provisions for fraud prevention and fee transparency. The regulation's phased implementation requires readiness for both sending and receiving instant payments.

→ Mandates instant Euro credit transfers within 10 seconds.

→ Applies 24/7/365 across EU/EEA.

→ Banks must upgrade infrastructure for compliance.

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is critical for RBI Cash Management and CMIplus, necessitating full compliance and offering instant payment capabilities to corporate clients across CEE. It presents an opportunity to enhance CMIplus's real-time payment processing and liquidity management features, aligning with client expectations for faster transactions.

URGENT Strategic Treasurer | 2026-09-28 | #08

PSD3 and Open Banking: New Era for Corporate Connectivity

The European Commission's ongoing review of PSD2 and the anticipated PSD3 framework are set to expand the scope of Open Banking, potentially introducing new services like premium APIs and more granular consent management. For corporate treasurers, this means greater opportunities for integrated cash management, improved visibility across bank accounts, and more efficient payment processing through direct API connections. PSD3 is expected to address current limitations of PSD2, such as inconsistent API standards and varying levels of bank adoption, aiming for a more harmonized and robust ecosystem. This regulatory evolution will push banks to further invest in their API capabilities and collaborate with fintechs to offer innovative solutions, particularly relevant for international corporates operating in diverse CEE markets.

→ PSD3 aims to expand Open Banking scope beyond PSD2.

→ Focus on enhanced data sharing and premium APIs.

→ Expected to improve multi-bank connectivity for corporates.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management and CMIplus must actively monitor PSD3 developments to ensure future compliance and strategically evolve its Open API offerings. This presents an opportunity to strengthen CMIplus's position as a leading platform for integrated corporate treasury, offering advanced API-driven services and deeper connectivity for CEE clients.

URGENT Strategic Treasurer | 2026-09-15 | #09

AI Revolutionizes Treasury: Fraud Prevention and Efficiency Gains

Corporate treasuries are leveraging AI and machine learning to analyze vast datasets, identify anomalous payment patterns indicative of fraud, and predict cash flows with greater accuracy. Beyond fraud detection, AI-powered tools are automating reconciliation, optimizing cash pooling structures, and providing real-time insights into liquidity positions. This allows treasury teams to shift from reactive tasks to strategic decision-making. While the adoption is still evolving, particularly in some CEE markets, the benefits in terms of reduced operational costs, enhanced security, and improved working capital are compelling. The integration of AI capabilities into existing treasury management systems (TMS) and banking platforms is a key trend, requiring robust data infrastructure and skilled personnel.

→ AI enhances fraud prevention through pattern analysis.

→ Optimizes liquidity and automates reconciliation.

→ Reduces operational costs and improves security.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should explore integrating AI capabilities into the CMIplus platform, particularly for advanced fraud detection, cash flow forecasting, and automated reconciliation services. This would provide significant added value to corporate clients in CEE, enhancing security and operational efficiency within their cash management operations.

URGENT EBA / ECB | 2026-10-19 | #10

ECB Advances Digital Euro Project: Pilot and Scheme Rulebook

The ECB is deeply engaged in the digital euro project, outlining its purpose, operational mechanics, and privacy considerations. Key aspects include an innovation platform, pilot programs, and a detailed timeline for progress, signaling a clear path towards potential implementation. The project also involves extensive governance, stakeholder engagement, and the publication of technical documents, research, and a comprehensive scheme rulebook to guide its implementation and future use. This ongoing work is crucial for shaping the future of European retail payments, impacting how transactions will be conducted across the euro area. The initiative aims to provide a secure and efficient digital form of central bank money.

→ Project includes an 'Innovation platform' and 'Pilot' phase.

→ 'Timeline and progress' indicates ongoing development.

→ A 'Scheme rulebook' is being developed to guide implementation.

SO WHAT FOR RBI CASH MANAGEMENT

The digital euro represents a significant future shift in payment infrastructure. RBI CMIplus must monitor its development closely to understand potential integration requirements, new payment rails, and opportunities for corporate clients, especially regarding multi-currency payments and liquidity management.

URGENT EBA / ECB | 2026-10-19 | #11

ECB Reinforces Commitment to Instant Payments Across Europe

Instant payments are highlighted as a key area within the ECB's broader retail payments strategy, alongside SEPA. The ECB acts as a catalyst for their adoption and widespread use, recognizing their potential to modernize the European payment landscape. While no specific new regulation is announced, the continuous mention signifies an ongoing push for market participants to adopt and enhance instant payment capabilities. This strategic emphasis impacts all financial institutions and corporate clients operating within the SEPA zone, including those in CEE. The goal is to achieve full reach and seamless execution of instant payments across Europe.

→ 'Instant payments' listed as a key topic under 'Retail payments'.

→ ECB acts 'as a catalyst' for retail payments strategy.

→ Part of the broader 'SEPA' framework for euro area transactions.

SO WHAT FOR RBI CASH MANAGEMENT

This reinforces the strategic importance of instant payments for CMIplus. RBI must ensure its platform fully supports instant payment capabilities, including ISO 20022 messaging, to meet evolving client demands and regulatory expectations across its CEE network.

URGENT Finextra | 2026-10-16 | #12

Payments 2030: Finextra & ACI Worldwide Launch Global Outlook Report

The newly published 'Payments 2030: The Payoff Year' report, a collaboration between Finextra and ACI Worldwide, provides a comprehensive analysis of the global payments industry's trajectory towards 2030. It aims to equip financial institutions with the knowledge needed to navigate upcoming changes, including the continued adoption of ISO 20022, the expansion of instant payments, and the implications of open banking. The report likely covers technological advancements, regulatory shifts, and evolving customer expectations, offering a roadmap for strategic investment and product development in the coming years. Its findings are essential for understanding the competitive landscape and identifying opportunities for innovation in payment services.

→ Report title: ‘Payments 2030: The Payoff Year’

→ Collaborators: Finextra and ACI Worldwide

→ Purpose: Help financial institutions prepare for 2030 payment trends

SO WHAT FOR RBI CASH MANAGEMENT

This report is highly relevant for RBI Cash Management and the CMIplus platform as it provides a strategic outlook on the future of payments. Insights into ISO 20022, instant payments, and open banking will directly inform CMIplus's product roadmap, technology investments, and compliance strategies to remain competitive and meet client demands in CEE.

URGENT The Paypers | 2026-10-19 | #13

Digital Euro and A2A Payments: Europe's Future Payment Landscape

Christian Hartmann of Roland Berger and Milko Filipov of valantic delve into the implications of the digital euro for European payments. They analyze how the digital euro, as a central bank digital currency, will interact with and potentially transform the rapidly growing A2A payment ecosystem. The discussion likely covers regulatory frameworks, interoperability with SEPA and instant payments, potential use cases for corporates and consumers, and the competitive landscape for commercial banks. Key considerations include privacy, security, and the role of intermediaries in a digital euro environment, as well as the timeline for its potential rollout and impact on cross-border transactions within the CEE region.

→ Focus on the digital euro's impact on European A2A payments.

→ Discussion led by experts from Roland Berger and valantic.

→ Explores regulatory frameworks and interoperability with existing systems.

SO WHAT FOR RBI CASH MANAGEMENT

The digital euro's development is critical for RBI Cash Management, as it will fundamentally alter the European payment infrastructure and regulatory environment. CMIplus must prepare for potential integration requirements, new payment rails, and evolving client demands for digital currency services, especially concerning A2A payments and cross-border transactions within CEE.

URGENT The Paypers | 2026-10-16 | #14

ISX Financial, Mastercard Partner for Cross-Border A2A Payments

The partnership between ISX Financial and Mastercard focuses on developing and expanding solutions for cross-border A2A payments. This initiative is significant as it addresses the growing demand for faster, more efficient, and transparent international money movement, bypassing traditional card networks in some instances. The collaboration will likely involve integrating ISX Financial's payment technology with Mastercard's extensive global network, potentially leading to new offerings for businesses and consumers engaged in international trade. For the CEE region, this could mean improved speed and cost-efficiency for multi-currency payments and treasury operations, aligning with the broader trend towards real-time and instant payment infrastructures.

→ ISX Financial and Mastercard form a strategic partnership.

→ Focus is on enhancing cross-border Account-to-Account (A2A) payments.

→ Aims to streamline international transactions and improve efficiency.

SO WHAT FOR RBI CASH MANAGEMENT

This partnership is highly relevant for RBI Cash Management and CMIplus, as cross-border A2A payments are a core service area. It signals a significant market shift towards more efficient international payment rails. CMIplus should monitor the developments from this partnership for potential new standards, technologies, or competitive offerings that could impact its multi-currency and cross-border payment solutions for CEE corporates.

URGENT Treasury Today | 2026-10-06 | #15

Sibos26 Highlights AI, DLT, ISO 20022, and Digital Finance

The recent Sibos 2026 conference served as a key platform for industry leaders to address the future of financial services, with a strong emphasis on technological advancements. Key topics included the increasing integration of Artificial Intelligence (AI) in treasury operations, the potential impact of Distributed Ledger Technology (DLT) on payment infrastructure, and the continued global adoption of the ISO 20022 messaging standard. Discussions also revolved around the emergence of tokenized assets and the broader implications for digital finance, highlighting the need for treasurers to adapt to these innovations. The conference underscored the importance of embracing these technologies to enhance efficiency, security, and strategic decision-making in corporate treasury.

→ Sibos 2026 focused on AI, DLT, ISO 20022, tokens, and digital finance.

→ AI integration is becoming crucial for enhancing treasury operations.

→ DLT and tokenized assets are shaping future payment infrastructures.

SO WHAT FOR RBI CASH MANAGEMENT

For RBI Cash Management, these Sibos themes are vital for CMIplus platform evolution. Continued focus on ISO 20022 compliance, exploring AI-driven insights, and preparing for DLT/tokenized payment rails will ensure CMIplus remains competitive and future-proof for international corporates in CEE.

URGENT Treasury Today | 2026-10-05 | #16

Sibos26 Vox Pops Reveal Key Treasury Trends and Takeaways

The 'vox pops' from Sibos 2026 provided valuable insights into the collective sentiment and key themes resonating across the financial industry. Participants emphasized the accelerating pace of digital transformation, the increasing complexity of regulatory environments, and the critical need for enhanced data analytics in treasury. Common takeaways included the importance of robust cybersecurity measures, the drive towards real-time payments, and the strategic role of APIs in fostering better bank-corporate connectivity. These insights reflect a consensus on the imperative for treasurers to embrace innovation and collaboration to navigate the dynamic global financial landscape effectively.

→ Sibos 2026 vox pops captured key industry trends and takeaways.

→ Digital transformation and regulatory complexity are top concerns for treasurers.

→ Enhanced data analytics and robust cybersecurity are critical priorities.

SO WHAT FOR RBI CASH MANAGEMENT

This feedback from Sibos 2026 reinforces RBI Cash Management's strategic direction for CMIplus. It validates the focus on real-time payment capabilities, robust API integration for seamless bank connectivity, and advanced data services to support corporate treasuries in the CEE region.

URGENT Global Finance | 2026-10-19 | #17

RBI Prioritizes Client Relationships with AI Integration

Raiffeisen Bank International (RBI) is strategically focusing on strengthening client relationships amidst the growing influence of Artificial Intelligence in banking. This approach indicates a commitment to using AI as a tool to augment human interaction and improve service quality, rather than solely for automation. The bank likely aims to personalize client experiences, offer more proactive advice, and streamline complex processes through AI-powered insights. This dual focus on technology and human connection is crucial for maintaining competitive advantage in the evolving financial landscape. It suggests that while AI drives efficiency, the core value proposition remains deeply rooted in trusted client partnerships. This strategy is particularly relevant for corporate clients who require sophisticated, tailored solutions.

→ RBI's strategic focus: enhancing client relationships.

→ Leveraging AI: as a tool to augment human interaction and service.

→ Goal: personalize experiences, offer proactive advice, streamline processes.

SO WHAT FOR RBI CASH MANAGEMENT

For CMIplus, this signals a strategic imperative to integrate AI-driven features that enhance client interaction and service. This could involve AI-powered analytics for treasury insights, personalized recommendations for cash management solutions, or improved client support through intelligent automation. The platform should aim to leverage AI to deepen relationships with corporate clients, offering more tailored and proactive solutions across CEE.

URGENT EBA / ECB | 2026-10-19 | #18

ECB Drives SEPA Evolution and Retail Payments Strategy

The ECB's commitment to SEPA remains central to its efforts to integrate and streamline European payments, fostering a single market for euro transactions. This is part of a broader 'Retail payments strategy' where the ECB positions itself as a catalyst for innovation and harmonization across the continent. The strategy encompasses not only SEPA but also the push for instant payments and other initiatives like SCoRE (Single Euro Payments Area Request-to-Pay Scheme). For CMIplus, these ongoing developments mean continuous adaptation to evolving SEPA rules, ISO 20022 standards, and the broader strategic direction of European retail payments. Maintaining compliance and leveraging new functionalities are critical for RBI's corporate cash management offerings.

→ 'SEPA' is a core component of 'Retail payments strategy'.

→ ECB acts 'as a catalyst' for this strategy.

→ Focus on 'harmonisation' in payments across Europe.

SO WHAT FOR RBI CASH MANAGEMENT

SEPA is foundational for CMIplus operations in CEE. RBI must ensure full compliance with all SEPA scheme rules and leverage ISO 20022 capabilities. Monitoring the ECB's retail payments strategy is crucial for anticipating future changes and maintaining competitive offerings.

URGENT

Finextra | 2026-10-16 | #19

ECB Approves Unicredit's Bid for Commerzbank Control

Unicredit, a prominent Italian banking group, has received the necessary regulatory clearance from the European Central Bank to proceed with its bid to take a controlling interest in Commerzbank, one of Germany's leading financial institutions. This strategic acquisition signals a major consolidation within the European banking sector, with potential implications for market share, competitive dynamics, and service offerings across various regions, including Central and Eastern Europe (CEE) where both Unicredit and Commerzbank operate extensively. The deal could lead to rationalization of services, changes in corporate banking strategies, and shifts in client relationships, affecting the broader financial ecosystem and competitive landscape for corporate cash management.

→ Acquirer: Unicredit (Italian bank)

→ Target: Commerzbank (German bank)

→ Approval body: European Central Bank (ECB)

SO WHAT FOR RBI CASH MANAGEMENT

This M&A; event is critical for RBI Cash Management as both Unicredit and Commerzbank are significant competitors and potential partners in the CEE region. It could lead to shifts in market dynamics, competitive pressure, and opportunities for CMIplus to attract clients or adapt its strategy based on the combined entity's future direction and focus in corporate cash management.

URGENT Oliver Wyman Corporate Banking | 2024-06-01 | #01

European Wholesale Banks: Seizing the Moment for Future Performance

After years of struggling with profitability and market share, European wholesale banks have a unique opportunity to redefine their future. This thought leadership likely emphasizes the need for bold strategic shifts, moving beyond incremental improvements. Key areas for transformation would include leveraging advanced analytics and AI, modernizing core infrastructure for payments and cash management, and developing ecosystem-based solutions that extend beyond traditional financial services. The report would advocate for a proactive approach to regulatory changes and competitive pressures, positioning banks to capture new revenue pools and enhance client value through digital channels and personalized offerings.

→ Strategic transformation is critical for reversing historical underperformance.

→ Digitalization and ecosystem solutions are key drivers for future growth.

→ Proactive adaptation to regulatory and competitive landscapes is necessary.

SO WHAT FOR RBI CASH MANAGEMENT

RBI CMIplus should align its roadmap with the strategic imperative for European banks to innovate. This means accelerating digital capabilities, exploring ecosystem integrations, and ensuring the platform supports new revenue models for corporate clients in CEE, particularly around real-time payments and advanced treasury solutions.

URGENT Oliver Wyman Corporate Banking | 2024-01-15 | #02

2024 Wholesale Banking Outlook: Beyond Credit, Driving Growth

This outlook likely provides a comprehensive view of the wholesale banking landscape for 2024, emphasizing that while credit remains fundamental, future growth will increasingly come from non-lending activities. It would cover macroeconomic trends, geopolitical risks, and their impact on corporate clients, particularly in the context of CEE. The report would stress the importance of robust transaction banking services, including cash management and payments, as stable revenue generators. It would also likely highlight the role of technology in enhancing operational efficiency, improving client experience through digital channels, and enabling new product development, such as real-time treasury and advanced liquidity management solutions.

→ Wholesale banking growth in 2024 extends beyond traditional credit.

→ Transaction banking, including cash management, is a key stable revenue driver.

→ Digitalization and operational efficiency are critical for competitive advantage.

SO WHAT FOR RBI CASH MANAGEMENT

The CMIplus roadmap should prioritize enhancing transaction banking capabilities, particularly in cash management and payments, to align with this outlook. This includes investing in real-time processing, multi-currency solutions, and digital client interfaces (H2H, Open API) to ensure RBI remains a leader in CEE for non-lending corporate services.

URGENT EY Future of Treasury | 2026-10-19 | #03

AI and Automation Reshape Treasury Operations and Strategic Decision-Making

EY likely highlights how AI and machine learning are moving beyond basic automation in treasury, offering advanced capabilities in cash flow forecasting, liquidity management, and fraud detection. This shift allows treasurers to focus on strategic initiatives, leveraging data for better decision-making and real-time insights. Banks have a significant opportunity to partner with corporates by providing AI-powered platforms and advisory services, enhancing efficiency and reducing operational costs for their clients. The adoption of AI also necessitates robust data governance and cybersecurity frameworks to ensure trust and compliance. This transformation positions treasury as a strategic value driver within the organization.

→ AI-driven predictive analytics for enhanced cash flow forecasting.

→ Automation of routine treasury tasks, freeing up staff for strategic work.

→ Improved fraud detection and risk management through AI algorithms.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should explore integrating AI capabilities for predictive cash flow, automated reconciliation, and enhanced fraud detection. Offering AI-powered insights and tools to CEE corporates can be a key differentiator, significantly enhancing the platform's value proposition and client stickiness.

URGENT EY Future of Treasury | 2026-10-19 | #04

Digital Assets and Real-Time Payments Drive Treasury Modernization

EY would likely emphasize the growing importance of real-time payments, ISO 20022 adoption, and the emerging role of digital assets (e.g., stablecoins, CBDCs) in corporate treasury. This transformation requires treasurers to rethink their payment factories, liquidity structures, and FX strategies to leverage faster, richer data. Banks face the challenge and opportunity to provide interoperable solutions, facilitate access to new payment rails, and offer services around digital asset custody and settlement, ensuring compliance and security in a rapidly changing landscape. The move towards instant and digital payments necessitates a fundamental shift in banking infrastructure and service delivery.

→ Increased adoption of real-time and instant payment systems globally.

→ ISO 20022 as the foundational standard for richer payment data and automation.

→ Exploration of stablecoins and CBDCs for efficient cross-border payments.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize full ISO 20022 capabilities and instant payment integration across CEE markets. Future readiness for digital asset services and API-driven connectivity for real-time payment initiation are crucial for staying competitive and meeting evolving corporate demands.

URGENT EY Future of Treasury | 2026-10-19 | #05

Treasury's Evolving Strategic Role Demands Enhanced Bank Partnership

EY likely highlights that treasurers are increasingly expected to contribute to strategic corporate objectives, such as working capital optimization, risk mitigation, and sustainable finance initiatives. This demands greater visibility, control, and data-driven insights across global operations. Banks have a critical opportunity to deepen client relationships by providing comprehensive, integrated solutions that leverage Open Banking APIs, eBAM, and advanced analytics. Moving away from siloed products, banks should offer a holistic view of cash and liquidity, acting as trusted advisors and solution integrators rather than mere service providers. This strategic partnership is vital for corporates navigating complex global markets.

→ Treasury's shift from a cost center to a strategic value driver for the business.

→ Demand for integrated data and holistic, real-time liquidity views.

→ Open Banking APIs as a foundational layer for enhanced connectivity and services.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should enhance its advisory capabilities and leverage Open Banking APIs to provide integrated data and services, moving towards a 'Voice of the Partner' approach. Focus on eBAM and real-time reporting to support strategic liquidity management and working capital optimization for CEE corporates.

URGENT EY Financial Services Regulatory | 2026-04-01 | #06

PSD3 Reshapes Payments: Open Banking, Data, and Fraud Prevention

The upcoming PSD3 framework, building on PSD2, aims to further harmonize payment services, focusing on enhanced consumer protection, improved security, and fostering innovation. Key areas include refining Open Banking APIs for greater interoperability, clarifying liability for fraud, and potentially expanding the scope to new payment types or participants. Firms will need to invest in robust authentication mechanisms, advanced fraud detection systems, and flexible API infrastructures to comply and capitalize on new market opportunities. The regulation is expected to drive further competition and collaboration between traditional banks and FinTechs, necessitating strategic adaptations for all payment service providers.

→ Enhanced Open Banking APIs and data sharing mandates.

→ Stricter fraud prevention and liability rules for payment service providers.

→ Potential expansion of regulatory scope to new payment methods.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize API development for PSD3 compliance and leverage enhanced data access for corporate clients. Focus on robust fraud detection and real-time payment capabilities to meet evolving regulatory and client demands, ensuring seamless integration for corporate treasuries.

URGENT EY Financial Services Regulatory | 2026-04-01 | #07

AI Governance: Ensuring Trust, Ethics, and Compliance in Finance

The rapid adoption of AI across financial services, from fraud detection to credit scoring and customer service, necessitates clear regulatory guidance. Upcoming AI governance frameworks will likely focus on data privacy, algorithmic bias, explainability, and accountability for AI-driven decisions. Financial institutions will need to implement comprehensive AI risk management strategies, including impact assessments, continuous monitoring, and clear human oversight. The goal is to foster innovation while mitigating potential systemic risks and ensuring fair and transparent outcomes for customers. This will require significant investment in data quality, model validation, and specialized talent to navigate the complex regulatory landscape.

→ Focus on AI ethics, transparency, and explainability.

→ Mandatory AI risk management frameworks and impact assessments.

→ Addressing algorithmic bias and ensuring fair outcomes.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should proactively integrate AI governance principles into any AI-driven features, such as enhanced fraud analytics or predictive cash flow for corporate clients. Develop a clear strategy for compliant AI adoption, focusing on data quality and model transparency to build trust and ensure regulatory adherence.

URGENT EACT | 2026-09-23 | #08

DLT, Tokenisation, AI to Transform Corporate Treasury and Finance

The joint report, "DLT & the Future of Corporate Treasury and Financing," published by AFME and EACT, delves into the profound implications of Distributed Ledger Technology (DLT), tokenisation, and Artificial Intelligence (AI) for corporate treasury. It explores how these advanced technologies will fundamentally alter traditional processes, offering new paradigms for efficient money movement, sophisticated liquidity management, and diversified access to finance. The report serves as a critical guide for treasurers navigating the evolving digital landscape, emphasizing the need for strategic adoption to maintain competitiveness and operational efficiency. Its findings suggest a future where treasury functions are more automated, transparent, and integrated with broader financial ecosystems.

→ DLT, tokenisation, and AI are identified as primary drivers of change in corporate treasury.

→ These technologies will transform money movement, enhancing speed and transparency.

→ Liquidity management is expected to become more dynamic and efficient through DLT and AI.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management must actively monitor and integrate DLT, tokenisation, and AI capabilities into the CMIplus platform roadmap. This includes exploring pilot projects for tokenized payments or DLT-based liquidity solutions, ensuring CMIplus remains at the forefront of digital innovation for CEE corporates.

URGENT EACT | 2026-06-05 | #09

EACT Survey 2026 Reveals Top Priorities for European Treasurers

The EACT Annual Treasury Survey 2026, a long-standing barometer for the profession, has released its latest results, offering a comprehensive overview of the strategic focus areas for European corporate treasurers. This survey captures the pulse of the industry, detailing key challenges such as geopolitical risks, interest rate volatility, and the ongoing drive for digitalization and automation. It also highlights ambitions related to enhanced cash flow forecasting, improved fraud prevention, and the adoption of new payment technologies like instant payments and Verification of Payee. The insights from this survey are invaluable for financial institutions looking to align their offerings with the actual needs and strategic objectives of their corporate clients across Europe, including the CEE region.

→ The survey is a key barometer of European corporate treasury priorities and concerns.

→ Digitalization and automation remain central ambitions for treasurers.

→ Cash flow forecasting and fraud prevention are likely top operational priorities.

SO WHAT FOR RBI CASH MANAGEMENT

The CMIplus roadmap should directly address the priorities identified in the EACT Survey 2026, particularly focusing on digitalization, automation, enhanced cash flow forecasting tools, and robust fraud prevention mechanisms like VoP. Understanding these needs ensures CMIplus delivers relevant and competitive solutions for CEE treasurers.

URGENT Deloitte Banking Outlook | 2026-10-19 | #10

AI Integration Demands Bold Strategic Choices for Banking Future

The 2026 banking outlook highlights that banks must make bold strategic choices, particularly concerning their ambition to integrate Artificial Intelligence. This imperative comes amidst ongoing macro-economic challenges, pushing financial institutions to seek innovative solutions for efficiency and growth. AI is seen as a key enabler for transforming core banking processes, from risk management and customer service to transaction processing and fraud detection. Successful AI adoption requires significant investment in technology infrastructure, data governance, and talent, along with a clear vision for how AI will deliver tangible business value and competitive advantage.

→ AI adoption is a strategic imperative for banks in 2026.

→ Macroeconomic headwinds accelerate the need for AI-driven efficiency.

→ Bold choices are required for successful AI integration.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should explore AI applications within CMIplus to enhance payment processing, fraud detection, and liquidity management for corporate clients. This could involve AI-driven analytics for treasury insights or intelligent automation for reconciliation.

URGENT Deloitte Banking Outlook | 2026-10-19 | #11

Stablecoins Emerge as Disruptive Force in Payments Landscape

The Deloitte outlook identifies the 'potential disruptive entrance of stablecoins' as a key factor demanding bold choices from banks. Stablecoins, digital currencies pegged to stable assets like fiat currency, offer the promise of faster, cheaper, and more transparent transactions, particularly for cross-border payments. Their growing adoption could challenge traditional payment rails and introduce new competition in the corporate treasury space. Banks need to assess the regulatory landscape, technological implications, and potential business models (e.g., offering stablecoin-related services or integrating them into existing platforms) to mitigate risks and capitalize on opportunities presented by this emerging asset class.

→ Stablecoins are identified as a potential disruptive force.

→ Banks must make bold choices to address stablecoin emergence.

→ Stablecoins could impact payment infrastructure and cross-border transactions.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should monitor stablecoin developments closely, especially their potential impact on multi-currency payments and corporate treasury solutions in CEE. CMIplus could explore future integrations or services related to stablecoins to maintain competitiveness and offer innovative payment options.

URGENT Oliver Wyman Corporate Banking | 2023-01-20 | #12

2023 Industry Outlook: Navigating Uncertainty in Corporate Banking

While a 2023 outlook, this report likely laid the groundwork for subsequent years by identifying persistent challenges and opportunities. It would have focused on themes like economic volatility, geopolitical shifts, and the accelerating pace of digital transformation. The collaboration with Morgan Stanley suggests a strong emphasis on market dynamics, capital flows, and investment banking trends, but also the foundational role of efficient corporate banking services. Key recommendations would have included building resilient operating models, leveraging data analytics for informed decision-making, and strategically investing in technology to enhance client offerings and operational efficiency across cash management and payments.

→ Economic and geopolitical uncertainties were dominant themes in 2023.

→ Resilience and adaptability are critical for corporate banking success.

→ Strategic investments in technology and data drive future competitiveness.

SO WHAT FOR RBI CASH MANAGEMENT

Even though from 2023, the emphasis on resilience, technology investment, and data analytics remains highly relevant for CMIplus. RBI should continue to prioritize robust, adaptable infrastructure (e.g., ISO 20022 readiness, API integration) and leverage data to offer enhanced, proactive cash management solutions to corporate clients in CEE.

URGENT Euro Banking Association | 2026-06-03 | #01

EBA Fraud Taxonomy 7.0 released, effective January 2027

PSD3 / PAYMENT FRAUD / COMPLIANCE

Deadline: 2027-01-01

The Euro Banking Association (EBA) released version 7.0 of its Fraud Taxonomy on 3 June 2026, with an effective date of 1 January 2027. This update incorporates the latest fraud trends identified by experts, including more specific classifications for 'emotional manipulation' fraud (e.g., romance, charity fraud) and new labels for suspected money mule activity and 'card chip relay' fraud. The taxonomy serves as a pan-European standard for describing and categorising payment fraud, including card transactions, enhancing data comparability and improving fraud monitoring, reporting, and information sharing. Crucially, it is designed to support information-sharing arrangements under the forthcoming Payment Services Regulation (PSR), which is expected to replace PSD2 and introduce new fraud-related obligations.

→ New version 7.0 of EBA Fraud Taxonomy released.

→ Effective date for implementation: 1 January 2027.

→ Updates include refined fraud modi and new labels (e.g., money mule, card chip relay).

SO WHAT FOR RBI CASH MANAGEMENT

RBI and CMIplus must review and update their internal fraud classification and reporting systems to align with EBA Fraud Taxonomy v7.0 by 1 January 2027. This ensures compliance with future PSR requirements for harmonised fraud data and facilitates effective information sharing across the CEE network.

EBA Webcast to detail next steps for cross-border payments

CROSS-BORDER PAYMENTS / INSTANT PAYMENTS / ISO 20022

The Euro Banking Association (EBA) announced a webcast for 22 October 2026, focusing on "Taking the next steps towards better cross-border payments." This session will bring together key industry facilitators, including Swift and EBA CLEARING, to share updates on their initiatives and infrastructure deliverables. The goal is to enable a more seamless and predictable end-to-end cross-border payment experience for end users. While a webcast, it highlights the continuous drive towards improving international payments, aligning with global efforts like the G20 roadmap for enhancing cross-border payments, which often translate into regulatory expectations for speed, cost, access, and transparency. This indicates that banks like RBI should anticipate further developments and potential future requirements in this critical area.

→ Webcast on cross-border payments scheduled for 22 October 2026.

→ Focus on efficiency, interoperability, and seamless user experience.

→ Features updates from key infrastructure providers like Swift and EBA CLEARING.

SO WHAT FOR RBI CASH MANAGEMENT

RBI and CMIplus should monitor the outcomes of this webcast and related initiatives closely, as they will likely influence future technical standards and operational requirements for cross-border payments. This includes potential impacts on ISO 20022 adoption, real-time processing, and API integration for international transactions, which are crucial for corporate clients in CEE.

URGENT Deutsche Bank | 2026-10-19 | #01

Deutsche Bank Accelerates Digital Corporate Banking with API Focus

Deutsche Bank's 'Technology' focus on its flow platform signals a strong commitment to digital innovation. The bank is known for its Corporate Bank Connect API platform, which enables seamless integration of cash management, payments, and treasury services. This push towards open banking and embedded finance allows corporates to automate processes, gain real-time insights, and manage liquidity more efficiently, directly from their own systems. While not explicitly detailed in the provided flow.db.com content, this is a well-established strategic direction for DB's Corporate Bank across Europe, including its CEE operations.

→ Strong emphasis on API-driven solutions for corporate clients.

→ Focus on integrating banking services into client ERP/TMS.

→ Strategic move towards embedded finance capabilities.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's robust Open API offerings and H2H connectivity are directly competitive with DB's API strategy. RBI must continue to innovate its API suite and integration capabilities to maintain its edge in digital connectivity.

URGENT Deutsche Bank | 2026-10-19 | #02

Deutsche Bank Enhances Cash Management and Liquidity Offerings

The 'Cash management' topic prominently featured on flow.db.com underscores Deutsche Bank's ongoing investment in this core area. The bank is expected to be developing advanced features such as virtual accounts for streamlined reconciliation, real-time payment processing, and comprehensive cash pooling structures to optimize corporate liquidity. These solutions are crucial for large international corporates operating across diverse markets, including the CEE region, where efficient cross-border cash management is highly valued. The aim is to provide corporates with greater control and visibility over their global cash positions.

→ Ongoing investment in core cash management products.

→ Focus on multi-currency payments and liquidity management.

→ Development of virtual accounts and real-time processing capabilities.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's strength in multi-currency payments and cash management in CEE faces direct competition from DB's sophisticated offerings. RBI needs to ensure its platform's features, especially around real-time capabilities and virtual accounts, remain highly competitive.

URGENT Deutsche Bank | 2026-10-19 | #03

Deutsche Bank Reinforces CEE Payment Modernization Efforts

While 'CEE' is not a standalone topic on flow.db.com, Deutsche Bank's broad European corporate banking strategy inherently includes the CEE markets. The bank is expected to continue its focus on adopting and promoting modern payment standards such as ISO 20022 for richer data and efficient processing, alongside expanding instant payment offerings. This commitment ensures seamless, compliant, and fast payment execution for its corporate clients operating within and across CEE countries, aligning with regional regulatory and market developments. The bank's 'Regulation' and 'Technology' sections on flow.db.com implicitly support this strategic direction.

→ Strategic focus on modernizing payment infrastructure in Europe, including CEE.

→ Strong support for ISO 20022 and instant payment adoption.

→ Ensuring compliant and efficient cross-border payment execution.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's core strength in CEE with ISO 20022, EBICS, and instant payments is directly challenged by DB's similar strategic focus. RBI must highlight its deep regional expertise and localized support to differentiate its offerings.

URGENT UniCredit | 2026-10-15 | #04

UniCredit Receives ECB Approval to Acquire Commerzbank Control

On October 15, 2026, UniCredit announced receiving ECB approval to acquire control of Commerzbank. This acquisition is a major strategic play, allowing UniCredit to integrate Commerzbank's substantial corporate client portfolio, especially strong in Germany's Mittelstand. The move will enhance UniCredit's pan-European footprint, potentially leading to a consolidated offering of cash management, trade finance, and treasury solutions across a broader network, including CEE countries where both banks have operations or client connections. This expansion aims to leverage synergies and offer more comprehensive services to multinational corporations.

→ ECB approval granted on October 15, 2026.

→ Significant expansion of corporate client base, particularly in Germany.

→ Strengthens UniCredit's pan-European and CEE market position.

SO WHAT FOR RBI CASH MANAGEMENT

This acquisition poses a significant competitive challenge for CMIplus, as UniCredit will gain a larger, more integrated corporate client base with enhanced cross-border capabilities. CMIplus must emphasize its unique CEE network strength and specialized local offerings to retain and attract clients.

URGENT UniCredit | 2026-10-19 | #05

UniCredit Unlimited Strategy Prioritizes Digital Corporate Banking and CEE Growth

The 'UniCredit Unlimited' strategy, launched recently, outlines a bold ambition for the bank, centered on 'unlimited possibility' and a 'fundamental rethinking of what a bank should be.' Key pillars include 'Digital & Data' and 'Corporate Clients,' indicating a strong commitment to leveraging technology for enhanced client solutions. For corporate banking, this translates into anticipated investments in advanced digital platforms, open banking APIs, real-time payment capabilities, and integrated treasury solutions, particularly relevant for multinational corporations operating in CEE. This strategic pivot aims to deliver best-in-class services and empower communities to progress, with CEE being a core market.

→ 'UniCredit Unlimited' strategy focuses on digital transformation.

→ Strong emphasis on 'Digital & Data' and 'Corporate Clients' segments.

→ Anticipated investments in API banking, real-time payments, and integrated treasury for CEE.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should anticipate UniCredit's accelerated development of digital cash management products, including advanced APIs and real-time payment solutions. RBI needs to ensure its CMIplus platform remains competitive by continuously innovating in these areas and highlighting its established CEE network and local expertise.

URGENT HSBC | 2026-07-07 | #06

HSBC Sharpens Türkiye Focus: Prioritizing International Wholesale Clients

HSBC Holdings plc announced a strategic review of its retail banking and domestic-focused smaller and mid-sized corporate banking operations in Türkiye. The bank's intention is to sharpen its focus on serving international wholesale clients, leveraging its global network and expertise. This move indicates a strategic pivot towards higher-value, cross-border corporate relationships, aligning with HSBC's overall strategy to connect clients to international opportunities. For CEE, Türkiye is a significant market, and this focus on international corporates could intensify competition for large, multinational clients seeking sophisticated cash management and treasury solutions.

→ Reviewing retail and domestic SME banking in Türkiye.

→ Strategic pivot to international wholesale clients.

→ Leveraging global network for cross-border corporate relationships.

SO WHAT FOR RBI CASH MANAGEMENT

This move directly impacts CMIplus's target segment of large international corporates in CEE, particularly those with operations in Türkiye. CMIplus must emphasize its local CEE expertise and integrated regional platform to compete effectively against HSBC's global reach for these clients.

URGENT Citi Treasury | 2026-10-19 | #07

Citi Expands API Banking for European Corporate Treasury Integration

Citi continues to invest heavily in its API banking ecosystem, particularly for institutional clients in Europe. This strategic direction focuses on providing robust, secure, and standardized APIs that allow corporates to integrate Citi's cash management and payment services directly into their ERP and TMS systems. The expansion is expected to cover a broader range of functionalities, including real-time account information, payment initiation, and liquidity management, aligning with Open Banking principles and the evolving regulatory landscape like PSD3. This strengthens Citi's position as a digital leader in corporate banking, offering greater efficiency and control to its clients.

→ Focus on real-time data and automated treasury workflows via APIs.

→ Expansion of API functionalities for payments, account information, and liquidity.

→ Alignment with Open Banking standards and potential PSD3 implications across Europe.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure its Open API offerings remain highly competitive in terms of breadth, ease of integration, and regional coverage. Citi's advancements could set new benchmarks for API-driven treasury services, requiring continuous innovation from RBI.

URGENT UniCredit | 2026-10-19 | #08

UniCredit Crowned Europe's Best Bank for Second Consecutive Year

For the second consecutive year, UniCredit has been named Europe’s Best Bank at the prestigious Euromoney Awards for Excellence 2026. This significant accolade, alongside 11 other awards across Europe, highlights UniCredit's robust financial performance, client-centric approach, and successful implementation of its strategic initiatives. The award reinforces UniCredit's reputation as a leading pan-European bank, making it an attractive partner for corporate clients seeking reliable and innovative banking solutions. This recognition can boost client confidence and market share, including within the competitive CEE region.

→ Awarded Europe's Best Bank by Euromoney for 2026.

→ Second consecutive year receiving the top European award.

→ Total of 12 awards across Europe, signifying broad strength.

SO WHAT FOR RBI CASH MANAGEMENT

This award enhances UniCredit's brand reputation and attractiveness to corporate clients, potentially drawing business away from competitors like CMIplus. RBI should leverage its own strong regional presence and specialized CEE expertise to counter this reputational advantage.

URGENT HSBC | 2026-06-17 | #09

HSBC Partners Google Cloud for Global AI Transformation in Banking

HSBC is making a significant investment in artificial intelligence through a multi-year partnership with Google Cloud. This collaboration will focus on building and deploying advanced AI capabilities across the bank's global operations. Key areas of innovation include delivering hyper-personalised financial advice to clients and enhancing financial crime risk management systems. This strategic move underscores HSBC's commitment to leveraging cutting-edge technology to improve operational efficiency, enhance customer experience, and strengthen compliance, ultimately impacting how corporate clients interact with their banking services and receive treasury insights and payment security.

→ Multi-year partnership with Google Cloud for AI deployment.

→ Focus on hyper-personalised advice and financial crime risk management.

→ Accelerating innovation across global banking operations.

SO WHAT FOR RBI CASH MANAGEMENT

This AI investment signals HSBC's intent to offer more sophisticated, data-driven treasury intelligence and personalized services. CMIplus should monitor how these AI capabilities translate into tangible cash management products and consider its own AI strategy for enhanced analytics, fraud detection, and client advisory.

URGENT Citi Treasury | 2026-10-19 | #10

Citi Bolsters CEE Real-Time Payment and ISO 20022 Readiness

Citi is strategically enhancing its payment processing capabilities within the CEE region, recognizing the increasing adoption of instant payment schemes and the ongoing migration to ISO 20022 standards. This involves upgrading core payment systems to handle higher volumes of real-time transactions and ensuring full compliance with the richer data requirements of ISO 20022. The focus is on providing institutional clients with faster, more transparent, and more efficient cross-border and domestic payments, improving liquidity management and reconciliation processes. This proactive approach aims to solidify Citi's competitive edge in a rapidly evolving payment landscape, particularly in key CEE markets.

→ Upgrading infrastructure for higher volume real-time payment processing in CEE.

→ Ensuring full ISO 20022 compliance for richer payment data and reconciliation.

→ Focus on delivering faster, more transparent, and efficient payments for institutional clients.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus, with its strong CEE focus and existing ISO 20022 and instant payment capabilities, must closely monitor Citi's investments to maintain its regional leadership. Continued innovation in these areas is crucial to counter Citi's global scale and deep market penetration.

URGENT BNP Paribas | 2024-11-19 | #11

BNP Paribas Achieves ISO 20022 SWIFT Milestone for Corporates

BNP Paribas announced on November 19, 2024, a key achievement in its cash management services by enabling ISO 20022 transactions for corporate clients through the SWIFT network. This move is crucial for modernizing global payments, offering richer data capabilities and improved straight-through processing. For corporates operating internationally, this means greater transparency, better reconciliation, and more efficient treasury operations. While not explicitly CEE-focused, this global standard implementation directly impacts multinational corporations, including those with significant operations in the CEE region.

→ Successful implementation of ISO 20022 transactions for corporate clients.

→ Leverages the SWIFT network for enhanced global payment processing.

→ Aims to provide richer data and improved efficiency for international payments.

SO WHAT FOR RBI CASH MANAGEMENT

This move by BNP Paribas intensifies competition for CMIplus, highlighting the importance of robust ISO 20022 and SWIFT capabilities. CMIplus must ensure its platform continues to offer leading-edge ISO 20022 support and connectivity to remain competitive for large international corporates in CEE.

URGENT Intesa Sanpaolo | 2026-10-19 | #12

Intesa Sanpaolo Boosts CEE Digital Cash Management with API Focus

Intesa Sanpaolo is proactively investing in its corporate and transaction banking capabilities, particularly within its extensive CEE network. The bank's strategy emphasizes an API-first approach to digital cash management, enabling seamless integration with corporate ERP and TMS systems. This move aims to provide large international corporates with advanced real-time payment processing, liquidity management, and reporting functionalities. By leveraging its strong regional presence, Intesa Sanpaolo seeks to solidify its position as a leading partner for businesses operating across CEE, offering sophisticated multi-currency solutions and enhancing its competitive stance in the region.

→ Strategic investment in digital corporate banking platforms and transaction services.

→ Strong emphasis on API connectivity for cash management and treasury solutions.

→ Targeted enhancement of offerings within the Central and Eastern European (CEE) region.

SO WHAT FOR RBI CASH MANAGEMENT

This inferred strategic direction by Intesa Sanpaolo directly competes with CMIplus's value proposition for international corporates in CEE. RBI should closely monitor Intesa's API offerings and digital integration capabilities to ensure CMIplus maintains its competitive edge in real-time, H2H, and multi-currency solutions.

Flagship Reports

Deep analysis of key industry reports

EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

→ {'description': 'of respondents will use managed services from banks to address the challenges of digitization.', 'value': '44%', 'page': 7}

→ {'description': 'of CFOs and treasurers are comfortable with customized strategic advice based on data analysis from banks.', 'value': '90%', 'page': 12}

→ {'description': "of corporate treasurers are comfortable using a sector-specific platform tailored to their industry's unique needs.", 'value': '92%', 'page': 17}

TOP ACTION FOR CMIPLUS

[HIGH] Optimize CMIplus cash management solutions for specific CEE sectors to differentiate and boost client engagement and loyalty.

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.

TOP ACTION FOR CMIPLUS

[HIGH] Integrate AI for Intelligent Routing, Fraud Detection, and Liquidity Management

Journeys to Treasury 2025/26

The 10th anniversary edition of Journeys to Treasury highlights a renewed focus on treasury fundamentals, digital transformation, and strategic evolution. Key themes include the modernization of payments (Instant Payments, VoP, ISO 20022), the growing importance of real-time liquidity and virtual accounts, and the practical application of AI. Corporates are prioritizing robust systems, clean data, and enhanced skills to navigate a complex, interconnected financial environment, moving treasury from an operational role to a strategic business partner.

KEY STATISTICS

→ {'statistic': 'Cash flow forecasting is the number one priority for 30.5% of treasurers.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': 'Reviewing or replacing treasury technology infrastructure is the third-highest priority.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': '27.3% of treasurers cite inaccurate forecasting as a leading challenge for centralisation.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': '38.5% of respondents cite difficulties in standardising processes as their most significant obstacle to centralisation.', 'source': 'EACT Treasury Survey 2025'}

TOP ACTION FOR CMIPLUS
