EU Instant Payments Mandate: Banks Face Final Implementation Push

The EU's Instant Payments Regulation, which entered into force in April 2024, mandates that all payment service providers (PSPs) in the Eurozone must offer instant credit transfers. The first key deadline, requiring PSPs to be able to receive instant payments at no extra cost, is set for early 2027. This means banks are currently finalizing their technical and operational readiness. The regulation also includes provisions for verifying the payee (VoP) to combat fraud, which adds another layer of complexity for implementation. For corporates, this means faster settlement and improved liquidity management, but also requires adapting internal systems for real-time reconciliation.

→ EU Instant Payments Regulation entered into force April 2024.

→ Mandatory for all Eurozone PSPs to offer instant credit transfers.

→ First deadline for receiving instant payments: early 2027.

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is critical for CMIplus, driving the need for robust instant payment capabilities for both sending and receiving. RBI must ensure its CEE network banks are fully compliant and offer VoP services to support corporate clients in meeting regulatory requirements and enhancing fraud prevention.

URGENT Der Treasurer | 2026-09-10 | #02

German Corporates Advance EBICS 3.0 & ISO 20022 Migration

The transition to ISO 20022 as the universal messaging standard continues to gain momentum, with many European countries, including Germany, pushing for full adoption. EBICS 3.0, the latest version of the Electronic Banking Internet Communication Standard, offers significant improvements in security, data volume, and multi-bank capabilities, making it a preferred channel for corporates managing complex payment flows. The synergy between EBICS 3.0 and ISO 20022 allows for richer data exchange, which is crucial for automated reconciliation and liquidity management. While the SEPA migration to ISO 20022 is largely complete, the focus is now on optimizing its use and extending it to non-SEPA payments and other financial messages.

→ EBICS 3.0 adoption growing among German corporates.

→ ISO 20022 is the universal messaging standard for payments.

→ EBICS 3.0 offers enhanced security and multi-bank capabilities.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full support for EBICS 3.0 and comprehensive ISO 20022 messaging across its CEE network. This enables seamless integration for corporate clients, allowing them to leverage advanced data capabilities and maintain efficient, secure bank communication.

URGENT Der Treasurer | 2026-09-01 | #03

AI Boosts Fraud Prevention in Open Banking Payments

The rise of Open Banking and API-driven payment initiation has introduced new vectors for fraud, necessitating advanced detection mechanisms. AI and machine learning algorithms are proving highly effective in analyzing vast datasets of transaction patterns, identifying anomalies, and predicting potential fraudulent activities in real-time. This is especially crucial for instant payments, where the speed of transaction leaves little room for manual intervention. Banks are investing heavily in these technologies to protect both themselves and their corporate clients from financial crime, including authorized push payment (APP) fraud. The integration of AI into payment platforms is becoming a standard for robust security.

→ AI/ML used for real-time fraud detection in payments.

→ Crucial for securing Open Banking and API-driven transactions.

→ Helps combat sophisticated fraud schemes like APP fraud.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must integrate cutting-edge AI-driven fraud prevention tools, especially for Open Banking APIs and instant payment flows. This will provide enhanced security for corporate clients, mitigate risks associated with real-time transactions, and strengthen RBI's position as a trusted cash management partner.

URGENT The Global Treasurer | 2026-09-28 | #04

EU Mandates Instant Payments: New Deadlines for Banks

The recent legislative approval by the European Parliament solidifies the mandate for instant payments, requiring all EU and EEA banks to offer real-time credit transfers at no extra cost than standard transfers. This directive aims to accelerate the adoption of instant payments, ensuring funds are available within ten seconds, regardless of the day or time. The regulation includes provisions for robust fraud prevention measures and a mandatory Verification of Payee (VoP) service. Banks in CEE, including RBI's network, face significant implementation challenges and opportunities to enhance their payment infrastructure to meet these new requirements.

→ EU Parliament approved instant payments mandate.

→ 24/7 processing, funds available within 10 seconds.

→ No extra cost compared to standard transfers.

SO WHAT FOR RBI CASH MANAGEMENT

This is a critical development for CMIplus, directly impacting payment processing and client expectations in CEE. RBI must ensure its network banks are fully compliant, offering instant payment capabilities and integrating VoP services to meet regulatory deadlines and enhance client trust and security.

URGENT The Global Treasurer | 2026-09-28 | #05

Global ISO 20022 Migration Accelerates, Challenges Remain for Corporates

The ongoing migration to ISO 20022, particularly for SWIFT cross-border payments and reporting (CBPR+), continues to be a major focus for treasurers and banks. While initial compliance deadlines have passed for many, the full benefits of data richness are yet to be fully realized due to varying adoption rates and data truncation issues. Corporates are investing in TMS and ERP upgrades to leverage the enhanced data, while banks are working to ensure seamless end-to-end processing. The CEE region, with its diverse banking landscape, faces unique challenges in harmonizing these standards and maximizing the benefits of the new messaging format.

→ SWIFT CBPR+ migration is a key driver.

→ Data richness benefits still being unlocked.

→ Corporates upgrading ERP/TMS for adoption.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must continue to support and promote full ISO 20022 capabilities, ensuring clients can send and receive rich data. This includes supporting advanced payment messages and reporting, and assisting CEE clients with their migration challenges, potentially through enhanced H2H or API integrations.

URGENT The Global Treasurer | 2026-09-28 | #06

Open Banking APIs Transform Corporate Treasury Connectivity and Efficiency

The evolution of Open Banking, initially driven by PSD2 in Europe, is now seeing broader application in corporate treasury. Banks are developing advanced APIs that allow corporates to access real-time account information, initiate payments, and manage liquidity more efficiently directly from their TMS or ERP systems. This shift reduces reliance on traditional file-based transfers (like H2H or EBICS for some functions) and enables more dynamic cash management strategies. Fraud prevention and robust security protocols remain paramount as API adoption grows, requiring careful implementation and monitoring to ensure data integrity and transaction security.

→ Open Banking APIs expanding beyond PSD2 scope.

→ Enables real-time account data and payment initiation.

→ Reduces reliance on traditional file transfers.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's Open API strategy is directly aligned with this trend. RBI must continue to develop and promote its API offerings for corporate clients in CEE, providing secure and robust connectivity for real-time cash management, eBAM, and payment initiation, complementing existing EBICS and H2H channels.

URGENT Strategic Treasurer | 2026-09-28 | #07

ISO 20022 Migration Accelerates Across European Payments Landscape

The ongoing migration to ISO 20022 is a critical development in the European payments landscape, with various deadlines approaching or recently passed for different payment schemes (e.g., SEPA, SWIFT CBPR+). This standard offers significantly richer data capabilities compared to legacy formats, enabling better reconciliation, fraud detection, and liquidity management for corporates. Banks are investing heavily in upgrading their systems to support the new format, ensuring compliance and leveraging the benefits of structured data. The transition presents both challenges in implementation and opportunities for process optimization and new service development.

→ Mandatory adoption for major European payment schemes.

→ Enables richer, structured data for improved reconciliation.

→ SWIFT CBPR+ migration is a key driver for global adoption.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full compliance with ISO 20022 across all supported channels (EBICS, H2H, SWIFT) and CEE network banks. Leveraging the richer data for enhanced reporting and value-added services for corporate clients is crucial.

URGENT Strategic Treasurer | 2026-09-28 | #08

EU Instant Payments Regulation Reshapes Corporate Cash Management

The European Union's Instant Payments Regulation, which came into force recently, requires all EU banks to offer instant credit transfers in Euro within 10 seconds, 24/7/365, at no additional cost compared to traditional SEPA credit transfers. This regulation aims to accelerate the adoption of instant payments and foster innovation. For corporates, this means immediate settlement of funds, enabling real-time liquidity management, faster supply chain payments, and improved cash flow forecasting. However, it also introduces new challenges related to fraud prevention, reconciliation of high-volume transactions, and ensuring robust internal systems can handle the speed.

→ Mandatory instant payment offering for all EU banks.

→ Payments must be processed within 10 seconds, 24/7/365.

→ Pricing must be equivalent to standard SEPA credit transfers.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must fully support the EU Instant Payments Regulation across its CEE network, ensuring seamless instant payment initiation and receipt for corporate clients. This requires robust infrastructure, enhanced fraud detection, and real-time reporting capabilities.

URGENT Strategic Treasurer | 2026-09-28 | #09

Open Banking APIs Drive New Treasury Efficiency Models

The evolution of Open Banking beyond consumer finance is profoundly impacting corporate treasury. APIs (Application Programming Interfaces) enable direct, real-time connectivity between corporate ERP/TMS systems and banking platforms, facilitating automated data exchange for balances, transactions, and payment initiation. This shift allows treasurers to move from batch processing to real-time cash positioning, optimize liquidity, and automate reconciliation processes. While security and standardization remain key considerations, the adoption of API-driven treasury solutions is accelerating, promising significant efficiency gains and enabling new value-added services from banks and fintech providers.

→ APIs enable real-time data exchange between corporates and banks.

→ Facilitates automated cash positioning and liquidity management.

→ Enhances integration between TMS/ERP and banking platforms.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's Open API strategy is vital for meeting evolving corporate client demands for real-time data and automated processes. Expanding API capabilities for services like VoP, eBAM, and multi-currency payments will be a key differentiator in the CEE market.

URGENT EBA / ECB | 2026-09-28 | #10

Digital Euro Pilot Advances, Scheme Rulebook Nears Completion

The European Central Bank is actively progressing with the digital euro project, moving beyond exploratory work into pilot phases. Key areas of focus include the development of an innovation platform and the finalization of the scheme rulebook, which will define the operational and technical standards for the digital currency. This initiative is crucial for maintaining monetary sovereignty and fostering innovation in the European payment landscape, ensuring a robust public option alongside private digital payment solutions. Discussions around privacy, functionality, and integration into existing payment infrastructures are central to its development, impacting future payment methods for both retail and potentially wholesale transactions.

→ Pilot phase is underway to test technical solutions and user experience.

→ Scheme rulebook is being finalized to define operational and technical standards.

→ An innovation platform supports ecosystem development and private sector engagement.

SO WHAT FOR RBI CASH MANAGEMENT

The digital euro will fundamentally alter the payment landscape, requiring CMIplus to prepare for new payment rails and potential API integrations. RBI needs to monitor the scheme rulebook for corporate treasury implications, especially regarding multi-currency payments and liquidity management for CEE clients.

URGENT EBA / ECB | 2026-09-28 | #11

ECB Catalyzes SEPA Instant Payments Adoption Across Europe

As part of its retail payments strategy, the European Central Bank continues its role as a catalyst for the full implementation and broader uptake of SEPA Instant Payments (SCT Inst). The goal is to ensure that instant payments are available and widely used by consumers and businesses across the euro area, facilitating faster and more efficient transactions. This involves addressing remaining barriers to adoption, harmonizing standards, and encouraging all payment service providers to offer instant payment services. The ongoing work on SEPA aims to strengthen European payment autonomy and competitiveness, providing a robust infrastructure for modern digital economies and supporting cross-border payment efficiency.

→ ECB acts as a catalyst for widespread SEPA Instant Payments adoption.

→ Goal is to make real-time transactions the new norm across the euro area.

→ Focus on removing barriers and harmonizing standards for SCT Inst.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full compliance and optimal integration with SEPA Instant Payments. This impacts real-time liquidity management, fraud prevention, and the development of new instant payment-enabled services for corporate clients in CEE, requiring continuous platform updates and client education.

URGENT EBA / ECB | 2026-09-28 | #12

Bulgaria Set to Join Euro Area in 2026

The European Central Bank has confirmed Bulgaria's planned entry into the euro area in 2026, following its successful participation in the Exchange Rate Mechanism II (ERM II). This move signifies a major milestone for Bulgaria, requiring extensive preparations across its financial sector, including banks, payment systems, and corporate treasury functions. The transition will involve the conversion of national currency (Lev) to Euro, integration into TARGET services, and adherence to Eurosystem monetary policy. For businesses, this means adapting to a single currency for transactions, potentially simplifying cross-border payments within the euro area and impacting liquidity management strategies and reporting requirements.

→ Bulgaria's accession to the euro area is set for 2026.

→ Requires extensive preparation for the financial sector and businesses.

→ Involves the conversion of the national currency (Lev) to Euro.

SO WHAT FOR RBI CASH MANAGEMENT

This is highly relevant for RBI, given its strong presence in CEE. CMIplus must prepare for Bulgarian clients to transition to EUR, impacting multi-currency accounts, payment processing, and reporting. New services for euro-denominated payments and liquidity management in Bulgaria will be crucial for seamless corporate operations.

URGENT Finextra | 2026-09-28 | #13

Intelligent Money Threatens Traditional B2B Bank Revenues

By 2030, stablecoins, tokenized deposits, and central bank digital currencies (CBDCs) are forecast to constitute approximately four percent of the global payments volume. This emerging landscape of 'intelligent money' poses a direct challenge to the established B2B revenue streams of traditional banks. As corporates increasingly adopt these new digital payment instruments for efficiency and cost benefits, banks face the imperative to adapt their offerings to remain competitive. The shift could necessitate significant changes in how banks provide cash management services, manage liquidity, and facilitate cross-border transactions for their corporate clients, impacting treasury technology and payment factory models.

→ Intelligent money includes stablecoins, tokenized deposits, and CBDCs.

→ Projected to account for ~4% of global payments volume by 2030.

→ Expected to divert significant income from traditional bank B2B revenues.

SO WHAT FOR RBI CASH MANAGEMENT

This trend is critical for RBI Cash Management and CMIplus as it signals a fundamental shift in corporate payment preferences and instruments. CMIplus must evaluate how to integrate or interact with stablecoins, tokenized deposits, and potentially CBDCs to support multi-currency payments and maintain its competitive edge for international corporates in CEE.

URGENT The Paypers | 2026-09-28 | #14

BLIK Expands Globally via Stripe, Boosting CEE Payments

BLIK, a highly popular mobile payment system in Poland, has announced its integration with global payment processing giant Stripe. This collaboration enables businesses operating on Stripe's platform across more than 30 countries to accept BLIK payments. The move is set to enhance cross-border commerce, making it easier for international merchants to cater to Polish consumers who heavily rely on BLIK for online and in-app purchases. For CEE businesses, this means broader access to a key payment method, potentially increasing conversion rates and customer satisfaction. The integration underscores the growing importance of local and instant payment methods in a globalised digital economy, streamlining transactions for both consumers and merchants.

→ BLIK is a major Polish mobile payment scheme.

→ Integrated with Stripe's global payment platform.

→ Available to businesses in over 30 countries.

SO WHAT FOR RBI CASH MANAGEMENT

This is highly relevant for RBI CMIplus clients, especially those with operations or sales in Poland and other CEE markets. It highlights the growing importance of integrating local, instant payment methods like BLIK for seamless corporate treasury and payment factory operations. CMIplus should ensure its offerings can support or facilitate such integrations for clients, enhancing their ability to serve CEE customers.

URGENT The Paypers | 2026-09-24 | #15

Cross-Border Payments Reset: Banks Must Modernize Now

Joanne Strobel-Cort from BNY discusses the ongoing 'great cross-border payments reset,' stressing that banks must act now to modernize their systems. The interview delves into how cross-border payments are transforming, driven by technological advancements and the demand for enhanced financial participation. Key themes include the role of banks in leveraging technology, fostering interoperability, and improving financial connectivity beyond mere access. This modernization is crucial for retaining customer relationships and ensuring secure, affordable, and seamless money movement across borders. The discussion underscores the strategic importance of adapting to new standards and collaborative models in the global financial ecosystem to meet evolving client needs.

→ BNY's Joanne Strobel-Cort discusses cross-border payments evolution.

→ Modernization is critical for banks to retain customer relationships.

→ Technology and interoperability are key for greater financial connectivity.

SO WHAT FOR RBI CASH MANAGEMENT

This directly impacts RBI CMIplus's strategy for cross-border payments, especially in CEE. It reinforces the need for continuous investment in technology, API capabilities, and adherence to global standards like ISO 20022 to ensure CMIplus remains competitive and provides seamless, efficient multi-currency payment solutions for its corporate clients. The emphasis on interoperability aligns with CMIplus's various channel integrations (EBICS, H2H, SWIFT, Open API).

URGENT Treasury Today | 2026-09-28 | #16

EMEA Treasury Evolution: Best Practices and Challenges Discussed

The 'Evolution of treasury in EMEA' article delves into the complexities of treasury operations across this vast region, questioning its coherence while acknowledging shared objectives. Experts analyze how best practices are adapting to varied local conditions, regulatory landscapes, and technological advancements. For treasurers in CEE, this discussion is crucial for benchmarking their strategies against regional peers and understanding broader trends in cash management, risk, and technology adoption. The insights help identify common pain points and opportunities for harmonized solutions. This strategic overview is vital for understanding the evolving demands on corporate treasury functions.

→ EMEA treasurers face diverse challenges across Europe, Middle East, and Africa.

→ Best practices are evolving, requiring adaptation to local specificities.

→ Despite regional differences, treasurers share common goals and objectives.

SO WHAT FOR RBI CASH MANAGEMENT

This article provides critical insights into the strategic needs and operational challenges of corporate treasurers in the CEE region, which is part of EMEA. CMIplus can leverage this understanding to tailor its platform features, services, and support to better align with evolving best practices and address specific regional demands, reinforcing its value proposition for clients.

URGENT Finextra | 2026-09-25 | #17

FedNow Expands to Cross-Border Instant Payments

The US Federal Reserve is actively working to extend the capabilities of its FedNow instant payments system to include cross-border transactions. This development will enable financial institutions participating in FedNow to facilitate real-time international transfers, enhancing speed and efficiency for global payments. While FedNow is a US domestic system, its expansion into cross-border functionality reflects a broader global trend towards faster, more transparent, and more accessible international payments. This move could set new expectations for payment infrastructure worldwide, pushing other regions and payment systems, including those in CEE, to develop similar real-time cross-border capabilities and potentially leveraging ISO 20022 for richer data exchange.

→ US Federal Reserve is enabling FedNow for cross-border payments.

→ FedNow is a real-time payments system.

→ Aims to allow participants to make international transfers.

SO WHAT FOR RBI CASH MANAGEMENT

This is highly relevant for RBI Cash Management and CMIplus, especially for its international corporate clients in CEE who require efficient multi-currency and cross-border payment solutions. The global push for real-time cross-border payments, exemplified by FedNow, will increase expectations for similar capabilities within CEE and for transactions involving CEE. CMIplus should monitor these developments to ensure its platform remains competitive and can support evolving client demands for instant international transfers.

URGENT Treasury Today | 2026-09-17 | #18

Liquidity Management Shifts: From Efficiency to Yield Optimisation

The article highlights a significant evolution in corporate liquidity management strategies. Historically focused on ensuring operational payment efficiency and sufficient cash availability, treasurers are now increasingly prioritising yield optimisation on their cash balances. This involves leveraging advanced tools and strategies to maximise returns while maintaining necessary liquidity and managing risk. The trend underscores the growing importance of sophisticated cash forecasting, in-house banking, and potentially new investment vehicles, pushing banks and technology providers to offer more integrated and intelligent solutions for treasury departments to meet these evolving demands.

→ Treasurers are moving beyond basic payment efficiency in liquidity management.

→ The strategic focus is shifting towards optimising yield on cash balances.

→ This requires sophisticated cash forecasting and investment strategies.

SO WHAT FOR RBI CASH MANAGEMENT

This trend is highly relevant for CMIplus as it directly impacts how RBI's corporate clients manage their cash and liquidity. CMIplus should explore features that support advanced cash forecasting, virtual accounts for better visibility, and potentially integration with investment options to help clients achieve yield optimisation, enhancing its value beyond just payment processing and cash consolidation.

URGENT Oliver Wyman Corporate Banking | 2024-06-01 | #01

European Wholesale Banks: Seizing the Moment for Future Performance

This insight likely highlights the urgent need for European wholesale banks to move beyond traditional operating models and capitalize on emerging market opportunities. It would emphasize comprehensive digital transformation across all core corporate banking functions, including cash management, payments, and corporate lending. The report would probably detail strategies for improving operational efficiency, leveraging advanced data analytics, and developing client-centric solutions to boost profitability and market share. It might also address the evolving competitive landscape, increasing regulatory pressures, and the imperative to adapt to sophisticated client expectations, particularly from large corporates seeking integrated and real-time financial services.

→ Digital transformation is critical for improving European wholesale banking profitability.

→ Focus on operational efficiency and cost reduction through technology adoption.

→ Develop new, client-centric value propositions beyond traditional services.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management and the CMIplus platform must prioritize continuous digital innovation and modernization to maintain a competitive edge in the CEE region. This includes enhancing real-time payment capabilities, expanding Open API offerings, and streamlining internal processes to significantly improve client experience and operational efficiency.

URGENT Oliver Wyman Corporate Banking | 2024-01-01 | #02

Wholesale Banking Outlook 2024: Strategic Credit and Digital Evolution

This outlook likely provides a comprehensive overview of the wholesale banking landscape for 2024, focusing on key trends and challenges. While 'extending credit' is a prominent theme, the report would typically cover the interconnectedness of lending, payments, and cash management in serving corporate clients. It would probably discuss the impact of macroeconomic factors, geopolitical shifts, and rapid technological advancements on corporate treasury functions. The outlook would advocate for integrated financial solutions, data-driven decision-making, and the adoption of new technologies like AI and Open Banking to enhance client relationships and drive revenue growth across all wholesale banking services.

→ Wholesale banks face pressure to innovate across credit and non-credit services.

→ Economic volatility and geopolitical factors significantly influence corporate treasury strategies.

→ Digitalization and advanced data analytics are crucial for competitive advantage.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should explore how its advanced cash management offerings can seamlessly complement credit solutions, providing a holistic financial view for large corporate clients. Integrating real-time data and leveraging AI for enhanced liquidity forecasting can significantly improve both credit risk assessment and cash optimization services for clients.

URGENT EY Future of Treasury | 2026-09-28 | #03

Treasury Digitalization Demands Real-time, Integrated Bank Services

The future of treasury is characterized by a shift towards real-time data, automated processes, and integrated platforms. Treasurers seek immediate insights into global cash positions, efficient liquidity management, and streamlined payment execution. Banks have a critical opportunity to move beyond traditional transaction processing by offering advanced digital tools, Open Banking APIs, and value-added services that embed deeply into corporate ERP/TMS systems, enabling true real-time treasury operations. This requires significant investment in technology and a re-evaluation of service delivery models to meet evolving client expectations.

→ Real-time cash visibility and control are paramount for modern treasuries.

→ API-driven integration is essential for seamless connectivity between banks and corporate systems.

→ Automation of routine treasury tasks enhances efficiency and strategic focus.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must accelerate its Open Banking API strategy and enhance real-time reporting capabilities for CEE corporates. Focus on deeper integration with corporate ERP/TMS systems and instant payment processing to meet evolving client demands for immediate data and control.

URGENT EY Future of Treasury | 2026-09-28 | #04

AI Revolutionizes Treasury: Enhancing Forecasting, Risk, and Efficiency

AI and machine learning are moving beyond hype to practical applications in treasury. These technologies can analyze vast datasets to provide highly accurate cash flow predictions, identify anomalies for fraud detection, optimize working capital, and automate complex reconciliation processes. For banks, this means developing AI-powered analytics for clients, offering predictive insights, and building intelligent automation into cash management platforms. The integration of AI will enable treasurers to make more informed decisions, mitigate risks more effectively, and achieve significant cost savings across their operations.

→ AI significantly enhances the accuracy of cash flow forecasting and risk prediction.

→ Automated anomaly detection improves fraud prevention and operational security.

→ AI-driven insights empower treasurers for better strategic decision-making.

SO WHAT FOR RBI CASH MANAGEMENT

RBI CMIplus should explore integrating AI capabilities for enhanced cash flow forecasting, fraud detection, and automated reconciliation services. This could differentiate the platform and provide significant value to CEE corporates, aligning with the 'AI in banking' focus.

URGENT EY Future of Treasury | 2026-09-28 | #05

Banks Must Evolve as Strategic Treasury Ecosystem Partners

As treasury functions become more strategic and technologically advanced, corporates expect their banking partners to provide more than just accounts and payments. They look for comprehensive solutions that include advisory services, advanced analytics, seamless integration with various fintechs, and support for emerging payment methods. Banks have an opportunity to solidify their role by fostering an open ecosystem, leveraging APIs for connectivity, and co-creating solutions with clients. This shift requires banks to be agile, innovative, and customer-centric, moving towards a 'platform-as-a-service' model for treasury to maintain relevance and drive value.

→ Corporates increasingly seek banks as strategic partners, not just transaction providers.

→ Open Banking and API strategies are crucial for banks to remain central to treasury.

→ Value-added services beyond traditional payments are expected from banking partners.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should position RBI as a strategic partner by expanding its advisory services, fostering an Open Banking ecosystem for CEE clients, and exploring partnerships to offer a broader suite of integrated treasury solutions. This will enhance client stickiness and attract new corporates.

URGENT EY Financial Services Regulatory | 2026-09-28 | #06

PSD3 and Open Banking: Reshaping Payments for CEE Corporates

The upcoming PSD3 framework is poised to significantly evolve the payments landscape, building on PSD2's foundation by enhancing consumer protection, fostering greater competition, and standardizing API access. For CEE financial institutions, this means a renewed focus on robust, secure, and interoperable Open Banking APIs, moving beyond basic account information to more sophisticated payment initiation services and value-added offerings. The regulation will likely push for broader data sharing, enabling innovative treasury solutions and real-time cash management. Firms must invest in scalable infrastructure and compliance frameworks to leverage these opportunities while mitigating new risks.

→ Mandatory API access for broader financial data.

→ Enhanced fraud prevention measures and liability shifts.

→ Potential for new payment schemes and instant payment adoption.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize its Open Banking API roadmap, ensuring compliance with PSD3's enhanced requirements and exploring new value-added services for corporate treasuries. This includes supporting instant payment rails and leveraging data for advanced liquidity management.

URGENT EACT | 2026-09-23 | #07

DLT, Tokenisation, AI: Transforming Corporate Treasury and Finance

The joint report, "DLT & the Future of Corporate Treasury and Financing," explores the profound impact of Distributed Ledger Technology (DLT), tokenisation, and Artificial Intelligence on the corporate treasury function. It identifies these technologies as catalysts for significant change in traditional financial operations, promising enhanced efficiency, transparency, and speed. The report suggests a future where corporate liquidity management and access to finance are fundamentally reshaped, moving towards more agile and integrated digital ecosystems. This transformation will require treasurers to adapt their strategies and embrace new digital tools to remain competitive and optimize financial flows.

→ DLT, tokenisation, and AI are converging to redefine corporate treasury.

→ Significant transformation expected in money movement and liquidity management.

→ New avenues for corporate finance access through digital innovations.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management must actively explore DLT and tokenisation use cases for CMIplus, particularly for cross-border payments, liquidity management, and new financing models. Integrating AI capabilities for predictive analytics and automation within the platform will be crucial to meet evolving corporate treasury demands.

URGENT EACT | 2026-06-05 | #08

EACT 2026 Survey Reveals Top European Corporate Treasury Priorities

For over a decade, the EACT Annual Treasury Survey has been a critical barometer for the European corporate treasury profession. The 2026 results offer a comprehensive overview of current challenges and strategic focuses for treasurers across the continent. While the specific findings are not detailed in the snippet, previous surveys (e.g., 2021) highlighted cash-flow forecasting, digitization, and automation as top priorities, along with fraud prevention and regulatory compliance. This year's survey likely continues to emphasize these areas while potentially introducing new concerns related to geopolitical risks, sustainability, or advanced technologies. The insights are invaluable for banks to align their product development and service offerings with actual corporate needs.

→ Authoritative barometer of European corporate treasury priorities.

→ Identifies key concerns and ambitions of treasurers.

→ Informs strategic planning for financial service providers.

SO WHAT FOR RBI CASH MANAGEMENT

The EACT 2026 Survey results are paramount for shaping the CMIplus roadmap. RBI Cash Management should deeply analyze the full survey report to identify specific pain points and priorities of CEE corporates, ensuring CMIplus features and services directly address these needs, especially in areas like instant payments, VoP, and advanced liquidity tools.

URGENT Deloitte Banking Outlook | 2026-01-15 | #09

AI Ambition Reshapes Banking: Efficiency, Insights, and Client Experience

The 2026 banking outlook highlights AI as a pivotal technology for financial institutions, moving beyond experimental pilots to strategic, enterprise-wide implementation across various functions. AI is expected to drive significant improvements in areas such as fraud detection, risk management, personalized financial advice, and back-office automation, leading to substantial cost savings and improved service delivery. The report likely emphasizes the critical need for robust data governance, ethical AI frameworks, and skilled talent to fully leverage AI's potential. Early adopters who strategically integrate AI are positioned to gain a substantial competitive edge in the evolving financial landscape.

→ AI adoption shifts from pilot to strategic integration across banking operations.

→ Operational efficiency and personalized client experiences are key drivers for AI investment.

→ Robust data governance and ethical AI frameworks are crucial for successful deployment.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should explore AI for enhanced liquidity forecasting, fraud detection in corporate payments, and intelligent client support. Integrating AI-driven insights could offer corporate treasurers more sophisticated cash flow management tools and predictive analytics, differentiating the platform in the CEE market.

URGENT Oliver Wyman Corporate Banking | 2023-01-01 | #10

2023 Industry Outlook: Navigating the Great Unknown in Banking

This outlook, though published in 2023, would have laid the groundwork for many ongoing trends in corporate banking. It likely addressed the profound impact of macroeconomic shifts, evolving regulatory landscapes, and accelerating technological disruption on financial institutions worldwide. The report would have emphasized the importance of strategic foresight, robust risk management, and continuous investment in future-proof technologies to navigate an unpredictable market. Key themes would include the increasing demand for digital services, the emergence of new payment methods, and the necessity for banks to adapt their business models to remain relevant and competitive amidst global uncertainties.

→ Macroeconomic volatility and geopolitical risks significantly shaped the 2023 banking landscape.

→ Technological disruption necessitates strategic investment and agile responses from banks.

→ Growing demand for digital and real-time services is a persistent imperative.

SO WHAT FOR RBI CASH MANAGEMENT

While a 2023 outlook, its foundational insights on agility and the increasing demand for digital services remain highly relevant. CMIplus should continue to build a resilient, future-proof platform, focusing on modularity and rapid adaptation to new payment standards (like ISO 20022) and evolving client needs, particularly across the CEE region.

URGENT EY Financial Services Regulatory | 2026-09-28 | #11

AI Governance: Navigating Ethical and Regulatory Challenges in Banking

The rapid adoption of AI across financial services, from fraud detection to personalized banking and treasury analytics, necessitates stringent governance. Regulators are moving towards comprehensive frameworks that address algorithmic bias, data privacy, explainability, and accountability. Firms must establish clear internal policies, risk management protocols, and ethical guidelines for AI development and deployment. This includes ensuring data quality, model validation, and human oversight to prevent unintended consequences and maintain regulatory compliance. Proactive AI governance will be a competitive differentiator, fostering innovation while safeguarding against reputational and operational risks.

→ Regulatory focus on AI explainability and transparency.

→ Mandatory risk assessments for high-risk AI applications.

→ Emphasis on preventing algorithmic bias and discrimination.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must develop a clear AI governance strategy for any AI features integrated into its platform, ensuring compliance with emerging regulations, particularly regarding data usage, model transparency, and ethical considerations for corporate treasury solutions.

URGENT Deloitte Banking Outlook | 2026-01-15 | #12

Stablecoins Emerge as Disruptive Force in Payments and Treasury

Deloitte's 2026 outlook points to the growing prominence of stablecoins, which could fundamentally alter the landscape of cross-border payments and corporate liquidity management. The report likely discusses the regulatory challenges and opportunities associated with stablecoins, emphasizing their potential for faster, cheaper, and more transparent transactions, particularly in international trade. Banks are advised to assess the impact on their existing payment infrastructure, consider strategic partnerships with stablecoin issuers, or even explore issuing their own stablecoin-like offerings to remain relevant. Navigating the evolving regulatory environment will be key to successful adoption and integration.

→ Stablecoins are identified as a significant disruptive force in the global payments landscape.

→ They offer potential for faster, cheaper cross-border transactions and new financial services.

→ Banks need proactive strategies for integration, competition, or potential issuance.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should closely monitor stablecoin developments, particularly their potential impact on multi-currency payments, cross-border cash pooling, and FX for CEE corporates. Understanding the regulatory trajectory and client demand for stablecoin-based transactions will be crucial for future payment rail considerations and platform evolution, potentially influencing API strategies.

EU Regulations Transform Liquidity Management: IPR, PSR, PSD3 Impact

INSTANT PAYMENTS, PSD3, LIQUIDITY MANAGEMENT

The Euro Banking Association's Liquidity Management Working Group (LMWG) has published a report examining the far-reaching implications of three key EU regulatory initiatives: the Instant Payments Regulation (IPR), the proposed Payment Services Regulation (PSR), and the proposal for Payment Services Directive 3 (PSD3). The report highlights how these measures will accelerate the uptake of instant payments, promote a level playing field among market participants, and fundamentally transform the liquidity management landscape. For banks, this means adapting their liquidity strategies and systems to cope with real-time settlement and increased payment velocity across the financial sector, necessitating robust intraday liquidity management capabilities.

→ IPR, PSR, and PSD3 are key drivers of change for liquidity management.

→ Accelerated uptake of instant payments across the financial sector.

→ Transformation of the overall liquidity management landscape.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus must assess the strategic implications of IPR, PSR, and PSD3 on its liquidity management offerings and internal processes. This includes evaluating the need for real-time liquidity solutions and adapting to increased instant payment volumes and associated intraday liquidity demands for corporate clients in CEE.

URGENT Euro Banking Association | 2025-09-26 | #02

EBA Identifies Key Challenges for Instant Payments VoP Matching Checks

VOP, INSTANT PAYMENTS

The EBA Instant Payments Practitioners Group (IPG) has published an insight note titled “A match made in heaven? Key challenges for VOP matching checks”. The note delves into practical pain points that significantly impact the accuracy and overall quality of VoP matching checks, which are crucial for fraud prevention in instant payments and mandated by the Instant Payments Regulation. Identified issues include the absence of a standardised name-matching logic across systems, restrictions on name field lengths, and limitations related to virtual accounts. Addressing these challenges is vital for Payment Service Providers (PSPs) to ensure effective and compliant VoP implementation and to mitigate fraud risks.

→ Lack of standardised name-matching logic for VoP checks.

→ Name field length restrictions impacting accuracy.

→ Limitations concerning virtual accounts in VoP processes.

SO WHAT FOR RBI CASH MANAGEMENT

RBI/CMIplus needs to review its current and planned VoP implementation, particularly for instant payments, against the identified challenges. This includes evaluating its name-matching algorithms, considering potential workarounds for field length restrictions, and assessing implications for virtual account services to ensure robust and compliant VoP checks for corporate clients.

URGENT Deutsche Bank | 2026-09-28 | #01

Europe's Instant Payments Window: DB Advocates Adoption

The featured article on flow.db.com showcases insights from Thomas Vlassopoulos of the ECB, detailing the Eurosystem's payments strategy as a catalyst for change. Deutsche Bank, through its thought leadership platform, underscores the critical importance of embracing innovations such as tokenised settlement assets and pan-European instant payments. This engagement signals DB's proactive stance in shaping and responding to the evolving digital payments ecosystem. The narrative frames this as a 'window of opportunity' that demands immediate action from financial institutions and their corporate clients to remain competitive and compliant.

→ ECB payments strategy for Europe

→ Focus on cross-border instant payments

→ Discussion of tokenised settlement assets

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure its platform is fully ready for cross-border instant payments and actively explore capabilities for tokenised assets to remain competitive. This reinforces the need for continuous investment in real-time payment infrastructure and future-proofing.

URGENT Deutsche Bank | 2026-09-28 | #02

Deutsche Bank Deepens API-First Strategy for Corporates

Deutsche Bank is strategically investing in its API capabilities, particularly through its CB Connect platform, to offer seamless integration of cash management, payments, and liquidity services directly into corporate enterprise resource planning (ERP) and treasury management systems (TMS). This API-first approach facilitates embedded finance solutions, allowing corporates to initiate payments, access real-time account information, and manage liquidity more efficiently within their own operational workflows. The focus is on providing greater automation, transparency, and control, which is crucial for large international corporates. This commitment ensures DB remains at the forefront of digital banking, catering to the sophisticated needs of its global client base, including those in CEE.

→ Expansion of CB Connect API platform

→ Enhanced ERP/TMS system integration

→ Facilitating embedded finance solutions

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus needs to continuously enhance its Open Banking API offerings, ensuring comprehensive coverage and ease of integration to compete with DB's advanced API ecosystem. Prioritizing developer experience and robust documentation will be key.

URGENT Deutsche Bank | 2026-09-28 | #03

DB Bolsters CEE Cash Management with Virtual Accounts

Deutsche Bank is reinforcing its commitment to corporate clients in Central and Eastern Europe by providing sophisticated cash management tools. A key focus is the implementation and expansion of virtual account solutions, which enable corporates to streamline payment reconciliation, improve liquidity visibility, and simplify cash pooling structures across multiple entities and currencies within the CEE region. These solutions cater to the complex needs of international corporates operating in diverse CEE markets, offering greater operational efficiency and financial control. This aligns with the broader trend of digital treasury transformation and positions DB as a strong competitor for regional cash management mandates.

→ Strengthening cash management in CEE

→ Expansion of virtual account solutions

→ Optimizing reconciliation and liquidity management

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus, with its strong CEE network, must ensure its virtual account and cash pooling capabilities are best-in-class and widely adopted to maintain its competitive edge against major players like DB. Proactive client engagement on these advanced features is crucial.

URGENT UniCredit | 2026-09-28 | #04

UniCredit Enhances Digital Banking and API Connectivity for CEE Corporates

UniCredit continues to bolster its digital offerings for corporate clients, with a particular emphasis on the CEE region. This includes the expansion of API-driven services, allowing corporates to seamlessly integrate their ERP and TMS systems with UniCredit's banking platforms. The focus is on providing real-time access to account information, payment initiation, and liquidity management tools, addressing the growing demand for automated and efficient financial operations. This move strengthens UniCredit's position as a key partner for international businesses operating in CEE, aligning with their 'Digital & Data' strategic pillar.

→ Increased focus on API integration for corporate treasury.

→ Real-time data access and payment initiation via APIs.

→ Targeting multinational corporations in CEE for digital solutions.

SO WHAT FOR RBI CASH MANAGEMENT

This directly competes with CMIplus's H2H and Open API offerings, pushing for greater integration and real-time capabilities. CMIplus must ensure its API suite remains competitive in terms of breadth, ease of integration, and regional coverage.

URGENT UniCredit | 2026-09-28 | #05

UniCredit Strengthens Integrated Cash Management and Liquidity Solutions in CEE

Building on its strong presence in CEE, UniCredit is enhancing its suite of cash management and liquidity solutions to meet the complex needs of corporate clients. This includes optimizing multi-currency accounts, cross-border cash pooling structures, and virtual account management capabilities. The goal is to offer a seamless, harmonized experience across its CEE footprint, enabling corporates to centralize treasury functions, improve working capital management, and gain better visibility over their regional cash flows. This aligns with their 'pan-European' strategy and commitment to 'best-in-class solutions' in CEE.

→ Enhanced multi-currency and cross-border cash pooling.

→ Focus on harmonized solutions across CEE network.

→ Improved working capital and cash visibility for corporates.

SO WHAT FOR RBI CASH MANAGEMENT

This directly challenges CMIplus's core offering in CEE, particularly for multi-country cash pooling and liquidity. CMIplus needs to highlight its unique network strengths and local expertise to differentiate its integrated solutions.

URGENT UniCredit | 2026-09-28 | #06

UniCredit Accelerates Real-Time Payments and ISO 20022 Adoption for Corporates

As part of its digital transformation, UniCredit is prioritizing the rollout of instant payment solutions and the comprehensive adoption of the ISO 20022 messaging standard for corporate transactions. This initiative ensures that corporate clients can benefit from faster payment processing, richer data exchange, and improved reconciliation capabilities. The bank is leveraging its pan-European network to provide consistent real-time payment services, which is particularly beneficial for cross-border trade and supply chain finance in the CEE markets. This commitment underpins their vision to be 'the Bank for Europe's Future' and empower communities to progress.

→ Full ISO 20022 adoption for corporate payments.

→ Expansion of instant payment services across Europe.

→ Improved data richness and reconciliation for businesses.

SO WHAT FOR RBI CASH MANAGEMENT

This is a direct competitive move in payment infrastructure. CMIplus must ensure its instant payment offerings are robust and that its ISO 20022 capabilities are fully leveraged, especially for cross-border payments within the CEE network.

URGENT HSBC | 2026-07-07 | #07

HSBC Shifts Türkiye Strategy to International Wholesale Clients

HSBC Holdings plc announced a strategic review of its retail banking and domestic-focused smaller and mid-sized corporate banking operations in Türkiye. The bank intends to sharpen its focus on serving international wholesale clients, aligning with its global strategy to concentrate on areas where it has a competitive advantage through its international network. This move suggests a deeper commitment to providing sophisticated transaction banking and treasury solutions for multinational corporations operating in and through Türkiye, a market often considered part of the broader CEE/EMEA region. For CMIplus, this signals HSBC's intent to be a strong competitor for large, internationally-oriented corporates.

→ HSBC is exiting retail and domestic SME banking in Türkiye.

→ The new focus is exclusively on international wholesale clients.

→ This aligns with HSBC's global strategy of leveraging its international network.

SO WHAT FOR RBI CASH MANAGEMENT

This move indicates HSBC's strong commitment to the international corporate segment in a CEE-relevant market, intensifying competition for CMIplus's target clients. CMIplus should monitor HSBC's enhanced offerings for large corporates in Türkiye and neighboring CEE countries.

URGENT Citi Treasury | 2026-09-28 | #08

Citi Enhances API-Driven Cash Management for CEE Corporates

Citi continues to invest heavily in its API-first strategy, extending its advanced cash management and payment APIs to the CEE region. This includes robust support for instant payment schemes, enabling corporate treasurers to execute real-time transactions and gain immediate visibility into their cash positions. The focus is on seamless integration with client ERP and TMS systems, facilitating automated workflows and improved operational efficiency across multiple currencies and countries within CEE. This strategic direction underscores Citi's commitment to digital transformation in corporate banking.

→ Expansion of API banking for cash management in CEE.

→ Support for real-time and instant payment processing.

→ Enhanced integration with corporate ERP/TMS systems.

SO WHAT FOR RBI CASH MANAGEMENT

This directly competes with CMIplus's Open API and Instant Payments offerings, pushing RBI to ensure its API suite is robust, feature-rich, and competitive in terms of speed and integration capabilities for CEE clients.

URGENT HSBC | 2026-06-17 | #09

HSBC Partners Google Cloud for Global AI Banking Innovation

The multi-year partnership between HSBC and Google Cloud is set to embed advanced AI capabilities across the bank's global operations. This initiative will drive innovation in critical areas such as delivering hyper-personalised financial advice to clients and enhancing financial crime risk management systems. For corporate and transaction banking, this implies more sophisticated data analytics for treasury intelligence, improved fraud detection, and potentially more tailored cash management solutions. The focus on AI suggests a push towards more intelligent, automated, and secure digital banking experiences for corporate clients, impacting how treasury functions interact with their bank.

→ Multi-year partnership with Google Cloud for AI integration.

→ Focus on hyper-personalised advice and financial crime risk management.

→ AI capabilities to be deployed across global bank operations.

SO WHAT FOR RBI CASH MANAGEMENT

HSBC's significant investment in AI will likely lead to more intelligent, data-driven treasury solutions and enhanced security features, raising the bar for digital banking platforms. CMIplus needs to accelerate its own AI integration plans to remain competitive in offering advanced analytics and personalized services to corporate treasurers.

URGENT Citi Treasury | 2026-09-28 | #10

Citi Strengthens CEE Liquidity Management with Virtual Accounts

Recognizing the growing need for sophisticated treasury tools in CEE, Citi is bolstering its liquidity management offerings. This includes the deployment of advanced virtual account structures, enabling corporates to centralize funds, automate reconciliation, and gain granular visibility into their cash flows across various entities and currencies within the region. These solutions are designed to support efficient cash pooling, intercompany lending, and payment-on-behalf (POBO) and collection-on-behalf (COBO) models, providing treasurers with greater control and flexibility in managing their working capital. The focus is on reducing operational complexity and maximizing liquidity.

→ Enhanced virtual account capabilities for CEE.

→ Focus on optimizing working capital and reconciliation.

→ Support for cash pooling and POBO/COBO models.

SO WHAT FOR RBI CASH MANAGEMENT

This directly challenges CMIplus's offerings in liquidity management and virtual accounts. RBI needs to ensure its VoP (Virtual Accounts) and cash pooling solutions are equally sophisticated, easy to implement, and provide competitive value for CEE corporates.

URGENT BNP Paribas | 2025-06-05 | #11

BNP Paribas Partners XTransfer for Simplified Cross-Border Payments

BNP Paribas has announced a strategic partnership with XTransfer, a leading B2B cross-border payment platform, to streamline and simplify international payment processes for its corporate clients. This collaboration is designed to leverage XTransfer's network and technology to offer more efficient, transparent, and cost-effective cross-border payment solutions. The partnership underscores BNP Paribas's commitment to expanding its digital payment capabilities and supporting the global trade activities of its clients, including those with operations in the CEE region who frequently engage in multi-currency international transactions.

→ Strategic partnership with B2B cross-border payment platform XTransfer.

→ Aims to simplify and streamline international payment processes for corporates.

→ Leverages XTransfer's network and technology for efficiency and cost-effectiveness.

SO WHAT FOR RBI CASH MANAGEMENT

This partnership highlights the trend of banks collaborating with fintechs to extend payment reach and improve user experience. CMIplus should evaluate potential partnerships with specialized cross-border payment providers to enhance its own multi-currency and international payment offerings for CEE corporates.

URGENT Intesa Sanpaolo | 2026-09-28 | #12

Intesa Sanpaolo Bolsters CEE Digital Cash Management and API Offerings

Intesa Sanpaolo, a significant player with a strong presence in the CEE region, is expected to continue strengthening its corporate and transaction banking offerings. This involves a strategic focus on digital transformation to meet the evolving needs of large corporates and SMEs, particularly in cash management and treasury services. The bank aims to provide more integrated and real-time solutions, likely through advanced API connectivity and enhanced online platforms, to improve efficiency for its international clients operating across its CEE network. This strategic direction aligns with broader industry trends towards digitalizing treasury functions and offering sophisticated multi-currency payment and liquidity management services to maintain its competitive edge.

→ Strategic focus on digital transformation for corporate clients in CEE.

→ Emphasis on API-driven solutions for enhanced cash management and treasury.

→ Continuous improvement of multi-currency payment and liquidity services across its network.

SO WHAT FOR RBI CASH MANAGEMENT

Intesa Sanpaolo's digital push in CEE directly competes with CMIplus's offerings, particularly in API, H2H, and multi-currency cash management. CMIplus must ensure its platform remains competitive with advanced features, seamless client experience, and robust integration capabilities.

Deep analysis of key industry reports

EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

→ {'description': 'of respondents will use managed services from banks to address the challenges of digitization.', 'value': '44%', 'page': 7}

→ {'description': 'of CFOs and treasurers are comfortable with customized strategic advice based on data analysis from banks.', 'value': '90%', 'page': 12}

→ {'description': "of corporate treasurers are comfortable using a sector-specific platform tailored to their industry's unique needs.", 'value': '92%', 'page': 17}

TOP ACTION FOR CMIPLUS

[HIGH] Optimize CMIplus cash management solutions for specific CEE sectors to differentiate and boost client engagement and loyalty.

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.

TOP ACTION FOR CMIPLUS

[HIGH] Integrate AI for Intelligent Routing, Fraud Detection, and Liquidity Management

Journeys to Treasury 2025/26

The 10th anniversary edition of Journeys to Treasury highlights a renewed focus on treasury fundamentals, digital transformation, and strategic evolution. Key themes include the modernization of payments (Instant Payments, VoP, ISO 20022), the growing importance of real-time liquidity and virtual accounts, and the practical application of AI. Corporates are prioritizing robust systems, clean data, and enhanced skills to navigate a complex, interconnected financial environment, moving treasury from an operational role to a strategic business partner.

KEY STATISTICS

→ {'statistic': 'Cash flow forecasting is the number one priority for 30.5% of treasurers.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': 'Reviewing or replacing treasury technology infrastructure is the third-highest priority.', 'source': 'EACT Treasury Survey 2025'}

→ {'statistic': '27.3% of treasurers cite inaccurate forecasting as a leading challenge for centralisation.', 'source': 'EACT Treasury Survey 2025'}
