EY Four Trends Redefining Cash Management 2025

Cash management is rapidly evolving from transaction-oriented to strategic, data-driven services, necessitating a profound transformation in banking. The future demands banks enrich their value propositions, expand product portfolios, and strengthen client relationships with tailored offerings and experiences. Advanced technologies like AI, ML, and digital assets are creating new possibilities, enabling finance teams to reposition as strategic advisors to the business. However, clients seek control over automation and expect intuitive, personalized experiences, pushing banks to innovate or risk losing relevance to agile FinTechs and nonbanks. Success hinges on banks investing in technology, integrating diverse data, and offering flexible, industry-specific solutions while navigating the increasing regulatory clarity around digital assets.

KEY STATISTICS

→ {'description': 'of survey respondents say digitizing treasury functions is a challenge.', 'value': '73%', 'page': 7}

McKinsey Global Payments Report 2025

The 2025 McKinsey Global Payments Report highlights a payments landscape defined by increasing fragmentation, the transformative impact of AI, and the growing adoption of digital assets. For CMIplus, this means navigating a multirail ecosystem where interoperability, programmable compliance, and AI-driven efficiencies are paramount for serving large international corporates in CEE. The shift towards lower-yield payment rails and agentic commerce necessitates innovation in monetization and a focus on building trust through transparent, intelligent systems. Success will hinge on adapting our platform to these evolving demands to remain a leading regional player.

KEY STATISTICS

→ Global payments revenue reached $2.5 trillion in 2024, projected to grow to $3.0 trillion by 2029.

→ EMEA payments revenue grew at a 13% CAGR from 2019-2024, indicating strong regional growth.

→ Interest income constituted 46% of total payments revenues in 2024, but is projected to slow to 2% annual growth through 2029.

→ Cash usage declined to 46% of worldwide payments in 2024, down from 50% in 2023, reflecting the shift to digital.
