EU Mandates Instant Payments for All SEPA Transactions

The European Parliament has formally adopted the Instant Payments Regulation, making instant credit transfers mandatory and free of charge for all euro transactions within the SEPA zone. This regulation, expected to enter into force in early 2027, aims to modernize the European payment landscape, ensuring funds are available to recipients within seconds, 24/7/365. Banks must offer instant payments at the same or lower cost as traditional SEPA credit transfers. A crucial component is the mandatory Verification of Payee (VoP), requiring payment service providers to verify the payee's identity to mitigate fraud risks associated with real-time transactions. This represents a significant shift for financial institutions and corporate treasuries, demanding substantial IT infrastructure upgrades and process adjustments.

→ Mandatory instant payments for all SEPA euro credit transfers.

→ Funds available within 10 seconds, 24/7/365.

→ Pricing must be equal to or lower than standard SEPA credit transfers.

SO WHAT FOR RBI CASH MANAGEMENT

This regulation is critical for CMIplus, requiring immediate focus on full compliance and enhancement of instant payment capabilities across all CEE network banks. The VoP mandate necessitates integration with national VoP schemes or development of proprietary solutions to protect clients from fraud in real-time environments. CMIplus must ensure seamless, cost-effective instant payment processing and robust fraud prevention tools.

URGENT Der Treasurer | 2026-09-15 | #02

ISO 20022 Migration Accelerates, EBICS 3.0 Adoption Critical

The SWIFT CBPR+ migration to ISO 20022 is nearing its final stages, with many financial institutions already live with the new standard for cross-border payments. Corporates are increasingly adopting ISO 20022 for domestic and international payments, leveraging its rich data capabilities for better reconciliation and treasury management. Concurrently, the adoption of EBICS 3.0 is gaining momentum, particularly in Germany and Austria, offering enhanced security, multi-bank capabilities, and support for ISO 20022 XML messages. This dual shift requires corporates to update their ERP/TMS systems and banking interfaces to ensure seamless communication and data exchange. Banks are investing heavily in infrastructure to support these standards, providing advanced APIs and H2H connections.

→ SWIFT CBPR+ ISO 20022 migration is in final phases.

→ Corporates benefit from rich data for reconciliation and TMS.

→ EBICS 3.0 offers enhanced security and multi-bank support.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full support for ISO 20022 across all payment types and channels, including advanced XML capabilities for corporate clients. Continued investment in EBICS v3.0 capabilities is essential for secure and efficient corporate-to-bank communication, especially for clients in Germany and Austria. Promoting API-based connectivity alongside H2H and SWIFT will cater to diverse corporate needs for data exchange and payment initiation.

URGENT Der Treasurer | 2026-08-20 | #03

Open Banking APIs Transform Corporate Treasury Operations

The evolution of Open Banking, initially driven by PSD2, is now fundamentally changing how corporates manage their treasury functions. Beyond basic account information and payment initiation, banks are offering a wider array of APIs for services like virtual accounts, cash pooling, FX trading, and liquidity management. This allows corporate treasuries to achieve greater automation, real-time visibility into cash positions across multiple banks and currencies, and more efficient reconciliation. The shift towards API-driven treasury operations reduces manual effort, improves data accuracy, and enables more sophisticated cash forecasting and risk management. Companies are increasingly seeking banks that provide comprehensive API catalogs and robust developer support.

→ Open Banking APIs extend beyond PSD2 mandates.

→ Enables real-time cash visibility and automated processes.

→ Supports services like virtual accounts, cash pooling, FX.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus needs to continuously expand its Open Banking API offerings, moving beyond regulatory compliance to provide value-added services for corporate clients. This includes APIs for real-time account information, payment initiation, virtual account management, and potentially cash pooling. Promoting API integration with client ERP/TMS systems will enhance CMIplus's competitive edge, offering greater automation and data richness for CEE corporates.

URGENT The Global Treasurer | 2026-10-05 | #04

EU Instant Payments Mandate: CEE Banks Prepare for Compliance

The European Union's Instant Payments Regulation, officially adopted, mandates that all EU/EEA banks offer instant credit transfers at the same cost as standard transfers. This regulation is particularly impactful for CEE countries, where adoption rates vary. Banks must ensure their systems support 24/7/365 processing, immediate fund availability, and robust fraud prevention. The first key deadline for receiving instant payments is approaching, with subsequent deadlines for sending. Corporates, especially those using platforms like CMIplus, will benefit from enhanced liquidity management and faster transaction cycles, but also need to adapt their internal processes and ERP/TMS integrations.

→ EU Instant Payments Regulation adopted, mandating real-time transfers.

→ 24/7/365 processing required for all EU/EEA banks.

→ CEE banks are actively upgrading infrastructure for compliance.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus is well-positioned to support corporates with instant payments, leveraging its multi-currency and regional network. RBI needs to ensure all network banks in CEE are compliant and CMIplus offers seamless integration for real-time transactions and liquidity updates.

URGENT The Global Treasurer | 2026-10-05 | #05

PSD3 and Open Banking Evolution: New Opportunities for Corporate Treasury

The European Commission's proposal for PSD3 and the accompanying Financial Data Access (FIDA) framework aims to supersede PSD2, broadening the scope of data sharing beyond payment accounts. This evolution of Open Banking will enable corporates to access a wider range of financial data, facilitating advanced cash management, liquidity forecasting, and automated reconciliation. For CMIplus, this means potential for richer API integrations, offering corporates a more holistic view of their financial positions across multiple banks and accounts. The industry is closely watching the legislative process, anticipating new standards for secure data exchange and consent management.

→ PSD3 and FIDA frameworks proposed to expand Open Banking.

→ Broader data sharing beyond payment accounts for corporate treasury.

→ New opportunities for advanced cash management and liquidity.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus's Open API strategy aligns perfectly with PSD3/FIDA. RBI should actively participate in shaping standards and ensure CMIplus offers advanced API capabilities for data aggregation and initiation, enhancing its value proposition for corporate clients in CEE.

URGENT The Global Treasurer | 2026-10-05 | #06

ISO 20022 Migration Progress: Global Standardisation and Treasury Impact

The ongoing global transition to ISO 20022 is a critical development for corporate treasury, impacting everything from payment initiation to cash reporting. While SWIFT's migration for cross-border payments is well underway, domestic schemes in various CEE countries are also adopting the standard, creating a complex landscape for corporates. The richer data capabilities of ISO 20022 enable better reconciliation, fraud detection, and liquidity management. However, corporates need to ensure their ERP and TMS systems are fully capable of generating and consuming ISO 20022 messages. Banks, including RBI, are focused on supporting clients through this transition, offering enhanced reporting and payment processing via platforms like CMIplus.

→ Global ISO 20022 migration continues for payments and reporting.

→ Richer data enables better reconciliation and fraud detection.

→ Impacts cross-border and domestic payment schemes in CEE.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus is a key enabler for ISO 20022 adoption, supporting both payment initiation and reporting. RBI must ensure CMIplus provides comprehensive ISO 20022 capabilities, including advanced data mapping and validation, to assist CEE corporates in leveraging the standard's full benefits.

URGENT Strategic Treasurer | 2026-09-20 | #07

EU Instant Payments Regulation: CEE Banks Accelerate Adoption

The European Union's Instant Payments Regulation, which entered into force in April 2024, requires all payment service providers (PSPs) in the EU and EEA to offer instant credit transfers in EUR. Banks must ensure reachability for receiving instant payments by early 2025 and for sending them by early 2027. A key provision is that instant payments cannot be charged at a higher fee than traditional SEPA credit transfers. This regulation is set to significantly impact corporate cash management by accelerating payment cycles, improving liquidity, and enabling real-time treasury operations. CEE banks, while often early adopters of digital solutions, face the challenge of upgrading legacy systems and ensuring interoperability across diverse national infrastructures.

→ Regulation entered into force: April 2024.

→ Mandatory receiving capability: Early 2025.

→ Mandatory sending capability: Early 2027.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management must ensure CMIplus is fully compliant with the EU Instant Payments Regulation across its CEE network. This involves upgrading infrastructure, ensuring seamless integration for clients, and highlighting the benefits of real-time liquidity and payment processing.

URGENT Strategic Treasurer | 2026-09-10 | #08

ISO 20022 Migration: Unlocking Data for Corporate Treasury

The industry-wide shift to ISO 20022 is progressing, with major milestones like SWIFT's deadline for cross-border payments already passed for many. This standard offers significantly more structured and detailed data compared to legacy formats, enabling better reconciliation, improved fraud detection, and deeper insights into cash flows. Corporate treasuries are increasingly looking to leverage this data for automated processes and strategic decision-making. However, challenges remain in ensuring consistent data quality from banks, adapting internal ERP/TMS systems, and fully realizing the potential of the new format. The transition requires close collaboration between corporates, banks, and technology providers.

→ Enhanced data fields for payments.

→ Improved reconciliation and reporting.

→ SWIFT CBPR+ migration largely completed.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full support for ISO 20022 across all payment types and channels (EBICS, H2H, SWIFT). RBI needs to guide clients on how to best leverage the rich ISO 20022 data for their treasury operations and ensure smooth integration with their systems.

URGENT Strategic Treasurer | 2026-09-01 | #09

PSD3 & Open Banking: Reshaping Corporate Payment Connectivity

The proposed PSD3 (Payment Services Directive 3) and PSR (Payment Services Regulation) aim to build upon PSD2, strengthening consumer protection, combating fraud, and further standardizing Open Banking interfaces. For corporates, this means an even greater emphasis on API-driven connectivity for account information services (AIS) and payment initiation services (PIS). Banks will be pushed to offer more robust and standardized APIs, facilitating better cash visibility, automated reconciliation, and potentially new treasury services like enhanced cash pooling and virtual accounts. The directive also addresses fraud prevention more directly, which is crucial for corporate security. The regulatory landscape is pushing for a more interconnected and efficient payment ecosystem.

→ PSD3 aims to enhance PSD2 framework.

→ Focus on API standardization and fraud prevention.

→ Enables real-time cash visibility and payment initiation.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should proactively prepare CMIplus for PSD3 requirements, focusing on robust API development for corporate clients. This includes offering advanced Open Banking services for multi-bank account aggregation, payment initiation, and integrating these capabilities into CMIplus's core offerings.

URGENT The Paypers | 2026-09-30 | #10

European Payment Schemes Unite for Interoperability Entity

On September 30, 2026, a significant step towards a unified European payment landscape was taken with the establishment of a new interoperability entity. This collaboration brings together Bancomat (Italy), Bizum (Spain), EPI/Wero (Eurozone), SIBS–MB WAY (Portugal), and Vipps MobilePay (Nordics), representing a substantial portion of Europe's mobile payment users. The entity's primary goal is to enable cross-border transactions and enhance the user experience by allowing customers of one scheme to pay seamlessly with merchants accepting another. This move is crucial for fostering competition, reducing fragmentation, and potentially accelerating the adoption of instant payments across Europe, aligning with broader EU regulatory goals for a truly integrated payment market. It could also pave the way for future pan-European payment solutions and standards.

→ Launched on 2026-09-30.

→ Involves Bancomat, Bizum, EPI/Wero, SIBS–MB WAY, Vipps MobilePay.

→ Aims for seamless cross-border mobile payments interoperability.

SO WHAT FOR RBI CASH MANAGEMENT

This development is critical for RBI Cash Management and CMIplus as it signifies a major shift towards a more integrated European payment ecosystem. CMIplus must monitor the technical and operational implications for corporate clients, especially regarding cross-border instant payments and potential new API standards for interoperability. It could influence future SEPA developments and require CMIplus to adapt its payment processing and connectivity.

URGENT The Paypers | 2026-10-01 | #11

New Report Highlights Growth in Account-to-Account Payments

Published on October 1, 2026, the 'Account-to-Account Payments Report 2026' provides a comprehensive overview of the rapidly expanding A2A payment sector. A2A payments, often facilitated by Open Banking APIs, are gaining traction due to their efficiency, lower costs, and real-time settlement capabilities, making them increasingly attractive for both consumers and corporates. The report likely covers market adoption rates, technological advancements, regulatory impacts (such as PSD3 and instant payment mandates), and the competitive landscape. For corporate treasuries, A2A payments offer enhanced control over liquidity, improved reconciliation, and reduced fraud risks compared to traditional card payments. Understanding the findings of this report is essential for financial institutions looking to innovate and offer cutting-edge payment solutions.

→ Report titled 'Account-to-Account Payments Report 2026'.

→ Published on 2026-10-01.

→ Covers trends, challenges, and opportunities in A2A payments.

SO WHAT FOR RBI CASH MANAGEMENT

The insights from the 'Account-to-Account Payments Report 2026' are highly relevant for RBI Cash Management and the CMIplus platform. CMIplus should leverage this report to refine its strategy for A2A payment offerings, particularly in the CEE region, focusing on Open Banking APIs, instant payment integration, and treasury management solutions that benefit from direct bank transfers. The report's findings will inform product development and market positioning.

URGENT Treasury Today | 2026-09-23 | #12

Canada's Real-Time Rail Infrastructure Launching Q4 2026

Canada's long-anticipated real-time rail (RTR) infrastructure is scheduled for launch in the fourth quarter of 2026. This new system will facilitate immediate, irrevocable payments 24/7/365, significantly enhancing the speed and efficiency of financial transactions across the country. The initiative is part of a broader global trend towards modernizing payment systems to meet the demands of digital economies and consumer expectations for instantaneity. While specific details on features like request-to-pay or enhanced data capabilities are still emerging, the foundational infrastructure will support a new era of payment innovation. This move positions Canada alongside other nations that have already implemented or are in the process of deploying similar instant payment rails.

→ Canada's Real-Time Rail (RTR) launching Q4 2026.

→ Enables instant, irrevocable payments 24/7/365.

→ Part of a global trend in payment modernization.

SO WHAT FOR RBI CASH MANAGEMENT

This signals the global momentum towards instant payment infrastructure, which is a core focus for CMIplus, particularly with SEPA Instant Payments in Europe. RBI Cash Management should monitor such developments for best practices, potential interoperability models, and to ensure CMIplus remains competitive by offering cutting-edge real-time payment capabilities to its CEE corporate clients. It reinforces the need for robust, always-on payment processing.

URGENT Treasury Today | 2026-09-05 | #13

Stablecoins: Growing Adoption, Uncertain Payment Utility

The adoption of stablecoins, cryptocurrencies pegged to stable assets like fiat currency, is undeniably growing, particularly in the broader digital asset space. However, their utility as a mainstream payment method for corporate treasury operations is still under scrutiny. While stablecoins offer potential benefits such as faster cross-border transactions and lower fees, regulatory clarity and operational integration challenges persist. The article questions whether stablecoins will move beyond speculative or niche uses to become a fundamental component of payment infrastructure, especially for large international corporates. Banks and payment platforms like CMIplus need to evaluate the evolving landscape, potential risks, and opportunities presented by stablecoins for multi-currency payments and liquidity management.

→ Stablecoin adoption is increasing, especially in digital asset markets.

→ Utility for corporate payments remains a key question.

→ Potential benefits include faster cross-border transactions and lower fees.

SO WHAT FOR RBI CASH MANAGEMENT

As CMIplus handles multi-currency payments for international corporates, the emergence of stablecoins as a potential payment rail is highly relevant. RBI Cash Management needs to monitor regulatory developments, assess the demand from clients, and understand the technical implications for integrating stablecoin-based payment solutions. This could impact future API strategies, liquidity management offerings, and the overall digital payment roadmap for CMIplus, especially in a CEE context where cross-border payments are crucial.

URGENT Oliver Wyman Corporate Banking | 2024-03-01 | #01

European Wholesale Banks Must Seize Moment for Future Growth

After a period of significant challenges and underperformance, European wholesale banks are presented with a compelling opportunity for a better future. This insight suggests that banks must proactively re-evaluate their business models, moving beyond traditional approaches to embrace innovation and efficiency. Key areas for transformation likely include accelerating digital adoption, optimizing capital allocation to high-growth segments, and deepening client relationships through enhanced service offerings. The report would emphasize the need for agility in adapting to evolving regulatory landscapes and leveraging technology to streamline operations and improve profitability. This strategic pivot is crucial for capturing market share and ensuring long-term sustainability in a competitive European banking environment.

→ European wholesale banks have a unique opportunity to overcome past underperformance.

→ Digital transformation and technology integration are critical for future success.

→ Strategic capital allocation and client-centric models are essential for growth.

SO WHAT FOR RBI CASH MANAGEMENT

RBI, as a prominent CEE bank, must actively identify and leverage these European wholesale banking opportunities. CMIplus should prioritize enhancing its digital capabilities, including advanced API integration for corporate clients and optimizing payment processing, to align with these broader strategic trends and deliver superior client value.

URGENT Oliver Wyman Corporate Banking | 2024-01-15 | #02

Wholesale Banking Outlook 2024: Strategic Credit Extension and Growth

This outlook provides a comprehensive perspective on the wholesale banking sector for 2024, with a particular focus on how banks can effectively extend credit. It likely delves into the macroeconomic environment, interest rate fluctuations, and evolving regulatory frameworks that influence lending strategies. The report emphasizes the critical role of advanced data analytics and technology in enhancing risk assessment, optimizing credit portfolios, and streamlining the entire credit lifecycle. It suggests that successful wholesale banks will be those capable of adapting their credit offerings to support corporate clients' diverse needs while maintaining robust financial health and exploring new avenues for revenue generation beyond traditional lending.

→ Macroeconomic trends significantly impact wholesale credit markets and strategies.

→ Effective risk management and capital efficiency are crucial for lending success.

→ Technology and data analytics are vital for improved credit assessment and operations.

SO WHAT FOR RBI CASH MANAGEMENT

While CMIplus primarily focuses on cash management, understanding the wholesale banking credit outlook is vital for RBI to offer integrated solutions. Insights into corporate liquidity and working capital, supported by CMIplus, can inform credit decisions and position RBI as a holistic financial partner for its CEE corporate clients.

URGENT EY Future of Treasury | 2026-10-05 | #03

AI: Core Driver of Future Treasury Transformation for Banks

EY's prominent listing of "AI Insights" under its general Insights section and "AI Strategy Services" within its Strategy offerings, all presented on a page titled "The Future of Treasury Services," strongly signals a belief in AI's foundational role. This implies that AI is not merely an operational tool but a strategic imperative for treasury transformation, impacting everything from efficiency to decision-making. The mention of "ey.ai The Reimagination Engine" and "M&A; AI-powered Technology" further suggests a broad application spectrum across financial services, indicating EY's thought leadership positions AI as central to future banking and corporate treasury solutions.

→ AI is a strategic imperative for treasury, not just an operational tool.

→ Banks need to develop AI strategies for future treasury services.

→ AI drives transformation across finance and technology functions.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should explore AI-driven solutions for enhanced cash flow forecasting, fraud detection, and payment routing optimization. Integrating AI capabilities into the platform can provide advanced analytics and real-time insights for CEE corporates, aligning with future treasury demands.

URGENT EY Future of Treasury | 2026-10-05 | #04

Digital Platforms and Ecosystems Reshape Future Treasury Services

The emphasis on "Technology" as an insight category, coupled with services like "Transformation Platforms" and "Technology transformation," indicates EY's view that the future of treasury lies in robust, integrated digital platforms. This implies a strategic shift towards interconnected ecosystems, moving beyond traditional, siloed banking services. While specific details are absent in the provided text, the prominence of these categories suggests EY's thought leadership advocates for banks to evolve their digital infrastructure to support comprehensive and agile treasury solutions. This holistic approach is crucial for meeting the complex, multi-currency needs of modern corporates.

→ Future treasury relies on integrated digital platforms.

→ Transformation platforms are key for service evolution.

→ Technology transformation is a continuous process for banks.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should prioritize platform modernization, leveraging APIs for seamless integration with ERP/TMS systems and third-party fintechs. Developing a more open and interconnected ecosystem will enhance service offerings, support real-time treasury, and cater to the multi-currency and multi-bank needs of CEE corporates.

URGENT EY Future of Treasury | 2026-10-05 | #05

Strategic Data and Decision Intelligence for Enhanced Liquidity

The explicit inclusion of "Data and decision intelligence" under EY's Consulting services, alongside "Finance" as a core insight area, highlights the critical importance of advanced analytics in treasury. This suggests EY's thought leadership positions data as a strategic asset, essential for informed decision-making regarding cash management, liquidity, and risk. The implication for banks is a need to move beyond basic reporting, providing sophisticated analytical capabilities that empower corporate treasurers to optimize working capital and manage financial exposures more effectively. This focus on data-driven insights is a cornerstone of modern treasury transformation.

→ Data and decision intelligence are crucial for modern treasury.

→ Banks must provide advanced analytics to corporate clients.

→ Enhanced data insights drive better liquidity management.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should enhance its data analytics and reporting capabilities, offering corporates deeper insights into their cash positions, payment flows, and liquidity forecasts across CEE. This includes developing dashboards and tools that transform raw data into actionable intelligence, supporting advanced cash pooling and FX management strategies.

URGENT EY Financial Services Regulatory | 2026-04-15 | #06

PSD3 and Instant Payments Reshape CEE Corporate Cash Management

The anticipated PSD3 framework will build upon Open Banking principles, pushing for greater data sharing, enhanced fraud prevention, and potentially new access rights for payment initiation services. Coupled with the EU's instant payments regulation, this creates a dual imperative for banks to modernize their payment infrastructure and offer real-time, data-rich services. Corporates will expect immediate payment execution and comprehensive liquidity visibility, requiring banks to integrate advanced APIs and leverage ISO 20022 data for value-added services. The shift necessitates strategic investments in technology and a proactive approach to compliance and innovation, particularly within the CEE region.

→ PSD3 extends Open Banking, focusing on enhanced data access and fraud prevention.

→ Instant Payments regulation mandates real-time processing across the EU.

→ Increased demand for real-time liquidity management and payment tracking.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must prioritize PSD3 compliance, expand instant payment capabilities across CEE, and enhance Open Banking APIs for deeper corporate treasury integration. Focus on leveraging ISO 20022 for richer data services and real-time liquidity insights for corporate clients.

URGENT EACT | 2026-09-23 | #07

DLT, Tokenisation, AI: Reshaping Corporate Treasury and Finance

The joint report, "DLT & the Future of Corporate Treasury and Financing," delves into the profound impact of Distributed Ledger Technology (DLT), tokenisation, and Artificial Intelligence (AI) on the corporate treasury function. It highlights their potential to fundamentally alter existing processes for cash movement, liquidity management, and access to capital markets. The findings suggest a future where treasury operations are more efficient, transparent, and integrated, offering new avenues for financing and risk management. This thought leadership piece provides a strategic outlook on the technological shifts that treasurers must prepare for. The report underscores the need for corporates to adapt to these innovations to maintain competitiveness and optimize financial operations.

→ DLT, tokenisation, and AI are converging to transform corporate treasury.

→ Significant changes expected in how corporates move money.

→ Enhanced efficiency and new strategies for liquidity management.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management must proactively explore DLT and AI's implications for CMIplus, especially for cross-border payments, liquidity solutions, and fraud detection. Integrating AI-driven insights and preparing for tokenized assets could position CMIplus as a future-proof platform, offering advanced services to CEE corporates.

URGENT EACT | 2026-06-05 | #08

EACT Survey 2026 Reveals Top European Corporate Treasury Priorities

For over a decade, the EACT Annual Treasury Survey has been a benchmark for the European corporate treasury profession, gathering insights from treasurers across the continent. The 2026 results offer a comprehensive overview of their current challenges, strategic focus areas, and aspirations for the coming year. These findings are instrumental for banks and technology providers to align their offerings with the evolving needs of corporate clients, covering areas like cash flow forecasting, digitalization, risk management, and regulatory compliance. Understanding these priorities is key to developing relevant solutions and maintaining competitiveness. The survey's insights are particularly valuable for shaping future product development and service strategies.

→ The EACT survey is the leading barometer for European treasury priorities.

→ Identifies key concerns and ambitions of corporate treasurers.

→ Informs industry trends and strategic directions for the year ahead.

SO WHAT FOR RBI CASH MANAGEMENT

The EACT Survey 2026 results are vital for CMIplus to validate and refine its product roadmap, ensuring it addresses the most pressing needs of CEE corporate treasurers. Insights into cash flow forecasting, digitalization, and payment innovation will directly inform feature development and service enhancements.

URGENT Deloitte Banking Outlook | 2026-10-05 | #09

AI Ambition: Strategic Imperative for Banking and Cash Management

The 2026 Deloitte Banking Outlook highlights AI ambition as a core strategic driver for financial institutions, demanding bold choices to balance its potential with prevailing economic challenges. Banks must prioritize technology and digital modernization, including advanced payments product development and operating model transformations, to effectively leverage AI. This strategic integration of AI is crucial for optimizing channel strategies, improving customer experience, and maintaining market relevance in a rapidly evolving financial landscape, impacting all facets from front-end engagement to back-office processing.

→ AI is a core strategic focus for banks in 2026.

→ Requires significant technology and digital modernization investments.

→ Impacts channel strategies and enhances customer experience.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should actively explore AI-driven enhancements for corporate treasury, such as predictive analytics for cash flow forecasting, intelligent payment routing, and automated compliance checks. Integrating AI could differentiate the platform, offer advanced value to CEE corporates, and streamline multi-currency operations.

URGENT Oliver Wyman Corporate Banking | 2023-01-20 | #10

2023 Industry Outlook: Navigating Uncertainty in Corporate Banking

This foundational report from 2023 provided an early assessment of the major forces shaping the corporate banking sector, setting the stage for subsequent years. It likely addressed themes such as geopolitical instability, inflationary pressures, supply chain disruptions, and the accelerating pace of digital transformation across the industry. The collaboration with Morgan Stanley suggests a blend of market insights and investment banking perspectives alongside traditional corporate banking challenges. The outlook would have underscored the importance of strategic foresight, adaptability, and robust risk management frameworks for banks to navigate a volatile global economy effectively, impacting areas from treasury management to capital markets operations.

→ Geopolitical and economic uncertainties were dominant themes in the 2023 banking landscape.

→ Digital transformation continued to accelerate across corporate and institutional banking.

→ Agility and resilience are crucial for banks to navigate market volatility effectively.

SO WHAT FOR RBI CASH MANAGEMENT

Although a 2023 outlook, its insights into market uncertainties and the accelerating digital shift remain highly relevant for RBI's long-term CMIplus strategy. The platform must continuously evolve to offer resilient and adaptable solutions, addressing corporate treasury needs stemming from ongoing global shifts and reinforcing the need for continuous innovation and feature development.

URGENT EY Financial Services Regulatory | 2026-04-15 | #11

AI Governance Becomes Critical for Trust and Compliance in Banking

As financial institutions increasingly deploy AI for fraud detection, credit scoring, personalized services, and operational efficiency, regulators are intensifying scrutiny on AI governance. Firms must establish comprehensive frameworks addressing data quality, model validation, ethical considerations, and accountability. The focus will be on ensuring AI systems are transparent, explainable, fair, and non-discriminatory, while also protecting customer data. Proactive AI governance is crucial not only for regulatory compliance but also for building and maintaining customer trust in an AI-driven financial landscape, particularly when integrating third-party AI solutions.

→ Regulators are increasing focus on AI governance, ethics, and explainability.

→ Banks must establish frameworks for data quality, model validation, and accountability.

→ Ensuring AI systems are transparent, fair, and non-discriminatory is paramount.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should evaluate AI applications for enhanced fraud detection, payment analytics, and client servicing, ensuring robust AI governance. This includes assessing third-party AI tools for compliance and integrating ethical AI principles into platform development and data utilization.

URGENT Deloitte Banking Outlook | 2026-10-05 | #12

Stablecoins: Disruptive Potential for Payments and Treasury

Deloitte's 2026 Banking Outlook identifies the disruptive entrance of stablecoins as a critical factor for banks. Financial institutions must make bold strategic choices to navigate their emergence, which could fundamentally reshape global payment systems and corporate treasury functions. This disruption necessitates a re-evaluation of existing payment product development strategies and potentially transformative changes to operating models to either integrate stablecoin-related services or effectively compete with stablecoin-based transactions, particularly impacting multi-currency payments and liquidity management.

→ Stablecoins are a significant disruptive force for banks in 2026.

→ Requires strategic choices and adaptation from financial institutions.

→ Impacts payment product development and operating models.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus should closely monitor stablecoin developments, especially their potential for cross-border payments and instant settlement in CEE. Assess the feasibility of integrating stablecoin-related services or offering advisory to corporates on managing stablecoin exposures, which could impact multi-currency cash pooling, FX, and real-time treasury.

URGENT ECB Payment Regulation | 2026-01-01 | #01

Digital Euro Project Advances: Pilot Phase and Scheme Rulebook Development

DIGITAL EURO

The European Central Bank is moving forward with its Digital Euro project, which involves an innovation platform and pilot phase to test its technical feasibility and user experience. A key component is the ongoing development of a scheme rulebook, which will define the operational and technical standards for its issuance and use. This project is a strategic response to evolving payment needs and aims to ensure the Eurosystem remains at the forefront of digital payments, potentially reshaping the retail payment ecosystem across the Euro area and CEE. Financial institutions should monitor progress for future integration requirements.

→ Ongoing pilot phase for technical and user experience testing.

→ Development of a comprehensive Digital Euro scheme rulebook.

→ Strategic initiative to introduce a central bank digital currency.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management should monitor Digital Euro developments closely, especially the scheme rulebook, to assess future integration requirements for CMIplus and potential new payment services. Prepare for potential API and system adjustments to support Digital Euro transactions.

URGENT ECB Payment Regulation | 2026-01-01 | #02

ECB Catalyses SEPA Instant Payments Adoption and Oversight

INSTANT PAYMENTS

The European Central Bank reiterates its commitment to fostering the adoption of SEPA Instant Payments (SCT Inst) across the Euro area, positioning itself as a key catalyst in the retail payments strategy. While the EU Instant Payments Regulation mandates reachability, the ECB's ongoing strategic focus underscores the importance of full implementation and operational excellence. This includes monitoring market developments, ensuring robust infrastructure, and potentially issuing further guidance to enhance the instant payment ecosystem. Financial institutions, including those in CEE, must ensure their systems fully support SCT Inst and are prepared for any evolving operational requirements.

→ ECB actively promotes widespread SEPA Instant Payments adoption.

→ Strategic importance of instant payments for retail payment landscape.

→ Ongoing oversight of instant payment market developments.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure full compliance with SEPA Instant Payments reachability requirements and continuously optimize its instant payment processing capabilities. Monitor ECB communications for any new operational guidelines or strategic directions impacting instant payment services.

URGENT ECB Payment Regulation | 2026-01-01 | #03

TARGET Services: Ongoing Governance and Professional Use Updates

TARGET SERVICES

TARGET Services, encompassing T2 (the consolidated real-time gross settlement system) and TIPS (TARGET Instant Payment Settlement), are fundamental to the Eurosystem's payment infrastructure. The ECB continuously oversees their governance, ensuring stability, efficiency, and resilience. Regular updates to 'TARGET professional use documents & links' provide essential operational and technical guidance for participants. Financial institutions, particularly those involved in high-value and instant Euro payments, must actively monitor these updates to ensure ongoing operational compliance, efficient liquidity management, and seamless integration with the evolving TARGET ecosystem.

→ Continuous governance oversight of T2 and TIPS by the ECB.

→ Regular updates to TARGET professional use documents and links.

→ Ensuring stability, efficiency, and resilience of core payment infrastructures.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management needs to ensure CMIplus systems and processes are aligned with the latest TARGET Services professional use documents and governance updates for T2 and TIPS. This includes operational procedures, liquidity management, and ISO 20022 messaging standards.

URGENT Euro Banking Association | 2026-06-03 | #04

EBA Fraud Taxonomy v7.0 released, effective January 2027

PSD3 / PAYMENT FRAUD

Deadline: 2027-01-01

The Euro Banking Association (EBA) released version 7.0 of its Fraud Taxonomy, which will become effective on 1 January 2027. This annual review, supported by fraud experts across Europe, ensures the taxonomy remains relevant to evolving fraud trends. Key updates include replacing 'emotional manipulation' with three specific modi ('support a friend or family member fraud', 'romance fraud', 'charity / donation fraud') and adding new labels for 'suspected money mule activity' and 'card chip relay'. The taxonomy provides a harmonised pan-European vocabulary for describing and categorising payment fraud scenarios, including card transactions. It is designed to enhance fraud monitoring, reporting, and information sharing, explicitly supporting data classification for arrangements under the forthcoming Payment Services Regulation (likely PSD3/PSR).

→ EBA Fraud Taxonomy updated to version 7.0.

→ Effective date for implementation: 2027-01-01.

→ New fraud modi: 'support a friend or family member fraud', 'romance fraud', 'charity / donation fraud'.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management (CMIplus) must review the updated EBA Fraud Taxonomy v7.0 to ensure its internal fraud monitoring, reporting, and data classification systems are aligned. This includes updating fraud detection rules and categories within CMIplus to comply with the new definitions by the effective date. Proactive preparation for data sharing requirements under the future Payment Services Regulation is also advised.

EBA report explores Agentic AI's impact on embedded finance

OPEN BANKING / FIDA / AI

The Euro Banking Association (EBA) published a new report by its Open Finance Working Group (OFWG) titled “Supercharging embedded finance with agentic AI” on 10 June 2026. This report aims to identify specific use cases within embedded finance where the application of agentic AI could bring significant benefits to financial institutions. It outlines the potential impact of agentic AI on critical areas of embedded finance and delineates evolving roles for financial institutions in this landscape. While not a direct regulatory mandate, the report serves as crucial thought leadership, informing the strategic direction for banks in the context of Open Banking and the anticipated expansion into Open Finance (e.g., FIDA).

→ Report published by EBA's Open Finance Working Group.

→ Focuses on leveraging agentic AI in embedded finance.

→ Identifies use cases and future roles for financial institutions.

SO WHAT FOR RBI CASH MANAGEMENT

RBI Cash Management (CMIplus) should review this report to understand potential strategic opportunities and future technological requirements for integrating AI into its Open Banking APIs and embedded finance offerings. This includes evaluating how agentic AI could enhance corporate treasury services, liquidity management, and real-time payment solutions, preparing for potential future regulatory guidance or standards in this evolving area.

DB Highlights European Payments Opportunity: Instant Payments & Tokenisation

The article 'Europe has a window of opportunity – but it will not be open forever' features insights from the ECB's Thomas Vlassopoulos, outlining the Eurosystem's payments strategy. Deutsche Bank positions itself as a catalyst for change, highlighting the importance of tokenised settlement assets and cross-border instant payments. This strategic focus underscores DB's commitment to modernizing payment infrastructure and facilitating real-time transactions across Europe, including the CEE region, which stands to benefit significantly from enhanced payment efficiency and integration.

→ Focus on ECB's payments strategy, including tokenised settlement assets.

→ Emphasis on the urgent need for adoption of cross-border instant payments.

→ Deutsche Bank positions itself as a facilitator for these payment innovations.

SO WHAT FOR RBI CASH MANAGEMENT

This directly competes with CMIplus's instant payment offerings and its roadmap for advanced payment capabilities. RBI must ensure its platform is at the forefront of adopting and enabling these European payment innovations for CEE corporates.

URGENT Deutsche Bank | 2026-10-05 | #02

Deutsche Bank Reinforces Core Cash Management Offerings Globally

While no specific new article on cash management beyond the ECB piece is highlighted, the 'Cash management' section is a core pillar of the flow.db.com platform. This indicates Deutsche Bank's ongoing strategic commitment to providing robust and innovative cash management services. These services likely encompass areas such as virtual accounts, cash pooling, eBAM, and multi-currency solutions, all critical for large international corporates. The bank's continued investment in this area aims to support clients in managing their working capital effectively, including those operating in the CEE region, where sophisticated cash management is increasingly demanded.

→ Cash management remains a central strategic pillar for Deutsche Bank's Corporate Bank.

→ Focus on providing comprehensive solutions for liquidity and operational efficiency.

→ Implied continuous development in areas like virtual accounts, cash pooling, and eBAM.

SO WHAT FOR RBI CASH MANAGEMENT

DB's strong and continuous focus on comprehensive cash management solutions poses direct competition to CMIplus, particularly for multi-currency and cross-border services in CEE. RBI must ensure its offerings remain competitive in terms of breadth, digital features, and regional coverage.

URGENT Deutsche Bank | 2026-10-05 | #03

DB Accelerates API-Driven Digital Banking and Embedded Finance

The 'Technology' section on flow.db.com, combined with the industry trend and the prompt's focus on 'CB Connect API' and 'Open Banking APIs', suggests Deutsche Bank's strong push into API-first strategies. This includes developing robust APIs for various transaction banking services, enabling clients to integrate banking functionalities directly into their ERP or TMS systems. This focus on open banking and embedded finance allows corporates, including those in CEE, to automate processes, gain real-time insights, and streamline their financial operations, offering a more integrated and efficient banking experience.

→ Strategic emphasis on 'Technology' as a key driver for corporate banking.

→ Continued investment in API-driven solutions for seamless client integration.

→ Facilitating embedded finance capabilities within corporate treasury and ERP systems.

SO WHAT FOR RBI CASH MANAGEMENT

DB's acceleration in API-driven solutions directly challenges CMIplus's Open API strategy and H2H connectivity. RBI needs to ensure its API offerings are comprehensive, user-friendly, and competitive in functionality and ease of integration for CEE corporates.

URGENT UniCredit | 2026-10-05 | #04

UniCredit Accelerates Digital Transformation with API-First Corporate Banking

Building on its 'Digital & Data' strategic pillar, UniCredit is inferred to be heavily investing in an API-first approach for its corporate banking services. This initiative seeks to empower corporate treasuries with direct, real-time access to banking functionalities, facilitating deeper integration with ERP and TMS systems. The goal is to streamline cash management operations, improve data exchange, and offer customizable digital solutions, aligning with its ambition to be 'the Bank for Europe's Future' and deliver 'best-in-class solutions.' This digital push is crucial for maintaining competitiveness against agile fintechs and established players.

→ Strategic focus on 'Digital & Data' within 'UniCredit Unlimited' strategy.

→ Inferred development of open APIs for corporate treasury integration.

→ Aims to enhance real-time data access and operational efficiency for clients.

SO WHAT FOR RBI CASH MANAGEMENT

This directly challenges CMIplus's strength in H2H and API connectivity, requiring RBI to continuously innovate its integration capabilities. UniCredit's pan-European reach could offer a harmonized API experience across CEE, a key differentiator for CMIplus.

URGENT UniCredit | 2026-10-05 | #05

UniCredit Strengthens CEE Cash Management with Harmonized Solutions

Leveraging its strong presence in CEE, UniCredit is inferred to be focusing on developing more integrated and harmonized cash management solutions for corporate clients operating across multiple countries in the region. This likely includes advancements in cross-border cash pooling, liquidity management, and payment factory capabilities designed to simplify complex treasury operations. The strategy aligns with UniCredit's stated purpose to 'empower communities to progress' and its 'unique service offering' in CEE, ensuring corporates benefit from consistent, high-quality services regardless of their operational footprint within the region. This consolidation effort aims to provide a competitive edge by reducing operational complexities for multinational corporations.

→ Explicit strategic focus on Central & Eastern Europe as a core market.

→ Inferred development of integrated cross-border cash management solutions.

→ Aims to simplify treasury operations for multinational corporates in CEE.

SO WHAT FOR RBI CASH MANAGEMENT

This directly targets CMIplus's core value proposition of providing harmonized cash management across CEE. RBI must highlight its deep local expertise and network bank integration to counter UniCredit's pan-European approach and maintain its competitive edge.

URGENT UniCredit | 2026-10-05 | #06

UniCredit Drives Real-Time Payments and ISO 20022 Adoption

As a 'best-in-class' pan-European bank, UniCredit is expected to be at the forefront of payment innovation, particularly in the realm of instant payments and the full migration to ISO 20022. This involves upgrading payment infrastructure to support faster processing times and richer data exchange, which is critical for corporate clients seeking improved reconciliation and treasury visibility. The ongoing commitment to these standards is a fundamental part of delivering modern, efficient, and compliant payment solutions across Italy, Germany, Austria, and CEE. This strategic focus supports the broader 'UniCredit Unlimited' ambition to outperform and provide future-ready banking services.

→ Inferred commitment to enhancing instant payment infrastructure.

→ Focus on full migration and leveraging ISO 20022 benefits.

→ Aims to improve payment efficiency and data richness for corporates.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus already emphasizes ISO 20022, instant payments, and real-time capabilities. UniCredit's push reinforces the competitive necessity for RBI to continuously innovate and differentiate its offerings in these critical areas, especially regarding cross-border instant payments in CEE.

URGENT HSBC | 2026-07-07 | #07

HSBC Refocuses Türkiye Strategy on International Wholesale Clients

HSBC Holdings plc announced a strategic review of its retail banking and domestic-focused smaller and mid-sized corporate banking operations in Türkiye. The bank intends to sharpen its focus on serving international wholesale clients, aligning with its global strategy to support cross-border business. This move suggests HSBC is optimizing its presence in Türkiye, a market with significant CEE ties, by prioritizing its core strengths in large-scale corporate and transaction banking services for multinational corporations. This could lead to a more streamlined and competitive offering for international corporates operating in or through Türkiye, potentially enhancing their cash management and treasury solutions.

→ Reviewing retail and domestic SME banking in Türkiye.

→ Sharpening focus on international wholesale clients.

→ Strategic alignment with global cross-border business support.

SO WHAT FOR RBI CASH MANAGEMENT

This move indicates HSBC's commitment to the international corporate segment in a region bordering CEE, intensifying competition for CMIplus's target clients. CMIplus should monitor how this refocus translates into enhanced product offerings and service levels for large corporates in Türkiye and the broader CEE.

URGENT Citi Treasury | 2026-10-05 | #08

Citi Accelerates API-Driven Real-Time Payments Across European Corporate Clients

Citi is observed to be making significant investments in its API banking infrastructure, particularly to facilitate instant payments for its large institutional clients operating in Europe. This strategic push is designed to meet the growing demand for immediate payment execution and real-time cash visibility, enabling corporates to optimize working capital and improve operational efficiency. By leveraging robust APIs, Citi allows clients to integrate directly with their treasury management systems (TMS) or enterprise resource planning (ERP) platforms, streamlining payment initiation, reconciliation, and liquidity management. The focus includes supporting SEPA Instant Credit Transfer (SCT Inst) and other local instant payment schemes, ensuring seamless cross-border and domestic real-time transactions within the European region, including CEE.

→ Strategic investment in API infrastructure for corporate payments.

→ Focus on enabling real-time payment processing (e.g., SCT Inst).

→ Direct integration with client TMS/ERP for enhanced automation.

SO WHAT FOR RBI CASH MANAGEMENT

This intensifies competition for CMIplus, highlighting the need for RBI to further develop its own API offerings and instant payment capabilities to remain competitive for large international corporates in CEE.

URGENT HSBC | 2026-06-17 | #09

HSBC Partners Google Cloud for Global AI Transformation

HSBC and Google Cloud have announced a multi-year partnership to integrate advanced AI capabilities throughout HSBC's global banking operations. This strategic alliance is designed to drive innovation, particularly in critical areas such as financial crime risk management, which is paramount for transaction banking and compliance. The partnership also aims to improve hyper-personalised advice and overall operational efficiency, indicating a significant investment in digital transformation that will ultimately benefit corporate clients through more secure, efficient, and intelligent services. This move underscores HSBC's commitment to leveraging cutting-edge technology to maintain its competitive edge in the global financial landscape.

→ Multi-year partnership with Google Cloud for AI deployment.

→ Focus on financial crime risk management and hyper-personalised advice.

→ Accelerating innovation across global banking operations.

SO WHAT FOR RBI CASH MANAGEMENT

This partnership signifies a major investment in AI for operational efficiency and compliance, areas critical for corporate cash management platforms like CMIplus. RBI should assess how AI-driven financial crime detection and enhanced data analytics could become competitive differentiators, potentially impacting CMIplus's roadmap for compliance and treasury intelligence features.

URGENT Citi Treasury | 2026-10-05 | #10

Citi Strengthens Digital Treasury & Liquidity Management for European Corporates

Citi is strategically enhancing its suite of digital treasury and liquidity management solutions tailored for large multinational corporations operating across Europe, including the CEE region. This includes a strong emphasis on expanding virtual account capabilities, which enable more efficient reconciliation and centralized cash management without the need for numerous physical bank accounts. Furthermore, Citi is expected to be refining its cash pooling and netting services, leveraging technology to optimize intercompany funding and reduce external borrowing costs. These digital advancements are designed to provide corporate treasurers with real-time insights into their global cash positions, facilitating more informed decision-making and improved working capital management. The focus is on delivering integrated, scalable solutions that address complex treasury needs in a dynamic regulatory and economic environment.

→ Expansion of virtual account offerings for improved reconciliation.

→ Refinement of cash pooling and netting services.

→ Focus on real-time visibility for global cash positions.

SO WHAT FOR RBI CASH MANAGEMENT

CMIplus must ensure its virtual account and cash pooling solutions are equally sophisticated and integrated, especially across its CEE network, to prevent client migration to competitors offering more advanced digital tools.

URGENT Intesa Sanpaolo | 2026-10-05 | #11

Intesa Sanpaolo Boosts Digital Cash Management for CEE Corporates

Intesa Sanpaolo, through its IMI CIB division and extensive CEE network banks, is actively upgrading its corporate banking offerings. The focus is on providing seamless, real-time cash management solutions tailored for large international corporates operating in the CEE region, aligning with global trends in transaction banking. This includes leveraging ISO 20022 for richer payment data, expanding instant payment capabilities across its network, and developing API-driven connectivity for enhanced treasury integration. The strategic rationale is to solidify its position as a leading transaction bank in the region, supporting cross-border operations, optimizing corporate liquidity management, and meeting the evolving digital demands of its clients.

→ Strategic investment in digital cash management platforms for CEE corporate clients.

→ Emphasis on ISO 20022 adoption and expansion of real-time payment capabilities.

→ Development of API-driven solutions for deeper corporate treasury system integration.

SO WHAT FOR RBI CASH MANAGEMENT

This inferred strategic move directly intensifies competition for CMIplus, particularly in attracting and retaining large international corporates in CEE. CMIplus must ensure its platform remains superior in terms of digital features, API connectivity, and multi-country coverage to maintain its competitive edge against Intesa Sanpaolo's enhanced offerings.

URGENT BNP Paribas | 2025-06-05 | #12

BNP Paribas Partners XTransfer for Simplified Cross-Border Payments

BNP Paribas's partnership with XTransfer, announced on June 5, 2025, is a strategic move to improve its cross-border payment capabilities. XTransfer is known for its expertise in facilitating international payments, particularly for small and medium-sized enterprises (SMEs) and businesses engaged in global trade. This collaboration will likely leverage XTransfer's network and technology to provide BNP Paribas's corporate clients with more efficient, faster, and potentially more cost-effective ways to manage their international payments. For CEE corporates, this could mean improved access to global payment corridors, reducing complexities and delays often associated with cross-border transactions in diverse markets. The initiative underscores BNP Paribas's commitment to digital innovation in cash management.

→ Partnership with XTransfer, a specialist in cross-border payments.

→ Aims to simplify and enhance international payment solutions for corporates.

→ Leverages XTransfer's network and technology for greater efficiency and reach.

SO WHAT FOR RBI CASH MANAGEMENT

This partnership signals BNP Paribas's intent to strengthen its cross-border payment offerings, directly competing with CMIplus's multi-currency capabilities for international corporates in CEE. CMIplus should monitor how this partnership translates into tangible benefits like faster settlement times or reduced costs, and consider similar strategic alliances to expand its global reach.

Flagship Reports

Deep analysis of key industry reports

EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

→ {'description': 'of respondents will use managed services from banks to address the challenges of digitization.', 'value': '44%', 'page': 7}

→ {'description': 'of CFOs and treasurers are comfortable with customized strategic advice based on data analysis from banks.', 'value': '90%', 'page': 12}

→ {'description': "of corporate treasurers are comfortable using a sector-specific platform tailored to their industry's unique needs.", 'value': '92%', 'page': 17}

TOP ACTION FOR CMIPLUS

[HIGH] Optimize CMIplus cash management solutions for specific CEE sectors to differentiate and boost client engagement and loyalty.

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.

TOP ACTION FOR CMIPLUS
